RIVER CLEARING

By Charles V. Stanton

Residents of the Lower Umpqua area are greatly interested in a large-scale stream clearance project. This project is a cooperative venture. Participating are the Fish Commission, the Game Commission, and several industrial concerns.

I have used this activity as a base for discussion of other fish population problems on the Umpqua River. Perhaps I gave the impression I wasn't completely "sold." I would like to correct that impression, if it exists.

Doubtless we can use some habitat improvement on the main Umpqua River and on its two principal tributaries, the North Umpqua and the South Umpqua. But I am of the opinion that of prior importance to the main river and its two upper branches is the matter of food production and minimum flow. I can't see much sense in putting money into providing more spawning facility when we already have a large amount of spawning area unused because the rivers haven't enough food supply to maintain the potential population.

But the Lower Umpqua project has some different angles.

In the first place it isn't being conducted on the main river. The work is being done on the Smith River drainage.

Protection Needed

It is indeed to be hoped that Smith River can be protected from the damage done to other streams in Douglas County.

Smith River is a tributary of the Umpqua River. It joins the main stream almost directly across the Umpqua from the city of Reedsport. It is navigable in its tide-water section.

Upstream the river passes through a deep, rugged, heavily wooded canyon. The canyon broadens out and the river heads in a valley of which Gunter is the center.

Because the elevation is low, the water is fairly warm. The stream always has been very productive of cutthroat trout and some fall salmon.

Its tributaries are fairly short. Some head in small lakes.

The late Paul Applegate, who lived at Wells Creek, near Scottsburg, used to tell of fabulous fishing in the canyon section of Smith River.

With a pack on his back he would cross the divide between the Umpqua and Smith River. His goal was a hidden lake, teeming with big fish.

Conditions have changed vastly in late years. The river has been damaged by what we call "progress." It needs protection against the destruction that seemingly always accompanies populations.

The whole Smith River area once was a wilderness. Today it is crisscrossed with roads, is a busy logging section, has a growing population. The river is subject to log jams, siltation, water removal, watershed damage, pollution.

Improvements Made

I have flown over much of the Smith River drainage. From the air it is possible to see the huge log jams that affect fish migrations. Many miles of water are made useless for fish habitat by log jams resulting from a number of sources.

One source, of course, has been logging. Some trees have been felled into the river. Freshets have carried other logs into the current. Because the stream is small, formation of jams has been extensive. A large forest fire covering many thousands of acres on Vincent Creek damaged the stream both chemically and with debris.

The stream has been silted by removal of ground cover, road construction and poor logging practices.

Widespread cooperation has been given a program, directed by the Game Commission, to remove log jams. Logging concerns have made equipment available and are otherwise giving help to the large-scale activity.

It is indeed to be hoped that everything possible is done to halt damage to the fish productive capacity of the stream before it has been impaired as critically as the main Umpqua River and its two chief tributaries.

DEAR ABBY

Abigail Van Buren

A Kiss Is A Kiss!

DEAR ABBY: I live in Anchorage, Alaska, and can tell you "curious" reader that Eskimos DO rub noses to show affection, but it is no substitute for a kiss.

Also, please tell your readers that we do not live in igloos. The only igloo I ever saw was in a picture book and I am 42 years old.

ANCHORAGE RESIDENT

DEAR ABBY: Take it from a G.I. who spent a year in Greenland: The only nose I rubbed among the Eskimos was my own!

"COLD PROPOSITION"

DEAR ABBY: Yes, the Eskimos DO rub noses instead of kissing for common sense reasons. It is so cold that if they kissed, their lips would get stuck together.

BUZZIE (age 11)

DEAR ABBY: May I quote Peter Freuchen, a Dane, and the foremost authority on Eskimos and their customs?

"A standard of beauty among the Eskimos is the nose. Eskimos do not kiss. They rub noses in greeting, but there is never any pressing of the lips together, not even when boy meets girl."

