Electric Storm, Hail Lash California Areas

SAN FRANCISCO — Given an advance fanfare of thunder, lightning and hail, a mild storm moved toward Northern California from off the Pacific Thursday. Showers were forecast both for the valleys and the Sierra.

Lightning Wednesday night gouged a hole in the ceiling of the R. J. Carls home in Campbell, near San Jose, and wrecked a television set.

In the same area, a lightning bolt just missed the old city hall at Los Gatos and ripped a redwood tree 75 yards away. The bolt singed the face of a passerby, John Silva. Hail as big as marbles fell in Sunnyvale for 10 minutes.

The storm knocked out several Pacific Gas and Electric transformers in Santa Clara County. The big thunderclaps rattled windows in Burlingame to Redwood City.

Ahead—the Nicest Miles in the World!

Well, the day has come! You have your beautiful Golden Anniversary Cadillac—and are off on that cross-country journey you've so eagerly awaited.

You're full of hope and anticipation—but almost afraid it's too good to be true. Can any car perform and handle the way people say this one does?

You come to the end of the street that opens into the crosstown thoroughfare—and the big, easy-acting brakes settle you down to the softest, smoothest stop you ever experienced in all your life.

You touch the throttle, and the great engine starts you out like the flight of an arrow—smoothly and swiftly and quietly.

Almost before you know it, a light turns red—and, once again, that easy, velvety stop. And then the green—and again that swift, eager move into action.

Stop and go—red and green . . . and pretty soon it dawns upon you that you never dreamed of driving a car that handled and performed like this.

Wonderful in city traffic—no doubt about it!

And then the cars thin out about you—the traffic lights stretch farther and farther apart—and you find yourself on the open road.

Instinctively, your foot goes down on the throttle; but, quickly, it eases up again. For you find yourself really rolling in a couple of hundred feet! So you do a little experimenting until you find the spot where the accelerator belongs for sane and sensible driving—and then you settle back and relax.

You scarcely seem to be moving at all. You handle the wheel with the weight of your hand. You're comfortable—resting—at peace with the highway! The sun rises higher and the road beckons on.

"Where did we plan on stopping tonight?"
"Better take a look at the map and see what's on down the line. We're going to get a lot farther than I ever dreamed we could!"

Yes, it's true what they say about Cadillac.
Better come in and see it—and drive it—while you're in the mood!
