FOUR-DOOR EXERCISE — Emerging from different doorways, the 13-year-old Zariet quadruplets display their prized diplomas after they were graduated from Public School 225, Brooklyn, N.Y. From top to bottom are: Ellen, Isadora, Elaine and Bennett.

Ft. Lewis-Trained Troops To Experience Atomic Bomb Fury In August Exercise

By LEROY HITTLE
FT. LEWIS (AP) — Troops trained here for nuclear warfare will experience the fury of a real atomic blast next month.

More than a thousand men — some of them just three months removed from civilian life — will leave here in mid-July to participate in nuclear tests in Nevada.

They will dig in near "ground zero" and, within a limited time, build earthen fortifications over which an atomic device will be exploded.

The troops will be withdrawn 4,500 yards away before the explosion, but the test will determine what protection, if any, the fortifications would have given the men if they had remained.

Army equipment also will be subjected to the blast to see whether it would be in usable condition afterwards to help troops take the offensive.

"The troops will be digging into the rock and sand to the tick of a stop watch to find out if a man can scoop enough of a hole in a given time to survive atomic fury," the Ft. Lewis public information office said.

Immediately after the explosion, the entire force of more than 1,000 men will take the offensive against a simulated enemy.

They will board helicopters which will ferry them to a point 25 miles away, presumably to cut off the withdrawal of the enemy force.

After moving the men into attacking position, the helicopters will supply the troops with an air-lift between front and rear positions.

It is all part of a maneuver to test the new concept of fighting an atomic-age war.

Under this concept, a division will be composed of five battle groups, each a hard-hitting, mobile, self-sustaining force. The battle groups will replace the former three regiments of a division.

The troops that will participate in the nuclear tests are members of the 1st Battle Group, 12th Infantry. They will receive intense pre-test training at Camp Desert Rock, near the atomic testing site, before the mid-August explosion.

Canadian Visitor Shows Up For Party At Canyonville

By CAROL BRINKWORTH

Home on furlough, James Crowl visited his mother Mrs. Susan Crowl, then returned to his ship, the USS Dixie at San Diego, Calif., recently.

Mrs. J. E. Isom, Bennetta Pickett, and her two boys, Billie and Jackie, drove up from Winchester Bay to visit with relatives and friends last week. They are former Canyonville residents.

Mr. and Mrs. Walter Jensen were visited last week by their son, Ed Sarason, and his family for several days. The children had a wonderful time picking grand-ma's cherries and fishing in the creek, and became rather reluctant to leave when the visit was over to go home to Eureka, Calif.

Much to Mrs. Martha Ball's pleasure, her daughter and son-in-law, Mr. and Mrs. Ben Wenrich and children, Patsy, Sharon and Venita, are visiting her on their first trip to Oregon from their home in Wichita, Kan. While here, they are going on trips together to the Oregon Coast, Crater Lake and along the coast where they will try deep sea fishing.

Mr. and Mrs. George Kelley were glad indeed to have their son, Corp. George Kelley Jr., home on his 21-day leave. He left last week to go back to his post in Duchesne Rock, Nev. Staying also in the home of Mr. and Mrs. Kelley last week, was Mrs. David Miller of Elkton while her husband was in Forest Glen Hospital with appendicitis.

Spending their week's vacation at the home of Mr. and Mrs. William Barnes are Mr. and Mrs. Leonard Falkner from Eureka, Calif., and their two sons, David and Michel. Also visiting is Mrs. Barnes' brother, Dale LeBlanc.

To visit Mr. and Mrs. Spurgeon Hinkle, all the way from Richmond, Va., this week are Mr. and Mrs. Jack Ransberger and family. While they are here, they all plan to see the coast and try deep sea fishing.

Mr. and Mrs. Elliot are enjoying a visit with their son, Mr. Gene Elliot, his wife and their family. They are over here from Florence.

TOP TRUCKER — Ernest Roedel, 29, of New Franklin, Mo., has been named the national "Driver of the Year" by the American Trucking Association. Roedel is credited with saving the lives of Nanette Van Horn, 13-months (on his lap) and her sister, Rebecca, 2, a year ago after an auto wreck in which the children's parents were killed. The children are living with their mother's sister in Otawa, Kan. Roedel has a half-million-mile, no accident record.

farm facts

By BOB BRADLEY
County Extension Forester

In case those of you who read this column may have wondered about its absence during the past few weeks, the author and his family were on a camping trip.