(signed) "NOSEY"

DEAR ABBY: The Eskimos DO NOT rub noses instead of kissing. Years ago, when the T. B. epidemic was a threat among the Eskimos, they avoided kissing for reasons of health. But now they kiss like any other people.

"OLD FUR TRADER"

Note: Three Out Of Four Accidents Occur At Home

NEW YORK (AP)—Things a columnist might never know if he didn't open his mail:

At 70 the average American has consumed 25 acres of grain, 50 acres of fruits and vegetables.

Some 85 per cent of engaged girls wear a diamond ring to announce their status, but not all get them from their fiancés. Many girls now buy their own rings.

Hunting Tip: Ladies if you want to wed a real moneybags, hop the next jet to Zurich, Switzerland. One out of every 732 men there is a millionaire.

Thought for Today: Why is it little children seldom sneeze until they have a mouth full of cereal?

Beauty Secret: Soviet women make a homemade face cream they have a hard time keeping their husbands from drinking. The recipe: Beaten egg yolk, glass of cream, lemon juice—and an ounce of vodka.

The five people who have had the most books written about them are Jesus Christ, William Shakespeare, Abraham Lincoln, George Washington and Napoleon.

Speeds: Man can sprint at about 20 miles an hour, a snail at about three inches a minute.

Worrisome Statistic: Safety experts estimate that eight million motorists habitually drive while under the influence of liquor.

One way to tell the difference between a horse and a cow: If they are lying down, the horse gets up front end first, the cow hind end first.

America now has 5 million guitar players, 20 million bicyclists, at least 25 million people who enjoy bowling, and 39 million amateur photographers.

Christianity is on the rise. There are now 808.8 million Christians compared to 430.5 million Moslems, the world's second largest religious group.

Advice to Parents: Have your son or daughter learn a specialized line of work. By 1965 there will be three candidates for every job requiring no training—but for every seven specialized jobs only five workers will be available.

Quips from our Contemporaries: Sign over a Manhattan bar: "Warning. Three out of four accidents occur at home."—Catholic Digest.

The idea of an annual Mother's Day isn't new. The ancient Greeks paid tribute to Cybele, mother of the gods, during the Ides of March. The Romans adopted the custom about 250 B.C.

Household Hint: You can remove bloodstains from fabrics by soaking them in a meat tenderizer, then sponging with cool water and laundering with soap or detergent suds.

No wonder your eyes sometimes get tired. In a year you blink 84 million times.

Old Favorite: Despite the popularity of television, the Hotel Edison here found that two out of three guests prefer to listen to the radio.

An auto salesman can't afford largesse. He has to make 25 sales spiels for every car he sells.

It was Helen Rowland who observed, "When a man makes a woman his wife it's the highest compliment he can pay her, and it's usually the last."

Fast Planes Have Taken Stuffiness From Summits

WASHINGTON (AP)—Jet planes have taken some of the stuffiness out of summit meetings and President Kennedy and British Prime Minister Harold Macmillan may try to humanize them a little more.

If they do there should be more summit meetings with the Russians but less of the fanfare which in the past made every summit look like the hinge of history while the world listened for each creaky sound.

The statement the two leaders issued after meeting here Sunday, like others in the past, was one of those typical topical things that touched a lot of bases but revealed practically nothing.

Their most interesting point—not so much for what it said as for what it may mean in time to come—was on summit meetings.

Here they said "they reaffirmed their willingness to consider meetings of heads of government whenever there is an indication that such meetings would serve the interest of peace and understanding, and in this respect they took note of the opinion recently expressed by Chairman Khrushchev."

Khrushchev had always been ready for a summit at the drop of a diplomatic pouch containing an invitation. In a recent interview with American publisher Gardner Cowles, he did a turn around.

In the past, while the West insisted any summit should be preceded by a meeting of foreign ministers to see if the two sides could agree on anything, Khrushchev brushed the ministers aside as a waste of time.

