

## There's Right Size Bath Tub For Every One

American plumbing suppliers need not measure you to find your correct bathtub size as was done recently in London by a British plumber.

The American plumbing industry makes white and colored bathtubs to fit almost any stature, from midget to giant. Six different lengths of bathtubs are made ranging in size from 38 inches to six feet. Another is 48 inches long and has a built-in seat and a diagonal bathing area. The average size tub falls in the five to five-and-a-half feet classification.

Bathtubs vary in size to accommodate people of various heights and, at the same time, fit into small or large bathrooms.

THIS COMPLETE "first aid for spots" kit helps the homeowner keep valuable carpets and upholstered furniture spotless, the professional way, no matter what the spot may be.

## Concrete Offers Wide Variety Of Uses For Making Improvements Around Home

Enhance the beauty and value of your property with concrete. You'll find that concrete improvements are economical, durable, rot-proof, fireproof and practically carefree.

There are many useful and decorative items that can be made with concrete.

Perhaps the most common and practical are sidewalks. They are durable, smooth (but not slippery), easy to clean and neat appearing.

Concrete curb walks will preserve the grass and prevent muddy shoes in rainy weather. In the garden it is often desirable to construct a flagstone or stepping-stone type of walk. Mineral color pigments are often introduced into the concrete mixture to produce stones of different shades. An attractive concrete driveway

adds much to the appearance of the grounds and provides a year round passage to the street or highway.

Concrete porches and steps are attractive, safe and will last indefinitely. There are many styles and finishes for steps.

Foundation walls of concrete or concrete masonry not only give needed stability to new and old

structures, but they are essential to dry, watertight basements.

Ornamental garden walls and retaining walls of concrete will add to the beauty of the grounds and give a sense of privacy. Textures and colors may be chosen to harmonize with the home and surroundings.

Outdoor fireplaces and barbecue pits are becoming increasingly popular and provide many happy hours out of doors. A yard need not be large to set off effectively any style of fireplace and it is surprising how economically they can be built out of concrete.

Concrete garbage and refuse burners are sanitary conveniences and are inexpensive to make.

Concrete is ideally suited for lawn and garden pools because it is easy to mold and lends itself to a wide diversity of designs.

Improve your home and garden now the economical, versatile concrete way.

PANEL-SURFACED table tops shrug off hundreds of scratches, nicks and stains. Its lustrous surface adds beauty to any setting - whether on a modern-styled coffee or lamp table, as shown here - in the kitchen, den or in fact, anywhere and everywhere it may be used.

A CHARMING and utilitarian corner setting with a custom look, is created by "built-ins" of beautiful hardwood plywood. Recessed shelves, cabinet and wall paneling are all of birch plywoods.

We are here to help you with your home improvement plans. Why not stop in and discuss your plans and needs with us. A talk will not obligate you in any way.
