Included as a demand for a guarantee of 32 hours pay a week for 52 weeks, less unemployment compensation, for employees with more than three years' continuous service.

Sources close to Murray believe his demand for a guaranteed annual wage is one of the chief things he wants to win for its steelworkers before he steps out as president. Several months ago he was seriously ill and already has told associates to look around for a successor.

Improved incentive pay plans also are high on Murray's agenda.

How to make good telephone service even better....

faster long distance service can be yours, if you give the operator the out-of-town number you're calling—rather than just the name and address. That way, you see, you won't have to wait while she finds out the number from "Information" in the distant town you're calling.

You won't miss important calls if you're a good telephone neighbor

Your party-line neighbors will consider you a real friend if you remember that often, they, or someone in your family may be expecting an important incoming telephone call. These other simple points will also help to insure better service: When you have a series of calls to make, allow a few minutes between them • Replace the receiver properly after calling • Always make sure the line is clear before you make your calls.

it's always a good idea to keep a list of the local and out-of-town telephone numbers you call frequently. And keep your personal number list near the telephone, where it will be handy for the whole family to use.
