Top PCL Series Shapes Up As Seattle Invades Portland

By THE ASSOCIATED PRESS
The Seattle Rainiers, fresh from feasting on the San Francisco Seals for a full week, change their diet to Beavers from Portland Tuesday night and may find the chewing a little tougher.

The Rainiers dined well on the Seals — seven straight — but the third-place Beavers look like a little stiffer opposition. Seattle only one game behind first-place San Diego, will shoot the works in an attempt to take over the lead.

A pair of ex-major leaguers have been named for mound chores in the opener at Portland. Ewell (The Whip) Blackwell (1-3) will toil for the Rainiers against Royce Lint (3-5).

San Diego should have easier going in its home park against the Sad Sacs of Sacramento. The Cap-

Moose, Youngs Bay Still Snapping Heels Of Leader After Industrial League Wins

INDUSTRIAL LEAGUE

Team	W	L	Pct.
Moore's Cafe	7	0	1.000
Moose Lodge	5	1	.833
Youngs Bay	5	1	.833
Mill's Drive-In	2	3	.400
Schermer's	2	4	.333
Nordic Plywood	1	4	.200
Roseburg Lumber	1	5	.167
Naval Reserve	0	4	.000

Youngs Bay took advantage of 13 passes delivered by Nesbitt of Schermer's though they could reach that hurler for but five bingles.

Roseburg Lumber scored three runs each in the first and third innings for an early 6-3 advantage, but it melted as Moose drove across four in each of the fourth and fifth.

Moose and Youngs Bay remain in a deadlock for second. Schermer's was dropped out of a tie for fourth and Roseburg Lumber sank from a sixth-place tie to seventh.

Each of the winners scored in every inning, with Youngs Bay coming out on top in a nip-and-tuck 12-10 encounter against Schermer's Bottling Co. Moose Lodge, though scoring consistently, came from behind to down a tough Roseburg Lumber Co. nine, 12-7.

PAL Club Wins Forfeit Victory

PAL Club moved to within half a game of league-leading Wilbur Lumber Co. in the Twilight League as the result of a forfeit by the Christian Church squad. The churchmen could not field a full team. The forfeit loss dropped the Christians into the cellar.

Major Golfers Ready Clubs

PORTLAND — Some of the nation's top golfers were here Tuesday for the 32nd annual Western Open championships which begin Thursday.

The four-day, 72-hole tournament will have a starting field of about 175, including some of the top pros who played in last week's National Open at San Francisco and a number of amateurs from this area.

Par for the 6,604-yard Portland Golf Club course is 72. Sammy Snead, one of the ranking favorites, bettered that by eight strokes with a sparkling 64 in his practice round Monday.

Others who were on the course included Julius Boros, ex-U. S. Open champion; Cary Middlecoff, defending Masters' champion; and Gene Littler, Tournament of Champions' titlist.

Snead is familiar with the course, having played it in the 1946 PGA Cup team which defeated the British the following year.

Lloyd Mangrum, the 1954 champion, will not be on hand to defend his title. He is recuperating from a rib injury that kept him out of the National Open.

Conversion Problem

NEWPORT, Wash. — Coach Mal Story had a conversion problem with the Newport Little League baseball team Monday.

Sixteen boys turned out for the club, 15 said they were pitchers.

Whitman's Bat Mark Falls Off

SAN FRANCISCO — An anemic .317 batting average for the week has, surprisingly, boosted San Francisco's Bob DiPietro into the top spot among Pacific Coast League hitters.

DiPietro's season average of .339 was 10 points better than the current mark of last week's leader, Portland's Dick Whitman, who dropped to second at .339. On the third rung were Earl Rapp of San Diego and George (Cats) Mitchell of Oakland with .347 apiece.

The rapid rise of young DiPietro actually was accomplished on a dizzy skid. A week ago he was hitting at a .391 clip, but hadn't accumulated enough times at bat to figure in statistician William W. Weiss' calculations. This week, although he connected with only five base hits, his 23 times at bat were enough to push him over the hump.

Rapp and Milt Smith, also of San Diego, remained in full control of other batting departments. Rapp paced the league in home runs with 19 and runs batted in with 88, while Smith's 104 hits topped the circuit. He is the only man over the 100 mark for the year.

