

Give all parents a chance to help solve our school problems without fear for themselves or their children...

Help all our people working together with the help of our educators to remedy our real educational problems...

VOTE NO on the once defeated, unchanged and resubmitted budget

Our school problems can never be solved with a repeat alarmist performance of the Same Old Stuff that has followed all past school budget defeats.

School Board members have presented this budget election as a test of present school policies. These policies leave the secrecy of the ballot box as the only place where many citizens, particularly parents, have an opportunity to give their help and express their honest and independent opinions.

If this budget is defeated ample time remains for revision and another vote. No salaries need be reduced and no school courses or services need be eliminated.

We oppose any governmental policy, which owes an obligation to all our citizens, and which fails to fulfill that obligation by bureaucratic cultivation or emphatic repulsion of parents, depending upon how they feel toward administration theories and techniques.

Only by a policy that earnestly solicits and respectfully considers the sincere efforts of all our people can we be assured of a better educational program and one designed for the benefit of all our children, now and in the future.

Only by defeating this budget can we be assured of proper and good representative evaluation --- the record speaks for itself --- we owe it to our children, now and in the future.
