### NEW CAR PRICES SLASHED

Los Angeles, Friday, July 20

Reversing the trend of steadily rising prices, Rootes Motors, British manufacturers of automobiles and largest importer of foreign cars into the United States, announced today, as a result of increased volume of sales in this country, the reduction in price of two of its cars.

The Hillman Minx, which is the largest selling imported car in America, and the Humber Hawk, which has been steadily growing in popularity, have been reduced in price by \$98 and \$200 respectively, according to a statement issued by Brian Rootes in Los Angeles this afternoon. Mr. Rootes is the regional director in the western hemisphere of the Rootes Group which manufactures, in addition to the two automobiles already mentioned, the Sunbeam Talbot, Commer commercial vehicles, Karrier municipal vehicles.

Effective immediately, the price of the Hillman Minx will be reduced from \$1597 to \$1499, while the Humber Hawk will now be priced at \$1997 as compared to \$2187 previously. Prices quoted are for sedan models delivered at coastal ports. Prices in the interior of the country are slightly greater. Heaters and radios are extra.

Rootes Motors started selling cars in North America following the end of World War II and today sell more cars in the United States than any other foreign car importer. In addition to the Hillman Minx, Humber Hawk, Sunbeam Talbot, Commer-Karrier vehicles which they manufacture, Rootes Motors are sole concessionaires in the United States for the Rover Car and for the Land-Rover all-purpose car.

Spare parts for their automobiles are stocked by over 500 dealers in North America, and large spare part depots have been strategically located in various parts of the country. (PD. ADV.)

The Oregon Insurance rating bureau recently communicated with Chief Mills and approved performance figures of the vehicle. The class A pumper sprayed an average of 1,008 gallons per minute in a two-hour test, with a 2-inch nozzle tip under 150 pounds of pump pressure, Chief Mills related. Engine revolutions per minute were 1586.

In the second test of one half hour, the pump delivered 723 gallons per minute with the engine revolving at 1421 RPMs and a pump pressure of 203 pounds, he said.

In the third test, also half an hour, 512 gallons were pumped per minute with a pump pressure of 253 pounds through a 1½-inch nozzle tip. Engine RPMs were 1471.

Testing engineers for the rating bureau were R. P. Gorman and H. E. Marqueling.

Suit Alleges Deceit In Timber Transaction

Contending they were deceived in the sale of \$12,000 worth of timber for \$750, Mr. and Mrs. Howard P. Bobb, Myrtle Creek, Thursday filed suit to recover the remaining \$11,250.

The complaint, filed in circuit court, claims that E. D. Heath, Myrtle Creek, defendant in the action, took advantage of the plaintiffs in misrepresenting the value of a parcel of timber land on South Myrtle creek, some ten miles east of the city of Myrtle Creek.

Heath, the complaint says, told the Bobbs the timber was of poor quality and small in amount and could only be logged in connection with other logging operations. He paid them \$750 for it, the complaint states.

The timber was later found to be worth some \$12,000, the complaint asserts.

### Truck Tax Referendum Petitions Criticized

PORTLAND — CP — Two state legislators think referendum petitions filed against a truck tax should be investigated.

Rep. Kenneth Kraemer and Sen. Richard Neubecker said that a trucking publication reported that 12,000 of the petitions' signatures were gathered by employees of Consolidated Freightways.

If this was done on company time, a law which prohibits payment for circulating petitions was violated, the legislators said.

The petitions suspended a tax bill which was passed by the recent legislature. The \$1,200,000 annual tax was to become effective next year. Now it will be referred to the voters in the 1952 general elections.

That grunt you hear is a sound of satisfaction. It's the sound of a happy Mercury owner—adding up his costs for gasoline, tires and depreciation, and comparing them with what he spent on his previous car. Economy tests show that a new, 3600-pound Mercury gets up to 72% better gas mileage than the average U.S. car! What's more, a Mercury is so lastingly built that 92% of all the Mercurys ever made are still on the highway! No wonder Mercury has gained the highest percentage of new owners of any car in America for over 5 straight years!
