Cadillac

Second Car He Ever Owned!

Time was when a man wouldn't have considered a Cadillac until he had owned four—or five—or even six different motor cars.

But nowadays more and more motorists—like the happy man you see in the picture above—are stepping right up from their first car to a Cadillac.

There are, we think, two basic reasons for this wonderful change.

To begin with, the temptation to make the move to Cadillac has never been greater than it is today.

The car's arresting grace and beauty... its captivating luxury and graciousness... and its heart-winning performance have all been brought to new peaks of perfection for 1955.

And secondly, the path to Cadillac has never before been so clearly marked or so easily traveled.

Take original cost, for instance. The purchase price of the lowest-priced Cadillac is actually little more than many models in the medium-price field.

And then consider Cadillac's economy. Few automobiles of any size or make will travel farther on a gallon of gasoline... and the car is all but free from any save the most routine costs of maintenance.

And, finally, there is the car's resale value. Year after year, Cadillac cars return their owners a higher percentage on their original investments than any other automobiles in the land.

So if you want a Cadillac—don't feel that you have to advance gradually to the car of cars.

If you are ready to make the move, the automobile you now own is the perfect steppingstone.

Why not stop in soon and see for yourself? You'll find that we have some very pleasant news for you about cost and delivery.
