Learn the art of retouching — just like photographers can retouch pictures you can learn to do the same to yourself. There is now pencils available in skin tones to touch up those flaws that need a little covering up — for instance — shadows beneath the eyes are brightened by lightly stroking the pencil over the area — this also helps to intensify the eyes as well — expression lines or cracks disappear when pencil is lightly used and dusted with a little powder — red blotches, broken veins and other blemishes are blurred with dotted with the pencil and then edges smoothed out.

A few don'ts when there are children about: Don't leave poisonous cleaning agents in close to floor cupboards. A dangling iron cord can lead to disaster — also a toaster.

Turn pot handles inward, away from the edge of stove.

I think that it is always a good thing to remind ourselves of these dangers but we are inclined to get careless when everything is going alright.
