Does music have any meaning? Can it actually tell a story . . . or is it a telepathic means of communication which needs no explanation? There are different schools of thought on that subject. And as usual, with controversial issues, you see it from where you sit in your own way.

There is no doubt, though, that music can portray a mood . . . or give a feeling. It can show happiness, sadness, serenity or a soul-storm. The light, lyrical majors are definitely recognizable for their gaiety. And the sonorous, heavy minors give the definite feeling of sadness. But then again . . . whatever the individual hears in a certain piece of music . . . is the thing that is conveyed to him through it. And sometimes one man's happiness is another man's sadness. What music may appear happy to one might be minor and miserable to another.

There's one thing sure, though. There's music for EVERYBODY'S enjoyment . . . music for all tastes and all moods. Through it you can find the answers to a lot of questions.

If you have a question about what to select for Christmas giving this year, come in to see us. We have musical gifts for everybody on your list. Yes, everything from pianos and tape recorders to sheet music. Come in and browse around. There are friendly folks to help you at OTT & RICKETTS MUSIC STORE, 101-105 W. Cass St. Phone 3-3202.