Messengers, he called them. He said only the top men could solve anything. But now Cowles said Khrushchev told him that perhaps it would be better for ministers to meet first.

The Kennedy-Macmillan statement didn't say they would sprint to a summit without preliminary spadework by the ministers, but it also didn't say they would insist on a ministers' meeting first.

They said they'd go if there was an indication it would do good. "Indication" is a flexible diplomatic word, nicely adapted to keep the door open for Kennedy and Macmillan to go in or come out as they wish.

They could go directly to a summit, justifying it by saying as travel got even faster there seemed less reason—except for the dearth of tradition—between the top men, not only among friends but with antagonists, too.

This may be what Kennedy and Macmillan had in mind Sunday although, by using the word "indication," they didn't stick their necks all the way out.

The more frequent summit meetings become, the less enormous each would look until finally the world would stop expecting final solutions from meetings which had become a place to exchange ideas.

Peiping Says U.S. Prepares For War

TOKYO (AP)—Red China has accused the United States of conducting nuclear tests to prepare for war. It warned that the "Chinese people will eventually settle accounts with the U.S. aggressors for their blood debts."

"The U.S. authorities have hastily resumed the tests for no other purpose than to accelerate preparations for nuclear war," Peiping radio charged.

The broadcast accused President Kennedy's administration of "using nuclear weapons to conduct shameful blackmail, vainly hoping that the people of all countries will be intimidated and leave it free to commit aggression in various parts of the world."

The official newspaper, Peiping People's Daily, charged that "the Kennedy administration is even more obsessed and malignant than its predecessor, the Eisenhower administration, in pursuing an aggressive policy which is stubbornly hostile to the Chinese people."

The Chinese people absolutely cannot ignore the crimes of the U.S., the paper said. "Together with the other people of Asia and the rest of the world, the Chinese people will eventually settle accounts with the U.S. aggressors for their blood debts."

Straub Claims Rail Increases Hold State Back

Robert Straub, Democratic candidate for U. S. representative, told an audience at the Court House last Thursday he blamed "across-the-board percentage rate increases" to railroads as holding back the development of Oregon's economy.

He spoke at the meeting sponsored by the Young Democrats of Douglas County.

"Something is wrong with the railroad rate structure when an important railroad can haul 25,000 less carloads of lumber products in 1960 and still increase net profits for the year," he said. He pledged that if he was selected to represent the 4th Congressional District in Congress, he would make a thorough investigation of the transcontinental rate structure.

"Both lumber and agriculture, the two principal sources of economic wealth in Oregon, are being held back by the 85 per cent across-the-board rate increases," Straub said.

Straub pointed out that keeping the transcontinental rail rates competitive with other lumber producing areas in the nation is of "far greater importance to the health of our lumber economy than in the Jones act."

He concluded that approximately 95 per cent of lumber is shipped from southwestern Oregon by rail.

Montana Honored

At Seattle Fair

SEATTLE (AP)—Gov. Tim Babcock of Montana was on hand for Montana Day at the Seattle World's Fair Saturday, despite being delayed by stormy weather.

A storm which swept through the Pacific Northwest Friday grounded Babcock's plane at Missoula, Mont., on its flight from Helena, the Treasure State capital.

His plane had set down at Missoula to pick up Joanna Lester, who is Miss Montana. He and Miss Lester continued to Spokane, by automobile and caught another plane to Seattle.

Also on the program for Montana Day festivities in the fair's Plaza of the States were the Flathead County High School Band from Kalispell and the Rocky Mountain College Choir from Billings.

Gov. Babcock and his party were invited to have lunch with Gov. Rosellini of Washington aboard the heavy cruiser U.S.S. Helena, making a World's Fair visit to Seattle.

The governor rates a 19-gun salute.

The stormy weather was expected to continue.

