THE WILLOWY WISP has a natural bent—in any direction

The WISP is a retailer who can be talked into almost anything — when it comes to national advertising support from the makers of the products he sells.

He's not always sure where he's going because he's usually being led.

He's absolutely sold on newspapers for his own advertising but lacks the foresight to urge manufacturers to use it, too.

Fortunately the wisp is a rare creature.

Most successful retailers know that a manufacturer's

advertising helps them best in their daily newspaper — close to their own advertising.

Most retailers know that newspapers are the action medium. That's why local advertising in newspapers stacks up to over \$2,000,000,000 a year — nearly six times the amount local advertisers put into radio, more than eleven times the amount they put into television.

Smart retailers and manufacturers know that only in newspapers can they advertise together so gainfully.

All business is local...and so are all newspapers!