It's good to be back. A 7,000-mile trip through our national forests and parks and wide open spaces back to Maine, New Hampshire and Connecticut to visit relatives and friends was very enjoyable. It was also very reassuring. A about some ideas I expressed about this part of the country nearly a year ago.

The Pacific Northwest still has the tallest, straightest and fastest growing trees I have ever seen. Your timer is not only a valuable crop, it is a profitable investment earning you excellent returns.

WHILE in New Hampshire, I spent a day with a personal friend, Prof. Lewis C. Swain, who originated a certain method of poisoning unwanted trees with sodium arsenite tabs inserted under the bark. Prof. Swain has been very successful with this method which I have been experimenting with in Douglas County. I was glad to have a chance to learn of some new techniques developed in this field which would extend the application of this method far beyond the normal peeling season.

There are many young stands of desirable trees which are trying to force their way up through a heavy overstory of low value or unmerchantable trees. In many cases, if the job is left to nature, only a few of the good trees will be able to make their way through the overstory. This often results in a very poorly stocked stand, capable of producing only a few thousand board feet to the acre.

THE PROBLEM is to find a quick, inexpensive, yet effective, method whose application will bring through enough trees to form a good merchantable stand. I believe the method mentioned may offer one way to do a good job economically as results are beginning to show already from last year's and this spring's application. More details and results will be forthcoming as soon as the experiments have progressed far enough to be conclusive.

Rehearsal Starting For Operetta Here

An innovation in summer musical events is planned in mid-August for high school students and young adults of the Roseburg area, and Director Robert Robins is still calling for talent.

Robins hopes to draw enough talent to stage the George Gershwin Operetta "Girl Crazy." It is tentatively planned to stage it at Finlay Field in mid-August. The project is being backed by the Roseburg Kiwanis Club.

Rehearsals start Tuesday night at 7:30 in the Episcopal parish hall. Anyone from central Douglas County in the high school or college age youths with operetta experience may attend.

Robins said adult help would also be needed in stage and scenery work, costuming, lighting, make-up, etc. Anyone interested may call Robins at OR 3-6333.

Freedom Short Lived For Paroled Prisoner

ALBANY, Ore. (AP) — Charles B. Shively, paroled from the state prison this week, was back in jail within eight hours.

He was charged with obtaining money under false pretenses—the same charge that had put him in prison previously.

Shively was one of the 116 prisoners released on parole from the state prison Monday, when a new law went into effect, making prisoners eligible for release if they have served two-thirds of their sentence without getting into trouble.

GIRLS FETE SPONSORS

The Okieyapi Camp Fire Girls of Lookingglass entertained a group of their sponsors at the home of Mr. and Mrs. Pearley Oar last week. The group furnished winners and buns.

Only Federal Restrictions On Teen-Age Summer Work Involve Hazardous Jobs

Firms that hire teen-agers for summer jobs can remain in compliance with the federal child-labor law by applying some simple rules," says John R. Dille, regional director of the U. S. Dept. of Labor's Wage and Hour and Public Contracts Divisions.

Boys and girls of 16 and 17, just like adult workers, can work under the Fair Labor Standards Act in any all jobs — whether in factories, wholesale houses, communications or other industries, except that they cannot work in occupations which the secretary of labor has found hazardous to minors under 18. This is the only child-labor restriction applying to 16- and 17-year-olds under this law. The minimum wage and overtime provisions of the law are applicable to both minors and adults.

Even children of 14 and 15 may be employed in office and sales work, in fruit and vegetable packing sheds, and in some other kinds of jobs — as long as they do not work in rooms where goods are manufactured or processed, or in manufacturing, mining, processing or similar jobs.

During summer vacation, the 14- or 15-year-old may work as many as 8 hours a day and 40 a week. When school is in session, much more stringent restrictions apply. Employers should also note that the 14- or 15-year-old is not permitted to work before 7 a.m. or after 7 p.m.

