Immediately upon completion of service by publication of the above described warrants, if the delinquent taxes and interest and cost of service shall not have been paid, each such warrant or a duplicate thereof will be filed by the tax collector with the county clerk for entry in the judgement docket of Douglas County.

The amount of each warrant when docketed, together with added cost charges, will become a lien upon the title of any interest in real property owned by the person against whom the warrant is issued, and the taxes on personal property embraced in such warrant, with interest, penalties and costs applicable thereto, will continue as a lien on all personal property of the person assessed as otherwise provided by law. The effect will be the same as though the people of the county had recovered judgement against the person charged for the full amount of the delinquent taxes covered by the warrant, together with interest thereon and costs as provided by law.

Services of publication of this notice is made by four consecutive weekly publications thereof in the Roseburg News-Review, a newspaper of general circulation in Douglas County, pursuant to the order of the Douglas County Court, dated January 14, 1953.

Date of first publication of this notice February 14, 1953  
Date of last publication of this notice March 7, 1953

C. W. BAIRD Sr.  
County Sheriff & Tax Collector  
for Douglas County, Oregon  
ROBERT M. STULTS  
District Attorney for Douglas County, Oregon

### LEGAL

#### NOTICE OF FINAL SETTLEMENT

NOTICE is hereby given, that Monday, March 16, 1953, at 10 o'clock A. M. in the County Court Room, in the Court House in Roseburg, Oregon, will be heard by order of the County Court for Douglas County, Oregon, as the time and place of hearing objections, if any there be, to the Final Account filed by the undersigned, administrator of the Estate of Mazie C. More, deceased.

ROBERT W. HOLLOWAY, Administrator Estate of Mazie C. More

#### NOTICE TO CREDITORS

All persons having claims against the estate of King Carlisle, deceased, now pending in the County Court of Douglas County, Oregon, are hereby notified to present the same, properly verified, to R. L. Whipple, Attorney at Law, U. S. National Bank Building, Roseburg, Oregon, within six months from the date of this notice, which is January 24, 1953.

BERTHA CARLISLE  
Administratrix of the Estate of King Carlisle, Deceased.

### Secrecy Shrouds Meeting Of United Nations Allies

UNITED NATIONS, N. Y. — The United States told its U. N. Allies Thursday about future diplomatic steps planned for dealing with the Korean War, but insisted on public secrecy about them.

Chief U. S. Delegate Henry Cabot Lodge, Jr., after an hour's conference with representatives of 13 countries who have sent troops to Korea, told newsmen "actions will be brief louder than words."

In a special statement, Lodge said: "We have shown by our actions we really believe in the principle of collective security. We counseled today on steps to take in the future."

### Too Old, Ruth Elder's Husband Tells Her

LOS ANGELES — Ruth Elder, who failed in 1927 in her attempt to fly the Atlantic, has obtained a divorce from her sixth husband, Ralph King.

"He said I was too old for him—that he wanted a young chick," she testified Thursday. "He called me a gray-haired old bag."

### Soap Co. Takes Unwanted Whale

SAN FRANCISCO — A six-ton dead (right) whale washed onto San Francisco's Ocean Beach Wednesday night was carted away yesterday—much to the relief of sensitive-nosed residents and sundry authorities who disclaimed responsibility for the carcass.

The decaying whale was spotted by the police, and the Society for the Linnaean. Police said it was outside their jurisdiction, the Coast Guard said it was on shore and therefore not theirs, the Public Health Department agreed with the police, and the Society for the Prevention of Cruelty to Animals and the State Fish and Game Department indicated they were interested only in live whales.

In desperation, police suggested letting Norman handle the problem on the basis of "finder's keepers."

But late Thursday, the Royal Tallow and Soap Company appeared with a crane and hauled off the whale to reduce it to grease, tallow and fertilizer.

### Dodge Heir Again Weds, This Time To Actress

PALM BEACH, Fla. — Actress Gregg Sherwood became the fifth wife of Horace E. Dodge II, wealthy member of the automobile family, in a ceremony Friday at the Palm Beach home of Dodge's mother.

It was the second marriage for Mr. Sherwood, who gave her name as Dora Mae Fielstad and her age as 29 in the license application. Dodge is 52.

### SEPARATE

HOLLYWOOD — Guy Madison and Gail Russell of the movies have announced a temporary separation but say they don't plan a divorce.