The averages:

Player	AB	H	HR	RBI	Pct.
Vico, Hwd	4	3	1	3	.750
DiPietro, SF	179	66	6	31	.369
Whitman, PD	245	8	5	26	.359
Rapp, SD	277	96	19	88	.347
Mikveh, Ok	248	86	6	35	.347

Junior Legion Slates Home Final Wednesday

Portland's torrid Legion Junior squad makes its final home stand in regular league play Wednesday night at 8 p.m. on Finlay Field.

The opponent will be Cottage Grove, a team the crack Roseburg squad has already toppled in a non-league clash.

U of O Football Prospect Badly Hurt In Accident

PORTLAND — Bruce Brenn, a football end counted upon to fill a varsity position at the University of Oregon next season, underwent surgery here Monday, following a weekend highway accident.

Brenn, who was driving a big truck-trailer as a summer job, was injured seriously when the rig jack-knifed on a curve near the Patterson Ferry crossing in Southwestern Washington Saturday. A passenger, Harold Daniels, suffered lesser injuries.

Attendants said Brenn suffered a mild concussion, a fractured nose and a severely lacerated scalp. His physician said the outlook was favorable for Brenn, but there was danger of infection from the scalp injuries.

Brenn and Daniels were taken to a hospital at Umatilla, Ore., Saturday, then moved to the Good Samaritan Hospital at Portland Sunday night.

Brenn is a Moscow, Idaho, youth, who transferred from Boise Junior College to Oregon.

He was driving from Seattle to Boise with a truckload of scrap fish for mink feed when the truck-trailer plunged off the road.

Olympic Committee May Recognize East Germans

PARIS — The International Olympic Committee Saturday tentatively recognized the East German National Olympic Committee and ordered East and West Germany to form a single team for the 1956 games.

The IOC decision noted that if an all-German team was not formed, then the recognition of the East German committee would be withdrawn. Otto Mayer, Olympic chancellor, said he anticipated no difficulty in the formation of an all-German team.

The decision was made by a 2 to 7 vote.

In its final session the IOC set off an discussion of amateurism until next year. A final decision will be reached at the 1957 congress in Brussels.

Archie Moore's Weight Problems May Be A Magnificent Ring Hoax

NEW YORK — The most intriguing aspect of Wednesday night's title fight is the possibility, seemingly not too remote, that Archie Moore has put over a fast one on Bobo Olson and his advisers, having to do with the amount of weight Archie has had to shuck off to come in at the 175-pound limit.

For the past week a whisper has been rustling through local fight circles that Moore, who is known to be a slick one, didn't actually scale a bulbous 190 1/2 pounds for his twilight victory over Nino Valdes last May 2 in Las Vegas. All Archie actually weighed, the rumor goes, was 186 1/2.

It Just Happens
The promoter of the Las Vegas venture just happened to have been one Jack (Doc Kearns), who as Jack Dempsey's manager once pillaged the little city of Shelby, Mont., and who has been trying to improve upon that performance ever since. And one of those who has been most active in spreading the tale of Moore's weight duplicity just happens to be close to Kearns. For that reason the fight crowd is more than a little inclined to credit the yarn.

The angle is, natch, that Olson, who still is only a heavy middleweight, was suckered into the match in the belief that he would be fighting a veteran who had been forced to punish himself cruelly in melting off close to 25 pounds in a month's training. In other words, if you believe the whispers, Bobo was lured into thinking Archie would come in too weak to swing a cat with any authority.

Possible Alterations
The new version, if true, alters the picture radically, and it probably is significant that the odds against Olson lengthened immediately after the story got around that Kearns had his foot on the scales. If Archie really pulled only 186 1/2 for Valdes, all the recent literature about his horrible sweat-

County SOL Nines Set For Big Clash

The big series on the county baseball front this week has all the elements of a thriller.

It pits the Southern Oregon League runner-up team, Drain, against third-place Roseburg Chiefs. Only one game separates the two teams.

Baseball fans in the county will get a preview of the big weekend series Wednesday at Drain in a non-league encounter. The game starts in the well-manicured Drain ball park at 8 p.m.

The Wednesday action should give some indication of what to expect in the coming league series. The two-game league series starts at Roseburg Saturday night at 8. The second game will be played at Drain at 2 p.m.