As to jobs with an 18-year age minimum, Dille explains that they include work as a motor-vehicle driver or driver's helper, elevator operator, and jobs involving riding on a freight elevator, unless it is run by an assigned operator. Also covered by the 18-year minimum are most jobs in logging and sawmilling, and the operation of a variety of machines.

Employers who get and keep on file an age certificate which shows that the young worker is at least the lawful age for the job have proof of age for purposes of the act, Dille said. Age certificates can usually be obtained from local school authorities.

Former Oakland Pastor Visits

By MRS. EDITH DUNN

Dr. J. K. Howard, former pastor of the Oakland Community Presbyterian Church, and his wife were recent visitors at the home of Mr. and Mrs. Ward Cockeram of Oakland.

Dr. and Mrs. Howard have been living at Lakeside where Dr. Howard was a minister and Mrs. Howard was a school teacher. They are moving to Glendale.

A bi-monthly meeting of the Sunday School Council of the Oakland Community Presbyterian Church is scheduled for Tuesday at 8 p.m. in the Manse.

Members of the Community Church Ladies Bible Class will meet July 12 at the home of Mrs. Edwin Stearns.

Mrs. Fern Neas is a new clerk at the Oakland Post Office. She is replacing Mrs. Hunter Early, who resigned her position to teach at Oakland High School.

Jesse Lee, Walt Cota and Gary Roberson are spending the week fishing at Mink Lake in the Cascades.

Mr. and Mrs. Dave Rice of Ashland spent the holiday weekend with Mrs. Rice's parents, Mr. and Mrs. Charles Beahm. The Beahms, Rice and Mr. and Mrs. Doug Beahm spent July 4 water skiing at Cottage Grove Dam.

Mr. and Mrs. Don Cummings of Sunnyvale, Calif., visited recently with Mrs. Cummings' mother, Mrs. Mamie Pelzel and brother John Pelzel.

Mr. and Mrs. L. F. Painter and children of Eugene spent July 4 with Mrs. Painter's parents, Mr. and Mrs. E. M. Dunn.

Mr. and Mrs. A. C. Wegner of Pico, Calif., visited recently with Mrs. Wegner's brothers, Kenneth and Alva Copeland, and their families.

Mrs. Kenneth Williams has returned from Elma, Wash., where she was caring for her mother who has been ill.

Mr. and Mrs. Harold Riggs, Larry and Kathy of Prineville are visiting Mrs. Riggs' parents, Mr. and Mrs. Clarence Fraser, and Riggs' sister, Mrs. A. O. Bunch, and brother, Dick Riggs, and family.

Mrs. Gene Cherry and children visited several days with her mother, Mrs. May McCurdy, and sister, Mrs. Howard Byers, and family of Portland.

George Wilcox Sr. has returned from a visit with his son, Dr. Robert Wilcox, and family at Boise, Idaho.

Guests this week at the Lafayette Maddox home, here to attend the wedding of Miss Lavonne Maddox and Orville Nelson, were the Maddoxes' sister, Mrs. Alvin Sutton and daughters of Mountain View, Calif.

Education Assn. Abandons Lower Age For Voting

PHILADELPHIA (AP) — Delegates to the National Education Assn. convention, closing their sessions Friday night, abandoned a long-standing statement in favor of the right to vote at age 18.

During final debate on resolutions, a Los Angeles woman, Mrs. Esther Stodel, moved that one urging that 18-year-olds be given the ballot be deleted "because it does not directly affect the welfare of schools and children."

The resolution was eliminated by heavy vote.

The convention without several attempts to amend its desegregation resolution and reaffirmed a statement substantially the same as in previous years, calling for the problem to be approached with "fair play, good will and respect for law."

A proposal for a teacher pay scale ranging from \$4,800 to \$11,300 was amended to start at \$5,000. Last year the NEA approved a \$4,500-\$10,000 scale.

Considerable debate was generated by a resolution condemning "merit rating" of teachers for pay purposes, but in the end this too went through with only minor editing changes.

The resolution says that merit rating on any basis so far devised is objectionable because it rests too much on personalities. It calls, however, for continued research to uncover a procedure the NEA could approve.

