

Large Or Small Sales Of Timber Viewpoints Given

SEATTLE — A congressional committee seeking an answer to the question of whether federal timber sales should be larger or smaller heard testimony favoring both viewpoints Tuesday.

Martin Lindell Jr., Stanwood, Wash., lumber processor, and T. F. Paulsen of the Mt. Adams Forest Products Co., White Salmon, Wash., urged that more timber be sold to the small operators.

A spokesman for the Scott Paper Co. called for consolidation of the small sales to strengthen the administrative power of the Forest Service.

The witnesses testified before a congressional subcommittee investigating federal timber policies.

Lindell told the committee small operators make better use of the forest. They remove small trees first, he said, while large operators damage the small trees by cutting the big ones first.

Paulsen said the small communities face a "serious problem" unless there are more small timber sales.

A Scott Paper Co. statement, read by Henry Godshall, assistant manager of the company's timber division, said:

"By combining smaller sales into larger sales, much of this excessive (Forest Service) administrative work could be eliminated and, by reason of larger sales, the total quantity (of timber) placed on sale each year could be increased."

Former Roseburg Man, George E. Hess, Dies Today In Washington

George Ellis Hess, 31, died at his home in Kenniwick, Wash., Wednesday morning. He is a former resident of Roseburg.

Survivors include his wife, Arna; two daughters, Sandra and Judith, all of Kenniwick; his mother, Mrs. Bertha E. Hess; and two brothers, John D. and Clifford, all of Roseburg.

The body is being returned to Roseburg for funeral services which will be announced later by the Roseburg Funeral Home.

Tropical Storm's Toll Climbs To 128 Dead

MANILA — Toll of an unseasonal tropical storm was raised Wednesday to 128 dead, scores missing and widespread destruction in the southern and central Philippines.

Manila Daily Mirror correspondents said 80 persons were lost in the sinking of six fishing vessels and motorboats between Cebu and Bohol islands.

Additional deaths were reported in Negros Oriental Province and in Zamboanga.

Driven by 45-mile-an-hour winds, the storm had moved out to sea Wednesday afternoon.

Unofficial estimates of damage exceeded two million dollars.

Crippled Jet Crashes Into Homes; 13 Dead

(Continued from Page One)

and modern housing units at the base.

The triplets were the sons of Sgt. and Mrs. William Thimble, formerly of Ellwood City, Pa.

An officer who lived in one of the houses adjacent to the scene of destruction told of finding Thimble kneeling in debris, burned and with his shirt blown off. His arms enfolded his other two small children, and he was shouting:

"My other boys! My other boys!"

The mother was standing beside a flaming building, with her screams nearly drowned in the roar and the confusion. Both parents were burned seriously.

There were many narrow escapes, too, in the carnage which one officer described as "terrible. . . awful." A man told of being blown out a window; another was blown downstairs; a couple escaped injury as fire-spattering plane wreckage stopped a few inches from their apartment wall.

The pilot of the ill-fated F84 jet was Lt. Alfred F. Pounders, 28, of Monticello, Miss. He perished.

Witnesses said his plane veered at almost a 90-degree angle as it left the runway. It limped along at low altitude, unable to climb, then crashed into the homes about a quarter of a mile away.

One witness, Rudy Hammer, an electrical engineer who was working in the area, described it graphically:

"The plane bounced on one building, throwing it into flames. Then it bounced on another and a wing flew off. Then it ripped down a high tension power line. From there it smashed right through an apartment house and scattered everywhere."

The tragedy struck shortly after 12:30 p.m. while many children were home from school for the lunch hour. A "Thank God" was sounded by many parents that it didn't come five minutes later, when even more children would have been in the buildings.

S-D Day Program Slated: Accident-Free Day Plea

(Continued from Page One)

The office also is planning to increase its patrols.

Last year's S-D Day in Douglas County, the first, was pronounced a success. There was no highway fatalities and no serious injuries resulting from traffic mishaps.

Mayor Ernest Barker Jr. of Roseburg asked citizens to cooperate with police by observing traffic laws. "Safety depends on you," he stated.

Officer Haystead pointed out that 63 per cent of all drivers involved in a fatal accident and a high percentage of pedestrians were violating a traffic law at the time of the accident.

"Remember," he said, "it's a short step from law breaker to life taker."

West Coast Airlines Alters Flight Schedule

Some flight schedules of the West Coast Airlines will be changed from Roseburg starting Thursday, according to local manager Norman Hunt.

He listed the following: Northbound—8:44 a.m., 1:36 p.m. and 5:34 p.m.; southbound—11:25 a.m., 2:30 p.m. and 8:55 p.m.

Aureomycin Used Successfully As Fish Preservative

SEATTLE — Successful use of the antibiotic aureomycin as a fish preservative was announced Wednesday and industry spokesmen predicted it may revolutionize marketing of Northwest salmon.

In tests last August, developers of the process reported, king salmon and halibut caught at Neah Bay, Wash., remained fresh and marketable without freezing for 20 days while the fish were shipped to the New York area.

