

FALSE TEETH That Loosen Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plates dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little FASTERITE, the special non-acid powder, on your plates. Hold false teeth more firmly, so they feel more comfortable. Does not sour, checks "plate odor" (denture breath). Get FASTERITE at any drug counter.
