SPOT ADVICE

GOOD SPOTTING equals GOOD CLEANING

Cleaning is no problem to us. We operate our own plant, and therefore we always make sure the solvents are fresh and potent, so they'll get the dirt out.

It's the stains that give you and us the headaches. HERE ARE SOME TIPS THAT MAY SAVE YOUR GARMENTS FOR YOU.

WOOLENS represent, perhaps, the major staining problem of all garments. Being an organic material, wool is extremely absorbent. Here are the major precautions to follow with the most common stains.

“TANNIN-LIKE STAINS”. All soft drinks, high balls, beer, ale, coffee or tea, fruit juices, catsup, mustard, and medicines produce what are known as “tannin-like” stains. In many cases, these stains remain invisible until heat is applied. Then a brown spot appears.

As an emergency measure, we recommend this. If any of the above fluids are spilled on a woolen garment of yours, SPONGE IT OUT WITH CLEAN, CLEAR WATER, NEVER USE SOAP, as many soaps contain alkali and “fix” the stains permanently.

But, if you didn't or couldn't sponge the stain out immediately, tell us and we'll attend to it before we clean your woolen garments in the standard way.

INK STAINS. Many inks are dyes and consequently extremely difficult to remove. Procedures for ridding your garment of ink stains are quite technical. You'd better not try it. Just call our attention to it and if it can be gotten out, we'll get it out for you.
