

#### CANVAS REPAIRS

Cuts or tears in canvas can be repaired without sewing by using a new patch saturated with vinyl resins. These patches become highly adhesive when you dip them in a solvent. Ideal for repairing awnings, sails, tents, and canvas lawn chairs.

#### EXCESSIVE MOISTURE

Excessive moisture in the house will cause wood furniture to swell and shrink. Drying of laundry in the home, for example, causes gallons of water to evaporate into the air. Wood fibers tend to pick up this moisture.

## Choose Proper Coverings For Hardworking Floors

Selecting the right floor covering is extremely important to anyone who is about to buy or build a home. There are many products available today and homemakers can find floor coverings to solve every flooring problem. For homes built on concrete slab, asphalt tile is recommended. This low-cost, long-wearing floor covering is highly resistant to

moisture and alkalis. It is an excellent choice for basement areas. No part of your home gets more wear and tear than your floors; especially those in the kitchen. It is wise to consider all suitable flooring products to be sure that you are choosing the best possible product in your budget range. Good floor covering is a good investment and for only a few

cents more per square foot you can have the finest products for permanent attractiveness, ease of maintenance, recovery from indentation and wearability. Inlaid linoleum tile provides a resilient, long-wearing and easy-to-clean floor covering. Tough and durable vinyl tile is excellent for installation on concrete. Moderately priced plastic

tile is flexible and easy-to-handle. The non-porous surface of this tile seals out dirt, grease and grime. Through the development of new types of floor covering adhesives, it is possible to use cork tile and rubber tile for installation. You'll find tiles in a wide variety of colors and patterns, suitable for living rooms, bedrooms, kitchens, bath and den.

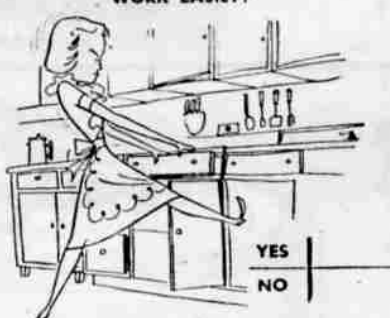

# Can your kitchen pass this test?

#### IS IT EASY TO CLEAN AND MAINTAIN?

Smooth, mar-resistant steel cabinets can be wiped clean in a jiffy... and they won't warp, crack or peel.

#### DO DRAWERS AND DOORS WORK EASILY?

Precision-made steel cabinets work smoothly, quietly... at the touch of a finger... even in the dampest weather.

#### DOES IT HAVE STYLE AND COLOR FOR LASTING BEAUTY?

Smartly styled steel cabinets come in white and a wide variety of stay-on colors to harmonize with kitchen decor.

#### DO YOU HAVE ENOUGH WORK SPACE AND STORAGE ROOM?

Steel kitchen cabinets come in a wide variety of sizes and shapes to meet your every need.

#### WILL YOUR KITCHEN ACCOMMODATE BUILT-IN APPLIANCES SAFELY?

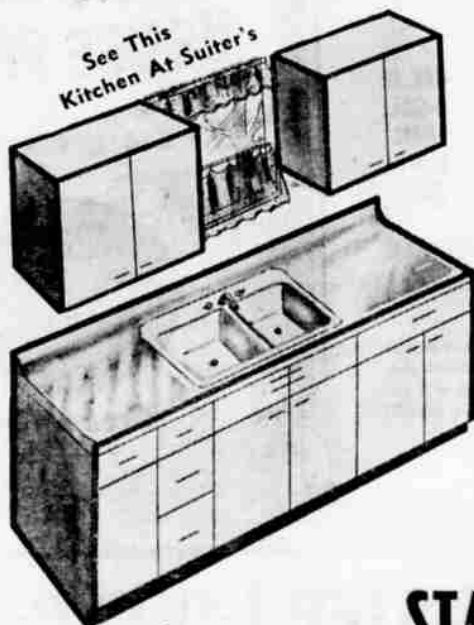

Steel cabinets include special units to hold the new built-in counter-top ranges, wall ovens, and dishwashers.

#### ARE YOUR KITCHEN CABINETS VERMIN-RESISTANT?

Tightly constructed steel cabinets keep pests out.
