Eastern States Offered No Rain To Battle Fires

By The Associated Press

A mass of dry air covered the eastern half of the nation again Friday, indicating no immediate rain to halt the ever-spreading fires which are burning over millions of acres of wooded areas.

The damage from the flames which have whipped over rich timberlands in more than a score of states mounted into the millions of dollars. The situation in some areas was regarded as serious.

Damage from the fires in several states was estimated at more than a million dollars each, with Louisiana reporting damages to forests at two million dollars. The worst fires in history have swept Tennessee woodlands and officials have not estimated the damage. In Illinois, Indiana and Mississippi, the damage soared to an estimated one million dollars in each state, with fires still raging.

In Missouri, Gov. Forrest Smith said the situation in some areas was critical. Several farm houses were destroyed near Clinton, yesterday when a field fire roared out of control. In Joplin, a grass fire spread across two square miles, destroying several homes, and other buildings. It was brought under control after threatening 150 homes. Smith said the damage from the blazes would run into the millions.

London Bookie Quotes U.S. Race At Slim Odds

LONDON (AP) — A big London bookie rated the American presidential election a neck-and-neck race Friday.

Bookmaker Douglas "Always Pays" Stuart set his odds at 4 to 5 and pick your candidate—that is you put up five dollars to win four.

Bets were still coming pretty fast, his spokesman said, "with not the slightest sign of a lean toward either candidate."

These leading Oregonians have studied milk from every angle. They say VOTE YES on milk

All of these people, because of their official positions, have been required to dig deeply into the milk issue that now confronts Oregon voters.

They represent both consumers and producers. They have studied every angle. It is their considered judgment that milk reform will be good for both the farmer and the public.

It will remove restrictions that now thin down our naturally rich milk supply. (Oregon dairy herds are 80% of Jersey and Guernsey breeding—the rich milk breeds).

It will stop price domination by those who profit by wholesale and retail price protection

It will free our milk markets, which are now artificially limited while millions of gallons of wholesome milk from tested herds are not allowed on the Grade A market.

This milk issue has NOTHING to do with sanitation. Sanitary laws are enforced by city and state health authorities and are not affected by milk control.

If in doubt, be guided by the judgment of these conscientious citizens who really know the facts.