### Costly Well Drilled On Big Illinois Farm

GRANVILLE, Ill. — A Putnam County man says he's spending \$20,000 to drill a water well on his farm, making it one of the most expensive wells on an Illinois farm.

V. C. Hartman, hired a driller team when the oil well on his property filled with sand. The team drilled 1,700 feet to strike a vein of water in sand rock.

The new well, now nearing completion, required 500 bags of cement used to make concrete to pour around the pipes. In addition, 10,000 gallons of water were hauled two miles from Granville to the farm to make the concrete. There are 14-inch pipes for a depth of 180 feet, 200 feet of 10-inch pipe and 600 feet of eight-inch pipe.

### Britain Plans Record Spending For Defense

LONDON — Prime Minister Churchill's government announced Thursday it expects to spend 1,636,769,000 pounds (\$4,585,728,000) on defense in the 1953-54 budget year.

This is a record level for Britain in peacetime.

A white paper giving the figures said the estimates include 140 million pounds (192 million dollars) of defense support aid provided in dollars by the United States.

### Cigarette Sales Heavy In Portland Stores

PORTLAND — Cigarette sales were reported unusually heavy here as well as elsewhere in the country in anticipation of an end to price ceilings.

The Fred Meyer stores' tobacco merchandiser said customer buy-ins were "very heavy" Wednesday. When ceilings go off, the retail price may go up 2 cents a package, retailers reported.

### Workers Ruled Right To Picket Co-Op Plant

OREGON CITY — Workers have a right to picket the Milwaukee Plywood & Door, Inc., plant at Milwaukee because there is a legitimate labor dispute, Circuit Judge Ralph Holman ruled Thursday.

He refused to issue a temporary injunction against picketing of the plant, which began Feb. 11 after the mill was sold to the co-operative by Western Door & Plywood.

The AFL-Millmen's Union said large-scale layoffs resulted when co-op members took over jobs from union workers.

## Prineville Men Again Apply For Milk Right

PRINEVILLE — Four Prineville men Thursday accused the State Milk Marketing Administration of arbitrary conduct in denying their application to open a new dairy in Crook County.

They applied again and demanded that a public hearing be held by the milk board in Prineville.

The applicants, Leslie Clauson and James Frakes, dairymen, and Lester Moon and Travis Allen, creamery workers, conferred with the milk board in Portland last week, and said later that the board denied their application.

Furthermore, the milk administration said their Portland appearance was a waiver of their right to a public hearing in Crook County, the applicants said.

They protested this and requested a public hearing here, where consumer witnesses could be heard.

In the Portland meeting, milk officials disclosed a report that a Prineville creamery, then the only one in business in Prineville, had added powdered milk to stretch its milk.

The applicants protested that the milk administration made it appear that this report came from them. Actually the report was made by a Central Oregon field inspector of the State Department of Agriculture, they said.

At Portland, Thomas Ohlsen, milk marketing administrator, said the Prineville men's application had been received, but that no action would be taken until the state Division of Foods and Dairies completes an investigation of the Prineville Creamery.

Ohlsen said it would be up to the board to decide, after that, whether or not to call a hearing in Prineville.

## Visit To Volcano Is Planned By Head Of Parks

ANCHORAGE, Alaska — The National Park Service's Alaska superintendent and two companions planned a daring observation trip Thursday into the valley of Ten Thousand Smokes, after three days of great volcanic eruptions last weekend.

Grant Pearson, veteran of 30 years service in the territory, Ray Peterson, president of the Northern Consolidated Airlines, and John Walotka, a resident of the area 15 years, planned to fly in with a light plane and set up a base camp.

The eruptions were apparently subsiding, Navy fliers said, but a half-mile wide stream of lava was reported sighted boiling down one mountain side Wednesday. The Valley was also still covered with a gray blanket of volcanic ash.

Pearson said the camp would be set up at Brooks Lake, on the floor of the valley only 20 miles from the craters of Mt. Trident, Nova Ruppia and Katmai, three of the most spectacular of the volcanoes.

Patrol plane crewmen said smoke was belching through fissures along the entire floor of the valley.

## Increase Board For NLRB To 9 Is New Proposal

WASHINGTON — Rep. Kearns (R-Pa) came up Thursday with a proposal to increase the membership of the National Labor Relations Board from five to nine members.