The American Cyanamid Co., the developer, reported use of the antibiotic to kill bacteria causing food spoilage was approved by the Pure Food and Drug Administration in Washington. Both the process and the drug in its commercial form are called "aureomycin."

In the experimental shipment 250 pounds of king salmon and 1,000 pounds of halibut were packed in ice containing five parts of aureomycin for each million parts of water. The fish were rail-shipped east, and re-iced on the sixth day enroute.

Both salmon and halibut remained marketable until the 20th day, American Cyanamid reported. The accompanying shipments of similar fish packed in ordinary ice were unsalable on arrival.

Thomas Leal of the Neah Bay Fishermen's Cooperative said the process "makes it possible for the first time to present the flavor of king salmon in the East as it is when it comes from the water."

Dr. Hugh L. A. Tarr of the Canadian Fisheries Experimental Station at Vancouver, B.C., who aided in the experiments, said the minute applications of the antibiotic are harmless if eaten, but in any event are eliminated by cooking. Tarr said the process also is useful in preservation of poultry, beef or even whale meat.

Truman States President Can't Pass The Buck

SAN FRANCISCO — Former President Harry S. Truman said Tuesday night the President must run the United States and can't pass the buck to anyone else.

"Nobody can act for the President but the President himself," said Truman. He addressed some 800 persons at a \$100-a-plate fund raising dinner for the Harry S. Truman Library, under construction at Independence, Mo.

Truman also reiterated his sympathy for the man in the White House who, he said, is flooded with advice and criticism but must make the policy decisions himself.

He made no direct reference to the present administration or to President Eisenhower's illness.

The former President called his off the cuff talk non-partisan. But he said the thing he liked most about the President's duties is that he is head of the party to which he belongs.

Calling on everyone to study the constitution, Truman declared the Bill of Rights is the most important part of the document.

Prof. Charles Brienbaugh of the University of California, head of the Northern California Committee of Scholars for the Truman Library, called himself and Truman "eggheads." Truman, said Brienbaugh, "was the most profound student of history to occupy the White House since John Quincy Adams."

"I am glad to be elected to the Egghead Assn. of the United States," said Truman.

Stevenson Hits Federal Housing Program Cutback

MIAMI, Fla. — Adlai Stevenson hit Wednesday at cutback in the federal housing program under the Republican administration and urged an immediate start on a "realistic" program to provide better places to live for the nation's families.

As a starter, he proposed an all-out attack by local, state and federal governments on the problem of slum clearance and urban renewal.

The Democratic presidential hopeful also proposed in a prepared speech to the American Municipal Assn. two other lines of approach to the housing problem. These were:

1. A federally-aided public housing program measured "not by the limitation of false economy but only by the needs of our lowest income families."

2. A system of practical governmental incentives that will bring decent private housing within the reach of the middle income group.

He told the nation's mayors housing is only one of the complex problems brought about by the rapid development of larger and larger metropolitan areas throughout the country, but he said it was one of the most pressing.

Recalling that the late Sen. Taft (R-Ohio), in sponsoring the 1949 Housing Act, had called for construction of 810,000 public housing units in the next six years, Stevenson said that in six years only 190,000 units had been built and another 135,000 authorized.

"The current program is only 15,000 units for this fiscal year," he said, "and even this congressional decision is 10,000 units higher than the administration's recommendation."

Winston Churchill Is 81 Years Old Today

LONDON — Britain's great man of the 20th century, Sir Winston Churchill, is 81 years old Wednesday.

By his own wish, a quiet celebration was planned with the chief event a birthday luncheon for 12 at his London home hard by the grounds of Buckingham Palace.

The trustees of the Churchill Birth Day presentation fund announced to mark his 81st birthday, announced it had been closed with 259,175 pounds 6 shillings 7 pence — \$725,690.92 — in the kitty.

Churchill has set aside 150,000 pounds of the fund to endow his country home, Chartwell, as a museum for the "relics and mementos of my long life." The remainder goes into a trust to aid charities and philanthropies he designates as worthy.

Aged Woman Will Be Guest At Anniversary

SALEM — Mrs. James L. Julian, 91, will be a special guest Sunday at the golden wedding anniversary of her son and daughter-in-law who are 71 and 70 years of age.

The celebration will be held at Mari-Linn School at Lyons from 2 to 3 p.m. for Mr. and Mrs. Albert Julian. By coincidence, the elder Mrs. Julian's birthday falls on Sunday so there will be a double celebration.

The elder Mrs. Julian has nine living children. Five generations of her family will attend the celebration.

AIR LET FROM TIRES

Mrs. Mildred McCamsey, 1124 W. Military Ave., complains to Roseburg police Tuesday that the air was let out of all tires on her car sometime Monday night. Police said the valve stems were removed from all four inner tubes.

REUTHER PICKED

NEW YORK — CIO President Walter P. Reuther has been picked by the CIO Executive Committee to head the Industrial Union Department of the merged CIO and AFL.

