Rock, Slide or Slip?  
FASTEETH, an improved powder to be sprinkled on upper or lower plates, holds false teeth more firmly in place. Do not slide, slip or rock. No gummy, sticky taste or feeling. FAS-TEETH is alkaline (non-acid). Does not check "plate odor" (denture breath). Get FASTEETH at any drug counter.

## '54 FORD the "worth more" car declares a dividend

### Here Tomorrow!

### 3 distinctive lines — 14 brilliant body styles

You just ought to try the '54 Ford... the car that brings a whole new set of value features to the low-price field. You'll find that each new feature is an extra dividend in driving enjoyment. And each new dividend establishes Ford, even more in '54, as the "Worth More" car.

You get a special dividend in styling, for example, with Ford's distinctive new appearance... smooth, clean lines. You get sparkling new interiors, too, that are a dividend in themselves. And each of the new Fords gives you special dividends in ride and performance... with new Ball-Joint Front Suspension, the greatest advance in chassis design in 20 years... with your choice of Ford's new low-friction Y-block V-8 or I-block Six, the most modern engines in any car today!

With 28 brilliant new models to choose from, you'll find the exact car to suit your tastes and requirements. Come in and see the '54 Ford. Test Drive it. Once you try it, you'll want to drive it home.

**Plus five optional power assists\* you might find only in America's costliest cars**

**Master-Guide Power Steering**  
It does up to 75% of your steering work for you, when you need it... makes parking a pleasure. Yet it leaves you with the normal feel of steering on straightaways. In addition, it cushions out steering wheel "shock" on rough roads.

**Swift Sure Power Brakes**  
Power does up to one-third of the work of stopping for you! You are more relaxed in the stop and go driving of congested traffic. And should the system ever lose its power, "stepping" effort is the same as with conventional brakes.

**Power-Lift Windows**  
Smooth, silent electric power opens or closes windows at the touch of a button. There's a master control beside driver plus an individual control under each window. You may operate any of the Power-Lift Windows safely while driving.

**4-Way Power Seat**  
Push one of two controls and front seat goes up or down... push the other and it goes front or back. It's a real convenience when different people have to drive... or when you want to change position to relieve fatigue or avoid sun glare.

**Fordomatic Drive**  
It combines the best in "automatic" engineering to give you the most versatile automatic shifting. You get the smoothness of a fluid torque converter, the "go" of an automatic intermediate gear. Ford also offers gas-saving Overdrive.

**The greatest engine advances since the original FORD V-8**

TWENTY-TWO YEARS AGO Ford introduced to the low-price field a fine-quality precision-engineered V-8 engine. And now, with its 22 years' experience in building over 13,000,000 V-8's, it is only logical that Ford is first in its field to introduce a brand new type of V-8—the Y-block V-8... together with the most modern Six in the industry—the new and advanced I-block Six.

Both new 1954 Ford engines have overhead valves for most efficient high-compression operation on today's fuels. Both engines have a

deep-cast block with skirt that extends well below the crankshaft for greater strength and rigidity... smoother, quieter performance and extra-long engine life. Their modern short-stroke, low-friction design cuts friction losses... gives you more usable horsepower, more miles per gallon of gasoline. And new high-turbulence combustion chambers assure more efficient firing of fuel.

Plan to Test Drive a '54 Ford. You'll find these new Ford power plants stand out as the greatest engine advances since the original Ford V-8.
