All parents, who give their youngsters music lessons, have similar problems. Boys will be boys. ALWAYS more interested in baseball and what other boys are doing. And little girls can always think up happier activity than practicing music. Parents must guide and discipline. . . set a regular schedule for practice. . . INSIST that it be followed. If you help your youngsters with their practice, credit each achievement with recognition, encourage note reading and allow them to play pieces that interest them, you'll have success. Just remember. . . NO child (in later years) has ever thanked his parents for allowing him to give up music. Yours will be no exception.

We want to thank all of you for your wonderful patronage and friendship of the past. We appreciate it sincerely and do our best to merit it. Best of luck to all of you in '52. . . from your friends at OTT & RICK-ETT'S MUSIC STORE, 101-105 W. Cass St. Phone 3-3202. (Paid advertisement)

### Economy Scores In Turkey Boned Before Cooking

VANCOUVER, Wash. (AP)—The wife who looks down her nose at hubby's cooking should be overjoyed at what a mere man found in some recent cookery tests.

It's this, says H. D. Colgin, Clark Junior College commercial cookery instructor:

Boned turkey is a lot easier on the pocketbook (if you dare to take away father's glorious moments of carvings).

One of the first full-scale tests got under way before the Christmas holiday feasting. After lots of study Ernest Aebi, president of the Associated Restaurants of Oregon, said he found that boning the bird before cooking produces about 40 per cent more salable meat.

And Eugene Allen, association secretary, chimed in: "It seems fabulous and too good to be true."

"It's this sort of thing that make

the alert restaurateur a prosperous man, and the unalert operator an ex-restaurateur."

What Test Disclosed  
Invading Colgin's cookery haunts (the Junior College's faculty dining room), the Chef de Cuisine Association tried out the startling discovery. After a snack or two and much serious thinking, testing and deliberating, the experts accepted Colgin's findings, which he said disclosed:

Roasting a boned turkey took a third the time that of a "regular" bird. Shrinkage was less. And a

20-pounder which cost \$1.89 ended up in 19 pounds of meat, at \$1.29 a pound.

But the other bird, a 20-pounder, roasted with the bone left in. Ah!—he wound up in only 6 pounds of meat, which cost \$1.78 a pound. Housewives were advised, of course, to try it out in home kitchens, to help beat the high cost of living.

But no one explained just how, for example: Just how would you go boning a turkey? Or preparing it for the oven? And how about the stuffing?
