Boy Scouts Offer Democracy Scene

VALLEY FORGE Pa. June 29.—The United Nations could learn a few tricks from the Boy Scouts.

Walk around the 625-acre site of the scouts' second national jamboree and you'll see sights that make the trouble in Korea all the harder to understand.

Sights like: A kilted scout from Scotland solemnly explaining the ritual of cricket to an enthralled 12-year-old Negro from Mississippi.

A grinning Filipino youth swapping his scout knife for the pocket camera of a lanky Eagle scout from Maine.

A boy from Austria learning how to crack a bull whip, with his Oklahoma City scout as his patient teacher.

They spoke different languages, they came from homes of every sort, but the 35,000-and-some scouts and scouters already encamped on George Washington's one-time winter headquarters were getting along like brothers today.

By tonight some 47,000 will be on hand, for the week-long jamboree opens officially tomorrow with President Truman scheduled to come from Washington—the Korean crisis permitting—to deliver the welcoming address.

LETTERS to the Editor

Rodeo Neglect To Boy Calf Owners Charged

ROSEBURG — I have a gripe. Usually I keep them to myself. This one I feel should be aired.

Yes, the rodeo was well conducted by the Sheriff's posse. It created a lot of trade in Roseburg. The community spirit and cooperation of its citizens were fine to see.

But what of the boy who last year hung on to the tail of his 4-H calf at the scramble? (Ten others did as well.)

I have watched that boy, through rain and shine, rise at dawn to cut green feed along the roadsides and in the fields, so that "Susie" might have good feeding. He has caddied at the golf course and dug holes for sewers, that she might have the proper ration. He has denied himself both hunting and fishing trips (so dear to a fourteen-year-old's heart) to care for Susie. \$135.00 of this boy's money went

into Susie, Susie, one of the smaller of the boy's calves, weighing in at 322 lbs. last rodeo time, now weighs 1210 lbs. Her coat glistens. She is a beauty. She comes from the finest registered stock. The very sight of her broad back and meaty flanks makes the mouth water. Steaks? She'll make the finest. Everyone who saw her shown agreed she was the prize winner. Coming from the registered stock she should have auctioned at a fine price.

Auction? There wasn't any. The posse couldn't be bothered. No announcement was made that these calves were for sale. No ribbon, even, awarded to the boys. One boy who had to hire a truck to take his calf in could not afford the \$5.00 necessary to haul the calf home. He simply had to call up the butcher and take any price offered him. The boys understood that there would be bids on these fine calves at rodeo time. Personally, I feel these earnest kids got a dirty deal.

4-H club is one of the finest of character building projects, but these boys are feeling low and discouraged. I, myself, am a 4-H leader, and have been a club member. I know just how much a pro-

BOTTLE SAVES CAR OWNER

CHICAGO —(AP)—Arthur Gulbrandsen, 39, was saved by a bottle—and an empty bottle, at that. He was in his garage. Suddenly he felt faint from exhaust fumes from his car. He hurled a milk bottle through the garage window. His sister-in-law, Mrs. Irene Hummel, heard the crash, went to the garage and turned off the car motor. Firemen revived Gulbrandsen.

SAFE FROM LIGHTNING

ATLANTIC CITY —(AP)—The safest place to be in a lightning storm is in a metallic bed. Emmet Cox, Chicago fire prevention expert, explained this to the annual meeting of the National Fire Protection Association.

A lightning bolt entering a room would follow the metal bedstead and leave its occupant unharmed, he said.

Can't someone do something about this situation? I'm sure there must be gentlemen who would like to see these calves, especially Susie.

MARY H. EASTMAN
Roseburg, Ore.

Congress Chat

HARRIS, ELLSWORTH, M. C. 4th District, Oregon

After many months of discussion, the House Ways and Means Committee produced a tax bill. It reduces a number of the more irritating "war excess" taxes. To make up for revenue thus eliminated, the committee provided for some additional taxation, the heavy burden of which will fall on large corporate incomes. There is little doubt that the bill will pass both House and Senate and be signed by the President. It should be noted that this tax bill does not actually reduce or eliminate taxes—it will raise substantially the same amount of money as is being levied now. The new bill shifts the places from which tax collections are made and it will seem like a mild relief. But the people, the consumers, will continue to pay the taxes—indirectly.

