Surgery's New Heart Tucking Disease Remedy

By ALTON L. BLAKESLEE
AP Science Reporter

ATLANTIC CITY, N. J., Jan. 15.—Taking a tuck inside the heart looks promising for overcoming one dangerous kind of heart trouble, three surgeons said today.

The tucking could narrow a heart valve which became too wide because of rheumatic fever, a big heart killer disease. The widened valve lets blood shoot backward into the heart instead of being sent through the body when the heart beats.

The tucking operation can narrow the valve ring to help the valve close tighter when the heart beats.

It is done by cutting away a wedge of the outer wall of the muscular wall of the heart, at the proper spot. When this opening is pulled together by sewing, the inner wall of the heart is crowded or gathered together, to create a tuck or pleat which faces inward and closes over part of the faulty valve.

The heart-tuck method was described to the American College of Surgeons, opening a week-long clinical session here, by Doctors Elliott S. Hurwitz, Paul W. Hoffer and Ruthven Ferreria, of Montefiore Hospital, New York.

From successful tests on animals, the tucking method looks good for overcoming one kind of rheumatic heart valve trouble in humans, and is ready for trial in humans, Hurwitz said.

The Egyptians mummified many birds as sacred animals.

Eradication Of Slums Goal Of Organization

WASHINGTON (AP)—A nationwide organization called ACTION—American Council to Improve Our Neighborhoods—came into existence today with an approving gesture from President Eisenhower.

The President scheduled an address at the kickoff luncheon of the Board of Directors of the new non-profit, privately supported group aimed at the eradication and prevention of slums.

The movement is headed by retired Maj. Gen. Frederick A. Irving, former superintendent of the U. S. Military Academy, and a 53-member board made up of leaders in civic affairs, business, labor and the church.

After more than a year of planning in cooperation with federal housing officials, ACTION announced it will launch "a major program in the spring of 1955" to enlist industry and community support in protecting the country's 22 billion, dollar investment in its 59 million homes. It will work closely with federal and local agencies.

ACTION said it will concern itself with "the entire range of housing," grouping its activities in these categories:

About seven million dwellings which are in good shape. Here the effort will be to help maintain them in that condition.

About 35 million dwellings in need of some repair. The organization will try to assist their rehabilitation and modernization.

Another eight million dwellings in slum areas. ACTION will devote itself to helping remove the slum conditions.

OPPOSER—Sen. Mike Mansfield (D., Mont.) says he'll try to get the Senate to oppose ratification of the treaty granting West Germany her sovereignty until France and Germany give the documents their final approval. A member of the Foreign Relations Committee, Mansfield says the U. S. shouldn't jump the gun on the final settlement.