Sen. Taft (R-Ohio), majority leader and co-author of the Taft-Hartley Labor Law, has called for upping the NLRB membership from five, as it is at present, to seven.

The CIO has expressed "strong disapproval" of this idea, contending it would put the board into partisan politics.

Kearns' proposal was offered to a House labor committee, which is holding extensive hearings on amendments to the Taft-Hartley Law.

Secretary of Labor Durkin announced Wednesday he has chosen a 15-member advisory group to draft the Labor Department's recommendations for changes in the law.

Durkin said his 15-member advisory board would be made up of labor, management and public representatives. The secretary will act as chairman.

## California Bus Crash Kills 6 Farm Workers

BRAWLEY, Calif. — A Southern Pacific train crashed into a bus loaded with farm workers of Mexican descent Thursday and Police Chief Joe Gabard said six were killed.

Gabard said 12 persons were taken to Pioneer Memorial Hospital here, six of them in critical condition.

A witness, James Bynum, said the collision sent a "streak of fire 50 feet along the railroad tracks. The bus was carried 150 yards and was crumpled and twisted into debris.

SINGAPORE — The Singapore government warned Friday it would punish any person shipping supplies to the Finnish tanker Wiina, anchored 20 miles out, without an export permit.

The tanker, carrying 7,000 tons of strategic jet fuel originally consigned to Red China, has been anchored outside the territorial waters of this free port since Feb. 11, even though authorities declare it runs no risk of seizure if it comes in.

BRIDGEWORK — Douglas County crews meet the challenge of progress with the installation of modern metal sheeting on the Oak St. Bridge to replace the hogwire which was formerly used for protective purposes. (Picture by Paul Jenkins.)

## Payroll Padding Costs Millions, Reports Prove

WASHINGTON — Investigating senators reported Thursday that "payroll padding by racketeers and local politicians at a New Jersey waterfront" added millions of dollars to this nation's airbase building program in North Africa.

The report, filed by a committee headed by Sen. Lyndon B. Johnson (D-Tex.), described what it called "unsavory" conditions at the Claremont Terminal in Jersey City, N. J.

Johnson said the report was delayed until now to enable the New York City Anti-Crime Committee to complete its investigations of racketeering in the waterfronts.

A Senate committee is scheduled to hold hearings soon on alleged crookedness on the waterfronts.

The Senate preparedness subcommittee, which Johnson headed in the old Congress, reported that Dade Brothers, a waterfront operator, obtained a blanket contract to handle shipments of all materials needed for the rush airbase projects in North Africa.

It said this contract spiraled from an original \$150,000 job upward until the waterfront firm asked nearly nine million dollars.

When Senate investigators working with other crime investigating bodies discovered payroll padding and ex-criminals hiring waterfront workers, the contract was canceled, the report said.

## Pirate's Treasure

Any romantic pirate would gladly walk the plank for Joanne Andrinne, who's appropriately dressed (?) for the annual pirate "invasion" of Tampa, Florida.

## Is Questioned Vatican Diplomat Is Questioned

DUBLIN, Ireland — An American author charges that Roman O'Hara's service as Vatican diplomatic representative to Ireland violates the McCarran Act forbidding U. S. Citizens to serve a foreign power. The Vatican Wednesday denied it.

Paul Blanchard, author of books criticizing Roman Catholic influence in America, filed a petition with the U. S. embassy here asking Washington to revoke O'Hara's citizenship. The embassy declined to comment.

In Washington, a State Department spokesman said the department has asked the Dublin embassy to forward the papers on the matter to Washington for handling. He added he didn't know what provision of the McCarran Act Blanchard was citing but that O'Hara "is a native of America and has traveled back and forth on a passport for years as papal nuncio."

## Portlander's Condition Fair After Shooting

PORTLAND — Joe Bettig, about 70, in fair condition in a hospital here, told police he was shot in a fight with another man Thursday over a woman named Grace.

Police Sgt. Bard Purcell said Henry Sigrist, 61, admitted shooting Bettig on a downtown street, but said he feared Bettig was going to beat him up.

Bettig, shot twice, continued to chase Sigrist a block before a third bullet brought him down, witnesses said.

Sigrist was jailed under \$5,000 bond.

