## Eisenhower Asks People To Speak Up For Highways

WASHINGTON — President Eisenhower Tuesday called on an organization of motoring-minded citizens to "speak up again and again for prompt action on a highway system adequate for modern living."

Eisenhower, whose multi-billion dollar highway improvement program was rejected by Congress earlier this year, made the suggestion in a message to the 53rd annual convention of the American Automobile Assn. (AAA) an organization whose aim is to improve driving conditions. The group claims 4,800,000 members, mostly passenger car owners. "The members of your association know from experience how urgently needed is a road system in pace with our expanding population," the President said. "Economic growth must not be stunted by a creeping paralysis of traffic. Motoring convenience, safe driving and national security must not be checked by a lack of roads. A modern road system is one of our great national needs," he continued. "I hope all of you will continue to speak up again and again for prompt action on a highway system adequate for modern living." His brief message included no specific details.

**Uranium Dirt Debunked As Treatment For Ills**  
AUSTIN, Tex. — State Health Commissioner Henry A. Holle yesterday debunked "uranium dirt" treatments being offered in Texas. "The healing value of dirt containing minute amounts of uranium isn't worth the time it takes a man to cover his aching feet," Dr. Holle said in a statement. He said "dozens" of the so-called treatment centers started up after the idea spread that the allegedly radioactive in the dirt was a cure-all for assorted aches and pains.
