

Doctor Thrives On Milk, Juice

SASKATOON, Sask. (AP)—Dr. D. L. Gibson says he hasn't felt so "perky" in years—after a 24-day demonstration diet of three quarts of milk and four ounces of orange juice daily.

He also took one iron tablet every five days.

Dr. Gibson, head of the University of Saskatchewan's dairy science department, told his students milk was an almost-perfect food. When they scoffed, he collected 25 cents from each one to finance the experiment and embarked on the diet March 15.

His chief inconvenience, he found, came in rearranging his feeding times. He digested the liquids so rapidly he got hungry every two hours.

When the experiment ended his physician, Dr. Glen Kinsman, examined him and said Gibson's

health was better than at any time during the eight years he's known him.

Gibson gained three pounds. All that juice added up to about 2,900 calories, more than a plenty for a sedentary worker.

Polio Vaccine Program To Be Used On Monkeys

OAKLAND, Calif. (AP)—A Transoceanic airlines plane left Monday for Savannah, Ga., with 1,903 monkeys. It is the last leg of a flight from Manila.

The monkeys will be delivered to the National Foundation for Infantile Paralysis farm for use in the polio vaccine program.

There were 1,900 monkeys when the plane left Manila, but the little rascals multiplied en route.

THEY'LL GET AIR SUPPORT—A squad leader with an automatic rifle rushes forward as another French soldier takes cover during heat of battle at Dien Bien Phu in Indo-China. French high command announced its forces had won a crucial round in this battle by repulsing a Communist siege army in savage five-day struggle. American plane reinforcements have arrived in Indo-China and will be thrown into the battle in record time. They will be flown by French pilots.

Russian Trade Ready As Soon As Peace Indicated

WASHINGTON (AP)—Foreign Aid Chief Harold E. Stassen reports the free world stands ready to trade with Russia if the Soviets shift their economy toward the paths of peace.

Testifying before the Senate Foreign Relations Committee, Stassen also said that 1953 was "the most successful year for U. S. foreign economic policy—including East-West trade—since the war."

"We have attained a position of economic strength in the free world versus a position of economic difficulty in the Soviet world," he said.

Stassen was before the committee to report on the agreement he made with representatives of Britain and France in a London meeting last month for a reconsideration of controls on Western trade with Russia and her satellites.

In a brief opening statement, Stassen said that West European shipments to the Soviet bloc are 31 per cent below the rate before World War II. Imports, he said, are down 22 per cent.

Stassen said the London conference emphasized that there would be no relaxation on present controls over goods shipped to North Korea and Red China. The United States bans all American trade with these countries, but some of the Allies permit trade in items considered not useful to war-making potential.

"In effect," Stassen added, "what we are saving is that if the Soviet, responding to consumer pressure within and the constraining rapid advance of the free world, will turn its economic approach toward the paths of peace—then this trade can be carried on."

SHE'S TOPS—Dr. Lillian Moller Gilbreth, 76, of Mount Clair, N. J. (above), has been dubbed "the world's greatest engineer." She was presented with the Washington Award in Chicago. Award is conferred upon an "engineer" by fellow-engineers for accomplishments which pre-eminently promote the happiness, comfort and well-being of humanity.

Polio Immunity Experiment Said Very Satisfactory

CHICAGO (AP)—Persistent evidence of immunity against one of the three strains of polio virus for periods up to three years or more has been produced in a small group of children with an oral preparation of the virus strain, three Pearl River, N. Y. researchers report.

Dr. Harry Koprowski and two fellow investigators of the Lederle Laboratories said the preparation was an experimental one first announced in 1952 but that the present report was the first account of immunity studies with it beyond one month's observation.

The preparation contains "living" virus which the researchers indicated had been modified in strength by first being passed progressively through a number of hamsters.

They said in the technical journal "Pediatrics" that the preparation is capable of stimulating "antibodies" against the so-called type 2, or "Lansing" strain of polio. The publication is the official journal of the American Academy of Pediatrics.