## Singapore Warns Aid To Finnish Tanker

SINGAPORE — The Singapore government warned Friday it would punish any person shipping supplies to the Finnish tanker Wiina, anchored 20 miles out, without an export permit.

The tanker, carrying 7,000 tons of strategic jet fuel originally consigned to Red China, has been anchored outside the territorial waters of this free port since Feb. 11, even though authorities declare it runs no risk of seizure if it comes in.

## PLEADS INNOCENT

BOMBAY, India — R. K. Karanjia, editor of the pro-Communist magazine Blitz, pleaded innocent Tuesday to charges of forging a letter under the signature of U. S. Ambassador Chester Bowles.

The charges resulted from the publication of a letter purported to be from Bowles, according to the State Resolutions Committee. It has not been passed by either House yet.

## Testimony Slows Pace Of Hearing On Natural Gas

WASHINGTON — Complicated geological testimony Wednesday slowed the pace of a power commission hearing on applications for authority to pipe natural gas to the Pacific Northwest.

Stanley Bendorf, geological witness for Pacific Northwest Pipe Line Corp., Houston, Tex., detailed his reasons for extending the probable gas producing area of the San Juan Basin fields of New Mexico and Colorado.

It is from this basin that Pacific Northwest proposes to pipe gas over a 1,400-mile line to Bellingham, Wash. It is the only one of five applicants that proposes to use American gas. The others would tap supplies in Canada.

Bendorf has testified that Pacific Northwest has a three-trillion cubic foot gas supply in the San Juan Basin. The amount is sufficient, according to Bendorf, to supply the Northwest for 27 years — based on an estimated daily consumption of 300 million cubic feet by the third year of operation.

Binford Arney, counsel for Pacific Northwest, repeatedly objected to the frequent interruptions of Bendorf's testimony by counsel for rival applicants. They contended their questions were essential as a base for later cross-examination.

## Strategy Meet Called By Lodge

UNITED NATIONS, N. Y. — Ambassador Henry Cabot Lodge Jr., Wednesday called a strategy conference of the U. N. Allies in Korea, apparently to discuss plans for the U. N. Assembly meeting next Tuesday.

Bids went out from the U. S. delegation to representatives of every country with fighting forces in Korea to meet in Lodge's office at 11 a. m. Thursday.

India, which has only a medical unit with the U. N. forces in Korea, was not invited.

The American delegation had no immediate comment on the meeting or its purpose.

Some diplomats commented that discussions on Korea were long overdue. They have been grumbling that the U. S. was taking too long to inform its Allies of its plans for the Assembly, at which Korea will be the top issue.

## British Oust Argentines For Antarctic Control

LONDON — The long-standing international contest over control of the Antarctic was stirred anew Friday by Britain's announcement that it has ousted an Argentine party from Deception Island, in the disputed Falklands, and ripped down Argentine and Chilean buildings there.

The British have maintained a weather station on the barren nine-mile-wide island for 10 years, but their claims to the region have been challenged by the two South American countries. Both of the latter claim sovereignty over all territory between their southern borders and the South Pole. Britain rules the island group as a crown colony.

## Youth In Iron Lung Registers For Draft

PORTLAND — An 18-year-old Oregon City High School senior was registered for the draft Thursday at a hospital where he is confined to an iron lung with polio.

Elmer A. Whitteker was 18 on Friday, Feb. 13. Aware that under the law he was required to register for the draft within five days, he notified his board he couldn't comply. Selective Service headquarters sent Mrs. B. C. Youngren, a clerk, to him and the registration was completed.

Airmen Running Out Of Targets In North Korea

## Representative Wishes He'd Stayed At Home

SALEM — Rep. Mark Hatfield, the boyish university professor from Salem, made a call on the Elections Committee of the august Senate Wednesday, and now he wishes he hadn't.

"I'm going to go see the committee and pry my bill off the table even if I have to use a jack," said Hatfield as he departed for the Senate side of the Capitol.

He was referring to his House-passed bill to require candidates, who file by petition for delegates, to national party conventions, to sign pledges that they would support the winners of the state's presidential primary.

The Senate Elections Committee tabled it a few days ago. That means the committee buried it.

So Hatfield went to see the committee, which not only kept Hatfield's bill in its grave, but also changed another Hatfield bill that it had previously approved.