Friday, which was Texas Day, the wind made the fair's 600-foot Space Needle sway three inches at the top, which officials said the structure is designed to do. Gusts reached 58 miles an hour.

Glendale Teacher

Gets Scholarship

Ardith Myers, sixth grade teacher at Glendale Elementary School, has received a National Science Foundation scholarship grant for the Summer Institute of Science and Mathematics at the University of Oregon.

The institute is scheduled from June 18 through Aug. 10.

The grant will pay a stipend of \$600 for the eight-week course, in addition to taking care of tuition, room cost and travel costs. The purpose of the institute, the NSF says, is to improve the subject matter background of elementary school teachers in the physical sciences.

Four courses will be given. They are geology, physical geography, meteorology, and climatology and elementary mathematics.

Delegates' Flowered Hats Rival Cherry Blossoms

WASHINGTON—NEA—Late as usual, the cherry blossoms have lingered longer than usual in this year's late spring chill.

But those hardy perennials, the hothouse orchids that bloom on the bosoms of the "Daughters of Down," the First Family was in Palm Beach for a long Easter weekend and Congress was closing up shop for a 10-day recess.

To take the place of the editors, the Republican Women's Conference celebrated its 10th anniversary in Washington, and these ladies were much easier to look at than editors.

Closing event for the GOP ladies' three-day program was a luncheon gathering at which New York's Gov. Nelson Rockefeller was principal speaker and attraction. Before the food and talk, the governor and GOP National Committee Chairman William E. Miller stood in line for an hour and a half to shake hands with nearly 1,000 women.

Singly, in pairs, trios or quartets, all the women were photographed holding hands with the governor and chairman or being politely complimented. Every woman was then given a coupon by which she could order a print to show family or impress friends.

It's from Barry Goldwater to all of you," Mrs. Williams explained, "and I want you all to know what was on the card."

"I'll get the money from the men. You get the women and the Republicans will win in November."

Rev. Bernard Braskamp, chairman of the House of Representatives, offered the invocation in which he prayed that the Republicans might be "conservative without being reactionary, liberal without being radical."

Rockefeller practically made the text for his off-the-shelf speech. "The Republican party has wasted time on what's liberal and what's conservative," he said. "We blind ourselves to the realities of today's situation. Find the right answers and we'll get the people."

The thousand Republican leading ladies—state chairwomen and the obviously affluent suburban types who contribute to the party generously—gave him a big hand as though he was their boy, though the speech he made sounded more like he was running for re-election as governor of New York than president. He didn't mention Kennedy or the Democrats once.

That was Cherry Blossom Week in Washington.

Youth Legislature

Favors Fast Time

SALEM (AP)—Committees of the 1962 YMCA Youth Legislature meeting in Salem put a do-pass stamp Friday on bills to bring uniform daylight time to Oregon and to abolish capital punishment.

These were among the chief actions of committees that met during the afternoon.

Rep. Wayne Looney, Salem, introduced the daylight time measure, aimed at giving the teenage delegates an understanding of state government.

He said it was needed to give Oregon uniform time and end confused time in the state.

Opponents of the measure contended it should be rejected because it had been voted down when it was on the general election ballot in the past.

Rep. Tom Guss, Corvallis, introduced the bill to abolish capital punishment because he said it no longer is a good deterrent to crime.

Opponents contended that it was a deterrent, particularly in cases involving narcotics.

The committee also put do-pass recommendations on bills to raise legislative salaries and require safety belts in the front seats of automobiles sold in Oregon.

The bill to raise legislators' salaries would boost them from the present \$900 yearly to \$1,200 yearly and add a \$5 a day expense allowance.

Copter Places Cross

COVENTRY, England (AP)—A helicopter lowered a half-ton sculptured cross onto the spire of Coventry Cathedral today, completing the reconstruction of the church destroyed in one of the most devastating Nazi blitzes of World War II. The \$3.78-million cathedral will be dedicated May 25.
