

Survey Indicates Disaster Took Submarine Affray

LONDON — (AP) — The admiralty announced that a preliminary survey of the sunken submarine Affray, lying 288 feet down in the English channel, indicated that a very sudden disaster overtook the vessel.

The cause of the sinking, which killed 75 navy officers and men, is still a mystery. The submarine was reported missing during diving exercises on April 17, and no trace was found until this week. There were no survivors.

The naval diving ship Reclaim, which has been examining the submarine for the past two days, has returned to harbor because of tidal conditions, the admiralty said.
