Graduating Students Advised To Relax

By GAILE DUGAS
Newspaper Enterprise Assn.

The weeks before graduation are busy ones.

Proper rest, well-balanced meals and constant attention to personal grooming are ingredients that will go a long way toward keeping you in good health and spirits throughout this hectic period.

One effective way to relax as exams approach is to take brief breaks, rather than trying to study for hours at a time.

When your eyes begin to tire, lie down for a few minutes with your eyes closed and a cologne-saturated cloth on your forehead. Prop up your feet on a plump pillow to reverse the flow of blood while you relax.

If you're pressed for time, you can use one of your study breaks for shampooing.

When your study session is over, hop into the bathtub and soak out the tension in warm, sudsy water.

A few days before graduation day, try on all the clothes you plan to wear—from lingerie on out. Leave everything clean and readily accessible so that you won't be faced with any last-minute crisis.

HOW'S THE FISHING?

Have you wet a line in your favorite lake or stream this spring? Smokey hopes you have and found the fishing just as good as you remembered it!

But all over America, fishermen are going to get skunked in places where they always found fish before.

If the water's high and muddy, chances are that a forest fire upstream burned off the ground cover. The spring rains ran right off, carrying top soil and flood waters into the stream, spoiling your sport.

Remember—Only you can PREVENT FOREST FIRES!
