

# Edelweiss Picked As Name For Winter Sports Club

Edelweiss is a flower, and it is also the name of the newly created winter sports club in the Roseburg area.

After three weeks of trying, the club finally decided on a name and a few breaths later voted the incorporation of the club under the name of Edelweiss. The name was drawn from the Alpine flower pronounced Ayd-vice which grows only on the highest mountain levels. To distinguish the area, Lynpqua Basin will probably be emphasized across the symbol. Thus, it will be the Edelweiss S K I Club.

The third club meeting was highlighted by the presence of George Korn, owner-operator of the Willamette Ski area. He pronounced Roseburg club as one of the growing organizations of Oregon and advised the club to obtain a ski area as soon as possible. He reported that the Willamette area had been formed as a result of the opening of a third cross-state highway. He stated that the Roseburg area would probably soon have access to such a highway, but because of high interest, an area close to Roseburg should be secured immediately.

**Called Group Active**

He called the Roseburg group one of the most active new groups in the state because of its apparent interest in the sport. He said Roseburg skiers have put Willamette Pass on the map because of their first turns in the Eugene area. He also advised the group to join the Pacific Northwest Ski Association as soon as possible to take advantage of the information the re-

gional club can offer. He stated, the PNSA released information and aid in clearing data in Northwest ski circles and formation of new clubs.

He warned the club should be named in order to cover both winter and summer sports. He included water skiing and mountain climbing as the two major summer sports to be considered in order to eliminate the necessity of additional clubs.

The club postponed further investigation of the Taft Mountain and Red Butte area until the roads could be opened after recent snows. When the areas become again accessible, a preliminary investigating group will be followed by a wholesale investigation of the area by the entire club.

Other business was the voting of the heads of the standing commit-

tees to the executive board. They will join the currently reigning officers on the committee.

**Fire Fails To Drive Boy From TV Set**

AUDUBON, N. J. — William Wright, 8, likes his television. He stayed home from school Monday because he had a cold. When his mother went out to a parent teachers meeting William took up a seat by the TV set.

While watching a program he smelled smoke and found a fire in the attic. He called the fire department and returned to watch the end of the program.

Firemen saved some furniture as the interior of the house was destroyed. They had to lead William away from the TV set.

**Hermiston Fire Razes 3 Stores**

HERMISTON — Fire destroyed three stores housed in the Burnham Building here early Wednesday.

By 8 a.m., after firemen from the city, rural and ordinance departments had fought the flames four hours, only the concrete walls remained standing.

There was no official loss estimate but businessmen familiar with the operations said the figure probably was around \$200,000. Bruce Givens, manager of Burnham's Drygoods Store, one of those wiped out, said he had no insurance. It was reported insurance coverage on the rest of the loss was small.

In addition to the drygoods store, the Tot Shop and Cap's Donut and Candy Shop were burned out. Western Union and the bus depot were housed in the candy shop.

None of the contents of the building, erected in 1947, were saved.

Fire Chief Bob Russell said the fire started near the furnace room at about 4 a.m.

**Thief Offers Suitcase For O—To A Detective**

CHICAGO — "I'll sell you this \$94 suitcase for just \$5," James Groner, 33, told a passer-by, Peter Rendek, as he walked in South State Street Tuesday. Rendek didn't stop and Groner called, "I'll let you have it for \$2—for even \$1."

As Rendek, a detective, stopped at the corner and opened the police telephone box, Groner pleaded, "I'll give it to you for nothing."

Groner was taken to Central Police Station. The suitcase was returned to a State Street department store where Groner, police said, had stolen it. Groner was held without charge.

**Flu 'Medicine' Brew Leads To Liquor Charge**

NOBLESVILLE, Ind. — A 39-year-old factory worker's efforts to combat the influenza epidemic didn't get much sympathy from state police.

Jesse Carter told the police he was making "flu medicine" in five-gallon cans, copper tubing and 50-gallon wooden drums they confiscated at his cabin Wednesday.

Two gallons of the "medicine" they also confiscated, tested 80 proof. They charged Carter with possessing untaxed liquor and with owning a still.

**Ban On Mexican Cattle To End**

WASHINGTON — The United States announced Wednesday it plans to lift a ban against cattle, sheep, swine and other ruminants and livestock products from Mexico by Sept. 1.

The embargo was put into effect in December, 1946, when an epidemic of foot-and-mouth disease broke out there.

Plans for removing it were disclosed in a joint statement issued by Secretary of Agriculture Brannan and President Miguel Aleman of Mexico.

The embargo will be lifted providing there is no new outbreak of the dread animal disease in the meantime.

This announcement came only about two weeks after the United States had closed the Canadian border to livestock and livestock products because of outbreak of the disease near Regina, Saskatchewan.

The disease also exists in much of Europe, Asia and in parts of South America.

# Inventor Plans 'Moon' To Meet Iron Curtain Ban

By HOWARD W. BLAKESLEE Associated Press Science Editor

HUNTSVILLE, Ala. — There will be no Iron Curtain anywhere if the vision of the maker of the terrible V-2 German guided rocket that bombarded England from Holland comes true.

The vision is a military space station, a tiny, man-made moon, 1,075 miles up, which each day will see every square mile of the earth's inhabited surface, and the people moving around as clearly as from an airplane at 5,000 feet.

The dreamer is Professor Werner Von Braun, the youthful German genius who made the seemingly impossible V-2, and who now at 39 feels that the military satellite is possible. He lives here and is taking American citizenship papers.

The military satellite will circle the earth once every two hours. It will circle from north to south, at nearly right angles to the earth's rotation. It's orbit is fixed, with the earth rotating eastward below.

Thus if it comes down over New York City at 10:00 a.m., it will be on its next circuit down from the north somewhere over Denver and the West Coast.

**Two Views of Everything**

In 24 hours it will see everything on the earth by daylight. And also it will come up each trip on the opposite side for a night view by radar. This will give it two looks a day at everything.

The satellite will carry a telescope, through which you can see a strip of earth more than a thousand miles wide as clearly as if you were only 5,000 feet away.

Looking down you can see far better than looking up, from earth's surface. If you want to see why, try looking through thin tissue paper at a printed page a foot behind the paper. You see no letters.

But lay the tissue on the page and you can read it. For the watcher on the satellite our air is the tissue paper, and it is in contact with the earth.

A murrelet, ancient species of small water bird that lives in the far north, was recently found near Bend, Ore. It was the first of the species ever to be reported alive in Oregon.
