Variety Meats Put Vim In Diet

Use variety meats to put vim into tired appetites, add spice to meals, and trim the family meat bill, shoppers were told this week by Carol Dawson, Douglas County extension agent.

Included in the list of variety meats are liver, heart, kidney, tongue, tripe, brains and sweetbreads.

High in iron, vitamins A and B, they encourage hearty appetites, build strong bodies and healthy gums. Because of a small demand for variety meats, they are often priced a third to a half lower than regular economy cuts. Little waste, too, shoppers are reminded, from bone or excess fat.

Appearance is the guide to selection of variety meats, Mrs. Dawson continues. Meats should be fresh and plump, and smooth and shiny around the edges. Entire pieces should be evenly colored. Liver is deep red to red-brown; kidneys are a deep red-brown and heart should be bright, dark red.

The coldest part of the refrigerator is recommended storage for variety meats. For best flavor, they should be used within 48 hours after purchase. After cooking, wrap meat tightly with waxed paper or aluminum foil and refrigerate.

Flavor and appetite appeal of all variety meats depend on proper cooking methods, cooks are reminded. Mrs. Dawson suggests that shoppers consult cookbooks with recipes and menu suggestions, try several, and surprise the family with new taste treats.
