No Place for a Heavy Foot!

You'd find it out, in a mile or so, even if we failed to tell you. But we think it's best if we tell you now—

—you must treat the accelerator with special respect when you drive the Golden Anniversary Cadillac!

Down under the hood of this gorgeous car is the most powerful engine ever used in standard American production.

So take it easy—wherever you drive.

Don't use that power to bolt away when the light turns green—and other cars have their ways to make in the traffic lanes beside you. And never use it for unnecessary speed, or for dominating the highway.

Use it, instead, for the thing it was put there for—

—use it to give you that easy, floating, comforting ride which can come only when your engine is "loafing," and most of its power is in luxurious reserve—

—use it to give you that "shot ahead" when an opening shows in the traffic line—or when your safety calls for a blast of power—

—use it for a thrilling sense of mastery over car and time and space—

—use it, in short, for happiness and luxury—and for adding satisfaction to every mile you drive.

As you would expect, this amazing performance is but one of the wonderful virtues that have been added to the Golden Anniversary Cadillac.

There is marvelous new beauty—inside and outside. There is a wholly new type of power steering—available as optional equipment at extra cost. And there are literally scores of refinements and improvements of vital importance.

For its "year of years," Cadillac has certainly built its "car of cars."

Come in and see it—whether you feel you are ready for a Cadillac or not. It's an inspiration to inspect it—and an experience to drive it.

But if you do drive it, please remember—it's no place for a heavy foot!
