FORD sets 500-mile record at Indianapolis Speedway

Again proves nobody outperforms Ford

...dramatic demonstration of the kind of performance and roadability that makes all your driving more fun in a Ford!

A Ford V-8 hurtled across the brick and asphalt surface of tough and testing Indianapolis Speedway...whirling through the tight turns and flashing over the straight stretches...to set a mark that no stock car ever reached before!

Previous to Ford's record run, no other stock car had gone even one lap at Indianapolis at 100 m.p.h., but one of Ford's laps was timed at the electrifying speed of 113.7 m.p.h. And Ford averaged over 107 m.p.h. for the full five hundred miles...close to the average set by the extremely costly, specially-built racer which won the Memorial Day "500".

Ford fully realizes that the welter of claims and counter claims about "racing victories" (many of them completely contradictory) must be confusing and disillusioning to the public. Ford ran this race against time, over the true "Classic" distance and at the most famous track in America, in order to dispel this cloud of doubt and disbelief and prove that no one outperforms Ford!

Peter de Paolo, leader of the team of drivers that piloted the winning Ford, states flatly: "No other stock car could have equalled this performance!" And Pete de Paolo should know, for he was

the first driver to win the "500" Classic with a better than 100 m.p.h. average. And now he comes back with a group of drivers to establish a stock car record with the great '56 Ford!

Ford wrote this new mark large and bold in the record books. And the whole Ford did the trick. From the hood-full of throbbing horsepower to the road-hugging rear end, Ford demonstrated that it has what it takes to make your driving more enjoyable. Convince yourself that driving a Ford can be real fun. Test drive a '56 Ford. There's a set of keys waiting for you, so come in and see us soon.

Ford's record was timed and certified by the United States Auto Club
