You'll save time if you make
a personal number list for the whole family

When you've a hurry-up call to make... or just for day-to-day convenience in making telephone calls... you'll find a list of the numbers you call most often can be a helpful aid to faster service. And because memory often plays tricks, you'll find your personal number list will help you to avoid calling wrong numbers, and save you time when you can't quite recall the number of a friend. If you'd like to keep your number list in a handy, personal directory, just call, send a postcard, or drop in to your nearest Pacific Telephone business office. We'll be glad to give you a free special number booklet.

faster long distance service
can be yours, if you give the operator the out-of-town number you're calling rather than just the name and address. That way, you won't have to wait while she gets the number from "Information" in the distant town. So, add out-of-town numbers to your personal list, too.

a tip to the youngsters
is to remind them that no one can call them while they have the line tied up with lengthy conversations. And being considerate telephone users means that they... and you... won't risk missing important incoming calls!
