Glide High School Library Has Increased Patronage

By MRS. ARTHUR SELBY

Calvin Middleton, Glide High School librarian and biology instructor, stated that the high school library has enjoyed an increased patronage and a noticeable increase in circulation during the first semester.

Total circulation of titles for the first half of the school year has been 2,310 as compared to 430 for the same period last year.

Part of the increase is due to the fact that the high school library now serves the seventh and eighth grades in addition to the four grades of the high school. Approximately 320 students are served by the library.

The addition of some 300 new books has increased the attractiveness of the library to students who enjoy books, Middleton said.

In an effort to determine the advisability of using book jacket covers and keeping the attractive colored jackets on new books, the library conducted an experiment with a number of books so covered and an equal number without jackets. Both groups of books were marked so that library assistants could recognize them. At the end of nine weeks circulation, the covered books had a total circulation of 227 while the others had a circulation of only 54. Aside from increasing total circulation, this enables more frequent usage of such books.
