ENLISTS IN NAVY

Norman Smith is now serving with the navy, taking training at San Diego, Calif. He enlisted Sept. 13. Smith is the son of Mr. and Mrs. Victor Smith, 937 Mill street. He was graduated from Roseburg Senior high in 1850 and attended Oregon State college last year.

Demo Chairman Boyle's Contacts With RFC Told

WASHINGTON - (P) - Former RFC Director William E. Willetts swore today that William Boyle Jr., contacted him three times about loan matters after becomng Democratic national chairman. Willett, who left the Reconstruction Finance corporation last May in a reorganization, testified be-fore senators investigating charges that Boyle brought political influ-ence to bear on operations of the

government loan agency.

Boyle has denied using any such

influence.

Willett told a senate investigations subcommittee he received telephone calls from Boyle arranging meetings for various persons. telephone calls from Boyle arranging meetings for various persons. One of these, he said, was on May 29, 1950, to arrange a meeting between Willett and two engineers for Thompson and Starett Co., which sought an assignment to survey properties of the Lustron Corp., of Columbus, Ohio, a big RFC borrower.

He said the firm did not get the job.

He described another call, Nov. 29, 1949, arranging an interview

Undaunted, she entered her work of art in the picture display. Her rug—er, picture—was made by clothe through sacking and the design and color is so subtle that from 10 feet it looks like an oil painting.

So what Oppened? She won a blue ribbon — for her picture.

Atom Bombs At Less Cost By ELTON C. FAY
WASHINGTON — (AP) — Can the U.S make atomic bombs in abundance and for only \$240,000 apiece instead of

the present multi-million dollar cost?

Senator Brien McMahon (D-Conn), top man in Congress on atomic affairs, says yes.

Atomic bottlenecks in materials, production, equipment

United States Can Produce

and design have been broken and the nation can now turn the weapons out in mass production at a cost less than that for a tank, says the senator. (The current price tag on a medium tank is \$240,047.)

tank, says the senator. (The current price tag on a medium tank is \$240,047.)

In a sneate speech Tuesday, McMahon said he wanted to report that:

"There is virtually no limit and no limiting factor upon the number of A-bombs which the United States can manufacture, given time and a decision to proceed allout."

The time he put at three years. If, said McMahon, the U, S. will provide this ample arsenal of atomic arms, there will be fewer foot soldiers needed; fewer old style artillery pieces and more guided missiles with atomic warheads; fewer flame-throwers and more radiological warfare; planes and submarines and aircraft carriers given unlimited range by atomic engines; ships firing guided missiles with atomic explosives and torpedoes which uncannily hunt down enemy ships.

What all this amounted to was a proposal that the American military break with tradition, relegate present weapons to secondary roles and rely on the new atomic fury for waging war.

Interest Displayed

The Pentagon displayed instant

New Mineral Usable

What about making atomic hombs in limitless quantity? Perhaps one vitally important material will be the thorium mentioned by Rep. Durham (D - NC), vice chairman of the senate-house atomic committee. Thorium in itself isn't fissionable and won't provide chain reaction, but it can be worked wth uranjum 235 to pro-

worked wth uranium 235 to produce U-233, an ingredient for bombs. Some thorium comes from sands in a few American states. Brazil has some. India has substantial resources.
