

New Treatment Set for Blemishes Gets Unusual Results

Now you can do something about the heartache of pimples! In a recent test, a leading skin doctor treated teens and adults with the new Tussy Medicare Anti-Blemish Set.

He reports "quick, marked improvement in most cases!" Blackheads and pimples of acne dried up; often disappeared. Many stubborn cases responded!

Takes Only Minutes A Day First, cleanse with Tussy Creamy Masque. It removes outside and skin-made grime. It helps skin purify itself; contains new wonder-drug Hexachlorophene.

Hides Pimples While it helps heal them next, use Tussy Medicated Lotion. It's non-oily, and skin-colored... hides pimples while it works to dry them up!

Don't suffer another day! Get this amazing Tussy Medicare Anti-Blemish Set today. Only \$2 tax free, at

Fullerton Drugs, 127 North Jackson, Roseburg.

When loss of moisture—so common to aging skin—causes stubborn, itching torment, Jersolite rich Resolol Ointment relieves amazingly. Special medications soothe fiery itch—lanolin oils and softens dry skin—relief follows.

Amazing New Tire Developed at Indianapolis Now Available for Your Car

WORLD'S FIRST All-Nylon Tubeless Firestone "500"

TESTED AND PROVED AT THE "500" SPEEDWAY FOR USE ON TODAY'S HIGH-SPEED SUPER HIGHWAYS

Runs safely up to 15 m.p.h. faster than ordinary tires

Withstands continuous high-speed running many hours longer

Endures up to 40° higher summer road temperatures

A combination of race-tire engineering and nylon construction makes the Firestone "500" the safest high-speed tire ever developed. In hundreds of tests at the Speedway, this tire was proven safe at speeds far in excess of normal highway driving speeds, giving the motorist up to 15 mph safety margin over ordinary tires.

The new Firestone "500" is a brute for punishment. With a nylon cord body, a full 91% stronger than ordinary tires, it defies road shocks. Unlike other tires which develop "body fatigue" after a few hours of driving, the "500" can be driven continuously without growing weak or "tired."

The "500" was subjected to thousands of miles of high-speed driving over blistering desert roads where the mercury reached 120° in the shade. Under these torturous driving conditions, ordinary tires frequently "pop" like toy balloons, but the Firestone "500" was proved blowout-safe at these higher road temperatures.

Special Safti-Liner Protects Against Punctures

Safer from flats because the air-tight butyl Safti-Liner that's bonded to the inside of the tire clings to nails to prevent air loss. Since there's no tube to pierce or explode, you get extra blowout protection too.

New Tread Increases Skid Protection

The outer ribs remain open to provide a suction-cup action on slippery pavement, while the inner ribs mesh together to create a positive biting action for sure-footed traction on starts, stops, and turns.

Race-Tire Construction Increases Mileage

An entirely new cold rubber tread compound developed under a new chemical formula makes possible a tread of race tire toughness, providing much longer mileage. Stronger cord body permits more retread miles too.
