### SOUTH AFRICA AND JAPAN STUDY TOPICS FOR MISSION GROUP

A study program on Japan, presented by Mrs. Fay Clark, and the Congo, led by Mrs. Edith S. Ackert, highlighted the March meeting of the Mission society of the First Christian church.

Along with the material Mrs. Ackert presented on her topic, she read a letter, received that morning from Melba Palmer Rees, a missionary stationed in Kimberly,

South Africa, in response to a Christmas card Mrs. Ackert had sent. Mrs. Rees mentioned the fine supply of toys that had been received at the mission for their two-year-old son, Ben Allen, which would supplant the sticks, wires and old tin cans he had previously used for toys. Mrs. Rees commented upon the urgent need for more missionaries and told of the Max Randalls, who had recently arrived to work in the area.

Preceding the program, a business meeting was held, led by President Elsie Coffell. Following the secretary's report, a discussion was held on mission objectives, which include the Kiamichi mission in Oklahoma, one at Hiattman, Ky., and some interests in Japan. The date for the World Cal dinner will be announced soon and it is hoped to have information on the White Swan Salmon dinner soon, in order to hold it in May.

Attending the meeting were Edith Staggs, Alice Barker, Emma Beckley, Fay Clark, Elsie Coffell, Martha Knox, Edith S. Ackert and Toni Crenshaw. The next meeting will be in the evening, April 13.

## Timber Industry Equipment Survey Begun In Oregon

An intensive survey of equipment and materials used by the timber industries has been started in southwestern Oregon by the Roseburg branch of the U. S. Forest Service experiment station, according to Forester G. L. Hayes.

The information obtained will be used by the National Production authority for allocating men, equipment and materials to the timber industries and to manufacturers of equipment; for certification of production loans; and for accelerated amortization of equipment for income tax purposes. The National Securities Resources board will use it for programming wartime production of forest products and equipment.
