A GAY CARDINAL

CHICAGO — (P) — Bill Gay, one of the greatest backs to ever play high school football in Chicago, will do his pro pigskin work for the Chicago Cardinals starting this fall. Gay, defensive standout for Nortre Dame for three years, was raised practically in the shadows of the Comiskey Park goalposts. Gay is an exceptionally good ball carrier, too, but his defensive abilities saved many a game for the Irish.

The 33-year-old Holmes, former Braves' batting hero, was due to arrive in Chicago today. Church, West Side Will **Replay Protested Game**

By mutual consent of the team

By mutual consent of the team managers, the game between the christian Church and West Side league has been ruled "no-contest." The tilt was played Friday, June 15, and was won by West Side, 22-18, accounting for the only loss by the Christians.

According to YMCA Director Merlin Donaldson, the game was not a forfeit because both teams were guilty of violations. The protest was tendered by the Christian church because West Side was playing three ineligible players. The church team was then charged with unsportsmanlike conduct.

The game will be replayed at a later date, according to Donaldson.

Allocation Seen Of Metals Oct. 1

WASHINGTON — (A) —The government announced Saturday the whole manufacturing economy—consumer goods as well as military and defense-supporting industries—may be brought under compulsory allocation of metals on Oct. 1.

Manley Fleischmann, National Production administrator, said the consumer industries soon will be invited to file requests for metals to be used in the last quarter of the year.

the year.

If these companies find themselves unable to get basic metals in the three months ahead, Fleischmann told a news conference, allocations will be set up for them assuring a guaranteed but possibly reduced supply of metal.

The NPA said that, as of July 1, more than 350 types of civilian products, including most industrial items but not consumer "durables" like autos, radio and refrigerators, will get government allocations of steel, copper and aluminum.