This other bill, as passed by the House, would let persons whose names are entered in the state presidential primary withdraw their candidacies when their names are filed against their wishes.

The Senate committee changed it so that any candidate for president could withdraw in Oregon.

## Duties On Briar Pipes To Get Special Study

WASHINGTON — President Eisenhower Wednesday asked the Tariff Commission to make a further study of import duties on low-priced briar pipes. He deferred action on its recommendation that the duties be hiked.

The case, while of little economic consequence in itself, it attracting wide attention because the handling of it could have far-reaching implications as to tariff policies of the Eisenhower administration.

The general significance of the pipe case is due to a provision in the basic tariff law permitting American manufacturers to ask higher duties on competing imported products if their industry is being seriously injured.

In this instance, a rise in the import duty on pipes might lead to a flood of applications for increased duties on other commodities.

## 'Cup Size' Atomic Bomb Explosions Are Denied

WASHINGTON — Swift denial of a rumor that "cup size" atomic bombs were dropped recently in tests in Northern Minnesota came Thursday night from the Atomic Energy Commission (AEC).

U. S. atomic tests on this continent are conducted only at the proving grounds in Nevada, commission officials said. A spokesman for the Civil Defense Administration said that agency had no information on any Minnesota tests. The Air Force, which presumably would take part in any such tests, had no comment.

## Columbus Day Won't Become Legal Holiday

SALEM — Senate Democrats gave up Tuesday in their attempt to have Columbus Day declared a legal holiday.

They introduced a bill calling for observances in schools on Columbus Day. They announced that this bill is a substitute for an earlier measure which would have made it a legal holiday.

LIMITS BARBITURATES

SALEM — A bill to prevent the sale of barbiturates without prescriptions was passed by the House Wednesday and sent to the Senate.

The bill also would prevent refilling of the prescriptions without doctor's orders.

## Airmen Running Out Of Targets In North Korea

SEOUL — Allied airmen said Thursday they are hitting the Communists where it hurts—but are running out of lucrative targets in North Korea.

The Air Force lets the Reds rebuild their shattered war plants, then sends its pilots back to knock them down again.

Savage trip-hammer blows by nearly 600 Allied fighter-bombers Wednesday and Thursday ravaged a Communist tank and infantry training center near Pyongyang, Lt. Col. Brad Evans of Palo Alto, Calif., said "there's a scarcity of lucrative targets" and "in many cases we have to wait for the Communists to build them up."

"We let the enemy expand maximum labor and money to rebuild these areas, then we hit them," He referred specifically to industrial targets and troop and supply buildup areas.

As for rail lines, roads, trucks and similar targets, Evans said, "we have to go back all the time and keep hitting them. There will always be those kinds of targets. The enemy is always trying to bring up supplies."

The spokesman said the Reds have no usable airfields in North Korea because "we keep them knocked out."

## Payroll Padding Costs Millions, Reports Prove

WASHINGTON — Investigating senators reported Thursday that "payroll padding by racketeers and local politicians at a New Jersey waterfront" added millions of dollars to this nation's airbase building program in North Africa.

The report, filed by a committee headed by Sen. Lyndon B. Johnson (D-Tex.), described what it called "unsavory" conditions at the Claremont Terminal in Jersey City, N. J.

Johnson said the report was delayed until now to enable the New York City Anti-Crime Committee to complete its investigations of racketeering in the waterfronts.

A Senate committee is scheduled to hold hearings soon on alleged crookedness on the waterfronts.

The Senate preparedness subcommittee, which Johnson headed in the old Congress, reported that Dade Brothers, a waterfront operator, obtained a blanket contract to handle shipments of all materials needed for the rush airbase projects in North Africa.

It said this contract spiraled from an original \$150,000 job upward until the waterfront firm asked nearly nine million dollars.

When Senate investigators working with other crime investigating bodies discovered payroll padding and ex-criminals hiring waterfront workers, the contract was canceled, the report said.

## Testimony Slows Pace Of Hearing On Natural Gas

WASHINGTON — Complicated geological testimony Wednesday slowed the pace of a power commission hearing on applications for authority to pipe natural gas to the Pacific Northwest.

Stanley Bendorf, geological witness for Pacific Northwest Pipe Line Corp., Houston, Tex., detailed his reasons for extending
