

Stassen Upholds U. S. Outer Space Research Program

COLORADO SPRINGS, Colo. (AP) — Presidential disarmament adviser Harold E. Stassen said here Tuesday that he considers the United States "less than one year behind" in outer space research.

In a speech prepared for delivery at the 91st annual convention of the National Grange, the former Minnesota governor said he believed that with "sound action" we should be able to move ahead in the next five years.

He appealed for "new unity of America in support of our President" and said that although he

(Stassen) is a Republican he "took the same position in the critical hours" of the late President Roosevelt's administration.

Hits Demos

"If some of the Democratic senators and governors would now take such a position, they would earn satisfaction more lasting than the transitory headlines accorded a carping critic," Stassen said.

He said his emphasis on "future action and on bipartisan co-operation" does not "spring from any endeavor to evade Republican

responsibility for administration in recent years."

"The next session of Congress can deteriorate into a sad pot-and-kettle session, or it can rise to a major move of combined action for the future. I believe it will," he said.

He outlined the nation's response to the challenges of the space-age in three categories: Immediate moves by the government, prompt action by the people, and long term future programs for both.

Representative From Pennsylvania Passes

WASHINGTON (AP) — Rep. Augustine B. Kelley (D-Pa.) died Wednesday at Suburban Hospital in Bethesda, Md., his office announced.

Kelley, 74, had been in critical condition with a kidney ailment. He underwent surgery in September. He was returned there last week when doctors said he was "rushing his recovery too fast," his office said.

Kelley was the second ranking Democrat on the House Committee on Education and Labor.