When the appropriations bill is finally completed by the Senate and cleared through conference and final passage by both Houses, I believe it will contain some really good news for the people at Charleston on Coos Bay. Meanwhile I am able to report that the Engineers anticipate the availability of funds for beginning work on that project soon after the middle of July, and even now completing plans and designs for the bulkheads and some other construction there. When I visit Charleston and Coos Bay this fall, I shall enjoy telling the whole rather involved story of our struggle to secure this appropriation.

There is a saying to the effect that an elephant never forgets. Apparently the Democratic donkey has a long memory too. Two years ago President Truman decided he wanted a balcony on the south portico of the White House. The Truman plan to change the architecture of the White House was presented to the Federal Fine Arts Commission, composed of nationally-known and qualified experts in the art, architectural and engineering fields. The Commission unanimously disapproved of a balcony being located in the middle of the south portico of the White House.

White House officials made no secret that the President was plenty "burned" over the Commission's decision and, disregarding the advice of the experts, went ahead and had the balcony made a part of the White House, already crumbling from old age and decay. Since then a major repair job has been started on the executive mansion.

This week the terms of four members of the Fine Arts Commission who opposed the President's balcony expired. The President refused to reappoint any of the four, replacing them with new members.

Robert L. McCormick, Research

DIRTY WORK AT THE AIRPORT

YORBA LINDA, Calif.—(AP)—Arvid Morris Smith had his wings clipped—figuratively, that is.

Director of the Citizens Committee for the Hoover Report, says his organization is very much opposed to two of President Truman's latest proposals for reorganization of the executive departments. McCormick was assistant to Herbert Hoover during the operation of the Reorganization Committee.

McCormick declared that the President's two recent proposals regarding the Reconstruction Finance Corporation and the creation of a Department of Health, Education and Security are "in conflict with the recommendations of the Hoover Commission."

The President wants the RFC transferred to the Commerce Department. The Hoover Commission said the RFC should be transferred to the jurisdiction of the Treasury Department.

The reorganization plan creating a Department of Health, Education and Security also is "at variance" with Hoover Commission recommendations. McCormick said that the President's plan would put the health service under the jurisdiction of the Social Security Administration, while the Hoover Commission urged that the health service be set up as an independent United Medical Administration, taking in the medical activities of the Armed Services and the Veterans' Administration.

Takes it easy all the time!

Prestomatic Fluid Drive Transmission consists of three compact units... rigid Fluid Drive, the Safety Clutch and Prestomatic Transmission. Each unit is designed with a minimum of moving parts, and each unit is ruggedly built to give trouble-free service for the lifetime of the car.

Make no mistake! Although most cars use the Fluid Drive principle that Chrysler first introduced 12 years ago—there's an all-important difference in automatic gear shifting today! Chrysler and only Chrysler gives you full control of your car. While others shift you up and down—even when you don't want to shift—Chrysler's simple, cool-running transmission takes its orders from you. Even at 12 miles an hour, in slow moving traffic, you're in high while others shift down to lower gears. How much quieter your engine runs! How much more smoothly! What a difference in high-gear economy! Come see what Fluid Drive does for you! Examine Chrysler workmanship... compare the quality of materials... discover the benefits of Chrysler engineering! You'll find built-in value all the way through that has no equal! Extra money's worth, we're sure, that will make you a Chrysler buyer for life!

THE NEW YORKER 4-DOOR SEDAN

See it—drive it... there's built-in value all the way through!

Advantages of Chrysler's Fluid Drive

Advantages of Chrysler's High Compression Spitfire Engine!

Chrysler's Advantages in Comfort and Safety

Automatic Gear Shifting—with full control of your car! Better traction—safer on slippery roads. Convenience of clutch for easier parking. Slower Engine Speeds—reduced noise, wear. Saves gasoline! Drive in high while others drive in low in traffic.

Waterproof Ignition—prevents stalling in rain or high water! Lubricated Cylinder Walls—chemical protection for increased life. Floating Piston—helps eliminate vibration. Superfinished Parts—reduce friction, last longer. Exhaust Valve Seat Inserts—reduce need for valve grinding. Full Flow Oil Filter—keeps oil clean!

Functional Design—full room for your head, legs, shoulders. Easy to enter and leave! Safe Guard Hydraulic Brakes—smoother stops, less pedal pressure. Cylindrical Linings for double the wear. Electrically Operated Windshield Wiper—constant speed all the time! Chair Height Seats—no cramping, you sit naturally! Safety Rim Wheels—won't throw tires after blowouts at normal speeds.
