SUCCESS STORY...

the horse and buggy as a method of transportation.

Grandma had to heat with fire, but you don't!

Only electric heat is flameless, fumeless, and foolproof. That's why moderns prefer it. And prove their preference by installing it in the great majority of new and modernized homes.

Get the complete electric heat story from a Cal/Ore Electrical League member before you choose a heating system for your home.

Over sixteen thousand families in our area now use flameless electric heat in their homes. This represents an increase of over 400% in 10 years! No other heating system can show this proof of home-owner preference.

The sunshine-clean warmth which an automatic electric heating system brings to so many modern homes is a miracle of the modern age. It eliminated the necessity of using the age-old method of heating — fire — just as the modern automobile eliminated