WONT RUN AGAIN

RENO, Nev. — Sen. Alan Bible (D-Nev.) announced he will not seek re-election after he completes the term of the late Sen. Pat McCarran at the end of next year.

Doctor Reports Eisenhower Free Of Symptoms

GETTYSBURG, Pa. — President Eisenhower's physicians reported after an examination Wednesday he is "free of symptoms" and his convalescence "continues to be satisfactory without complications."

Col. Thomas W. Mattingly, heart specialist of Walter Reed Army Hospital, Washington, joined Maj. Gen. Howard M. Snyder, the President's personal physician, in a medical bulletin which said:

"The President's convalescence continues to be satisfactory without complications."

"The President, on progressively increased but restricted activities, remains free of symptoms. His circulatory status is excellent and his pulse and blood pressure continue normal. His cardiogram shows the usual evolution expected during the tenth week of convalescence."

"His weight is stable and his diet is being adjusted to increases in activities at the office and at the farm."

Two Walla Walla Inmates Escape

WALLA WALLA, Wash. — Two Washington State Penitentiary inmates escaped over the prison wall with ladders under cover of heavy fog before dawn Wednesday, after leaving dummies in their beds.

Warden Lawrence Delmore Jr. identified them as John Russell, 25, sentenced to five years for forgery from Yakima County, and Edward L. Burkholder, 23, serving four and a half years for grand larceny from King County.

Delmore said the two made crude dummies of pillows and blankets, put them in their beds Thursday night, and apparently hid in the prison yard during the early evening. Later they climbed a fence into a new kitchen construction area, hooked two ladders together and scaled the wall.

Officers found the ladders early Wednesday and a cell check disclosed the dummies.

Sheriff's officers and city police joined the search after an automobile was stolen from a used car lot here. Officials said Burkholder's former home is Springfield, Ore., and Oregon officers were asked to aid.

Russell was assigned to the kitchen and Burkholder was a "runner" between cell blocks. Delmore said this made it possible for the men to stay out longer than other inmates Tuesday night.

The FBI reported Russell had 14 months left of his five-year term.

Dishware Found Radioactive

ALBUQUERQUE — Dr. Lincoln LaPaz sat for his noontime meal, plunked a Geiger counter on the table and watched it go nuts over his dishware.

Before the day was through, LaPaz, head of the Western world's only institute of meteoritics, at the University of New Mexico, found himself with a disturbed wife telling him to get rid of the dishes.

He also had a "baffling mystery" and theorized that a couple of plate manufacturers may be sitting on a uranium mine.

What LaPaz discovered while testing a package he had received was that the orange glaze on his pottery plates was sending out 1.5 microrentgens per hour compared to background radioactivity in the air of .03 microrentgens. In other words, the plates from which he had been eating the past week were radioactive, although apparently not dangerously so.

The radioactivity was confined to the orange glaze. The pottery itself was not radioactive. The plates, he said, were from two different manufacturers and in each case gave off the same amount of radioactivity.

President Of Turkey Turns Back Resignation

ANKARA, Turkey — Premier Menderes, submitted his resignation Wednesday, but President Bayar rejected it and directed him to find a new cabinet.

All 18 Cabinet members quit the government Tuesday night in a noisy caucus during which one member was punched in the nose.

Although some deputies shouted for Menderes' resignation, the caucus gave a vote of confidence to the premier. Some deputies said his survival ultimately would depend on the character of his new Cabinet.

The Cabinet resignations resulted from Turkey's deteriorating economic situation. Prices have risen steadily, supplies of many essential commodities are short and the supply of foreign exchange is very low.

Stage Actress Cuts Lip, Continues Performance

NEW YORK — Actress Julie Harris, who has won high praise for her portrayal of Joan of Arc in the current stage hit "The Lark," cut her lip during Tuesday night's performance.

She struck her face against a stool when she made her regular fall in the second act. The curtain was lowered while a doctor attempted to stop the bleeding. She finished the show with blood trickling down her chin.

The audience gave her a roaring ovation at the end.

31,000 Americans Killed On Highways In First 10 Months

CHICAGO — Nearly 31,000 Americans were killed on highways in the first 10 months of this year—a 7 per cent increase over the same period in 1954.

The National Safety Council hopes the high traffic death toll will drive home to all motorists the necessity of driving carefully tomorrow, Safe Driving Day, and every day.

The council released its tabulation of traffic deaths for October and the first 10 months of 1955 today to underscore the need for S-D Day, a 24-hour period sponsored by President Eisenhower's Committee for Traffic Safety when Americans are asked to make an extra effort to drive and walk safely.

Tomorrow's event will be the

Slides On News-Review Shown Journalism Class

Colored slides describing publication procedures of The News-Review were shown Tuesday to the journalism class at Central Junior High School, according to News-Review Circulation Manager Fuller Johnson.

Johnson said the slides are available for showing before other groups. On Thursday, Rotary Club will view them during the club's regular weekly meeting.