Ring Record

MONDAY'S FIGHTS
By THE ASSOCIATED PRESS
NEW YORK — Oscar Pita, 145, Argentina, stopped Gene Fowler, 147 1/2, Niagara Falls, N. Y., 8, BROCKTON, Mass. — Johnny Saxton, 153 1/2, New York, stopped Jimmy Fuller, 156, Wilmington, Del., 6.

SALT LAKE CITY — Gene Fullmer, 154 1/2, Salt Lake City, outpointed Gil Turner, 153, Philadelphia, 10.

NEW ORLEANS — Nat (Killer) Jackson, 123 1/2, New Orleans, outpointed Tommy Tibbs, 134, Boston, 10.

RICHMOND, Calif. — Larry Vasquez, 126, San Francisco, stopped Lalo Sandoval, 124, Los Angeles, 3.

PROVIDENCE, R. I. — Arlie Towne, 168, New York, outpointed Billy Dockery, 165, Brooklyn, 10.

NET RESULTS—Doris Hart, above, and Louise Brough are in England for the tennis season which culminates with the Wimbledon Championships, June 20-July 2. Miss Hart is the United States women's champ.

Is That So! by Eugene Burman

Can you conceive of anything more wonderful in this world than a bird which can fly?

Its skeleton is at once a masterpiece of strength, lightness and flexibility. One, the frigate bird with a wing spread of 7 feet, weighs in all but 2 pounds and of this the skeleton weighs but 4 ounces — somewhat less than the feathers.

THE LUNGS of a flying bird are not just single cavities as with mammals but a whole series of openings extending from the head oftentimes clear down through the hollow leg bones and out to the wingbones. Besides, some birds have air sacs around the intestines, muscles, and often immediately under the skin. Thus air permeates and aerates the entire bird. As a result, this air-conditioning system expels heat from the body quickly as well as excess moisture together with its main duty of exchanging carbon dioxide for oxygen.

To help keep its balance in the air, on the land and in the water, the flight bird's heavy muscles are kept at the bottom of the bird so that it will not be too heavy. The heaviest, most powerful muscles are those which control the wings — in the pigeon they have been found to weigh as much as half of the whole bird — and, as to be expected, are surrounded in the lower part of the bird, acting as a keel. Other low-flying birds, carried deep in the keel, are the heavy plover and liver while above are the light lungs and air sacs.

FLIGHT DEMANDS a tremendous expenditure of energy — certainly more than in any other form of animal locomotion.

This calls for a high-combustion engine. Heart beats may exceed 1,000 a minute in flight; temperatures well over 100 degrees Fahrenheit — a heron's 105.8 degrees, a duck's 109.1 degrees, a swift's 113.2 degrees — which would kill a human; and a bird's red corpuscle count is more per ounce than in any other creature.

To keep this machine flying, as one might imagine, requires a fantastic consumption of fuel. A young robin on first leaving his nest will eat 14 feet of angleworms; a young crow will consume more than its own weight of food in a day; a flying chickadee was observed eating 5,300 cankerworm eggs daily for a week; and many adult birds eat well over half their own weight each day.

But this machine is efficient; an albatross which has a wingspread frequently exceeding 11 feet has been known to travel 3,150 miles within nine days; a golden plover made a 2,400 mile overwater hop on two ounces of fuel!

Yet these long flights can be grueling. A migrating duck will sometimes be so exhausted on letting down that it will splash into the water and cannot take off for hours.

ALL BIRDS naturally take off against the wind to gain air speed. Yet for some of the heavier birds, the take-off is an extremely laborious operation. Some, like the wild turkey, need a runway in addition to the most furious beating of wings to get up enough speed to be airborne.

Many birds maintain a V formation during their migratory flights. It is the simplest way of following the leader in the sky while keeping out of his wash and yet retaining good vision.

But surely the most beautiful coordination in movement of anything living is the smooth flowing mass flight of some of our shorebirds, such as sandpipers, plovers, and turnstones. Look at the tightly-knit flock. There may be 1,000 small birds. At a distance they look like a puff of light smoke, blowing against the wind. In their coordinated flight, they lift and drop, fold over and under, wheel and dip. What unity of action, what extreme quickness of eye, what speed of response, what selflessness — qualities of motion unexcelled anywhere else in our animal life.