PLAN BEACH OUTING

Girls of the Glendale Job's Daughters are planning a two-day beach outing July 30 and 31.

Money for the project was raised recently when about 25 members of the Bethel washed some 30 cars in a car wash activity at Cox' Central Service in Glendale.

work, in fruit and vegetable packing sheds, and in some other kinds of jobs — as long as they do not work in rooms where goods are manufactured or processed, or in manufacturing, mining, processing or similar jobs.

During summer vacation, the 14- or 15-year-old may work as many as 8 hours a day and 40 a week. When school is in session, much more stringent restrictions apply. Employers should also note that the 14- or 15-year-old is not permitted to work before 7 a.m. or after 7 p.m.

As to jobs with an 18-year age minimum, Dille explains that they include work as a motor-vehicle driver or driver's helper, elevator operator, and jobs involving riding on a freight elevator, unless it is run by an assigned operator. Also covered by the 18-year minimum are most jobs in logging and sawmilling, and the operation of a variety of machines.

Employers who get and keep on file an age certificate which shows that the young worker is at least the lawful age for the job have proof of age for purposes of the act, Dille said. Age certificates can usually be obtained from local school authorities.

The federal child-labor law — the Fair Labor Standards Act — applies to employment in interstate or foreign commerce or in the production of goods for such commerce, and in establishments which produce goods for such commerce. There are exemptions from these provisions, however.

Dille points out that one of the child-labor exemptions permits youngsters of any age to work as newspaper carriers.

More information about the federal laws child-labor provisions may be obtained from the divisions' regional office, 630 Sansome St., San Francisco, or from the field office at 520 SW Morrison St., Portland.

Dille added that where state and federal child-labor standards differ, the higher prevails.

Installing Year Round Cooling? Then Check This

The owners of a home with a properly designed year round air conditioning system experience a comfort, and will derive more use and satisfaction from their total investment.

At the same time there are a number of things (concerning your home) that should be taken into consideration before the system is being installed that will increase the comfort and from air conditioning.

Insulation Pays

Insulation of the walls, roofs, ceilings and floors, to keep out summer heat and retain warmth, will cut equipment size and operating costs.

Proper Ventilation

Ventilation in the attic will avoid excessive temperature rise common to enclosed spaces such as attics.

Placement Of The House

A little thought in the placement of the house can save on equipment and operating costs. For example: a minimum amount of windows on the west side is important to reduced cooling loads.

Shading

Trees, shrubs and hedges can shade the house from the summer sun and protect the house from winter winds, thus cutting operating costs. Use the shrubs and trees to shade the low sun in the west and the overhead sun in the south.

Source Of Heat Inside

Kitchen exhaust fans over the range, and venting of clothes dryers are the two most important considerations in eliminating sources of heat inside the house.

Equipment Selection

When selecting cooling equipment for a residence, factors other than the bare building dimensions often have considerable bearing on the size of equipment chosen for the job.

Such items as large entertainment loads, and possibility of the owner's preference for temperatures lower than 75 degrees might dictate the selection of equipment of the next, and larger, size.

In all cases it is advisable to consult the dealer in your vicinity who is familiar with local conditions, codes and practices. He is also competent to engineer, install and service your air conditioning system.

Portland Dist. Council Names Gerald Larsen

PORTLAND (AP) — The Portland District Council of the Carpenters union has named Gerald Larsen as executive secretary, succeeding Clell Harris.

Harris resigned to join the Federal Mediation Service as a labor conciliator. He will report for training in Washington, D.C., Aug. 3.

Harris said he also will resign as president of the Oregon State Building and Construction Trades Council. Vice President Joe Willis, Eugene, will serve until the August convention at Klamath Falls.

Business agents named by the Portland District Council of Carpenters are George Hahn, E. B. Weber, T. E. Johnson, Swan Nelson and Lloyd Goodwin.

ANNUALS ARRIVE

Glendale High School annuals have arrived for distribution, reports correspondent Mrs. G. B. Fox. Delivery had been delayed until after the end of the school year.

The annuals may now be secured at the home of Editor Sally Jo Thompson.