Declaring it had been administered to 14 children, they said without specifying that "a number" of the children showed a persistence of the same level of antibodies "for three years and more" virus.

"It is reasonable to assume," they said, "that the immunity thus acquired may last beyond the three years period investigated in this study."

FORCED VACATION

Too Much Reliance On H-Bomb, Belief Of Two Senators

By JACK BELL. WASHINGTON (AP)—Sen. Russell (D-Ga.) says it would be foolish for Congress to place too much dependence on the hydrogen bomb and unbalance the nation's military strength by cutting funds for conventional weapons.

Similar doubts about overreliance on the H-bomb were voiced by Sen. Anderson (D-NM) and AFL President George Meany. Russell, senior Democrat on the Senate Armed Services Committee and a member of the Senate-House Atomic Energy Committee, said in

an interview he is "uneasy" about the Eisenhower administration's proposal to reduce the ground forces.

Neither, he said, is he satisfied with the amount of funds Congress has been asked to make available for the Air Force.

But he conceded that scattered Democratic protests against a proposed slash of about five billion dollars in over-all military funds are not likely to be effective.

He said President Eisenhower's prestige as a military man probably will defeat efforts to change budget figures.

Eisenhower has told Congress that the "new look" military program of major reliance on air power and new weapons justifies a reduction in defense outlays. He said that while Army divisions might be reduced, they would be more mobile, harder hitting and more dangerous to an enemy.

Visiting Woman Killed In Collision Near Bend

BEND (AP)—Mrs. Lucy Jane Craddock, 48, Twin Bridges, Mont., who was injured in an automobile collision near here Wednesday, died in a hospital Monday.

She was a passenger in a car driven by her husband, Ernest L. Craddock, on a trip to visit friends in Eugene, Ore. Craddock suffered only minor injuries.

The collision occurred at a highway junction two miles north of Bend. Norman C. Johnson, driver of the other car, was not hurt.

Plowing King Named At Lynden Festival

LYNDEN, Wash. (AP)—Cornelius Verduin, Lynden farmer with a whole flock of special prizes to his credit, reigned Monday as the king of the 1954 International Plowing Match.

Verduin took first place in the adult division of the 13th annual match Saturday held under sunny skies and participated in by 21 contestants. In addition to winning the adult cup, Verduin received special prizes for plowing the best crown, best finish and best at firmness and packing.

Other division winners were Mrs. Lois Anderson of Lynden in the ladies' plowing event and Dale Nordy of Lynden, winner of a cup for being the youngest "plowman" entered.

Have We Told You About George?

We checked up on first names among APMI workers. George won. So, for simplicity, George automatically becomes the common first name of every one of Associated's more than 900 employees... George heard us say, some months ago, that new developments were shaping up, thus increasing his sense of Job Security. This is our report to him:

EUGENE:

Texture One-Eleven is in production. Also *Sea Swirl* and *Knotty Sea Swirl*. This beautiful decorative plywood, with its three dimensional effect, has been enthusiastically received by architects, builders, building materials dealers.

WILLAMINA:

Hardwood Faced Plywood is in production. This interior-type solid core plywood, faced with Birch and Philippine Mahogany, is finding a ready market in homes and in industry.

ROSEBURG:

Our busy sawmill now has a daily production capacity of 140,000 board feet. In 1953, lumber shipments were made to 39 states, plus export. Additional access roads, tapping millions of feet of virgin timber, are under construction.

SOUTHERN OREGON:

Large timber tracts have been acquired in the Rogue River watershed adjacent to Gold Beach. This area includes some of the finest virgin timber in the Pacific Northwest. Facilities are planned in which to remanufacture and load lumber and veneer produced from our Curry County timber. To this end, a site purchased in the city of Coquille has been leveled and prepared for future construction.

—All of this, plus large scale manufacture of Douglas fir plywood in Eugene and Willamina, adds up to Job Security for George and his fellow workers at APMI.
