

THE TOM TOM RESTAURANT, pictured above, located on NW Garden Valley Blvd., just west of the Highway 99 Freeway overpass, is the newest unit of the Garden Valley Shopping Center. It was opened for business today, and will continue open on 24-hour basis, employing

about 22 persons. The restaurant features both drive-in and interior booth and counter service. It is operated by Mr. and Mrs. Kenneth Waldron, formerly of Lebanon. (Chris' Studio).

Business News

OWNER-MANAGER of the Tom Tom Restaurant, which opened Friday morning at the parking lot entrance of Drive-N-Save, is Ken Waldron shown here as he checks the menu. Waldron said the restaurant has been quite busy since the doors opened despite the quiet unannounced opening.

Reedsport Eyes Realty Project

Because of tremendous pressure expected for housing in the Reedsport area with the construction of a new kraft paper mill at Gardiner, the City Council this week took steps to meet it.

Correspondent Dawn Pesseau says the council adopted a resolution authorizing an application for feasibility study funds from the federal Housing and Home Finance Administration.

The area being eyed for development is the level area of a hillcrest and surrounding wooded slopes between Highway 38 and Schofield River. The council was told a \$1½ million realty project was a potential in the area east of the city and it could include Crestview Heights tract. Preliminary data was prepared by Cornell, Howland, Hayes and Merryfield, a Corvallis engineering firm.

The engineers estimated the tract contains a potential of 760 building or home site lots, according to city attorney William Jayne. A preliminary engineering sum of \$9,100 will be sought to help cover the cost of topography maps, preliminary platting, preliminary development patterns for street, water and sewer systems and other basic data.

The area includes about 300 acres of land, much of it providing a sweeping view of the city and surrounding area.

NANCY POLLARD

... takes summer job

Eastern Girl Heads West

During the summer, many young people come to Roseburg to gain seasonal work in the woods or mills.

But it isn't very often that a young person comes from the East Coast to the West Coast to take a summer job.

However, this is the case of Nancy Pollard, 18, of Green, N.Y. A graduate from Green Central High School on June 25, she came to Roseburg to work in the office of Byrd's Market on W. Harvard Ave.

Nancy was invited last Christmas by the Byrds to spend the summer working in Roseburg and see what Oregon was like.

Met During War

Byrd had met Nancy's father, Harry Pollard, during World War II when they both were serving with the Air Force at Mitchell Field on Long Island. They have maintained their friendship.

Nancy, who lives on a dairy farm 300 miles from New York City in the middle of the state, thought it might be interesting to come west.

"It's a little different than I expected," Nancy confesses. She explained this by noting she was surprised to see the hills and fields all brown. As in the East and Middle-West, she expected things here to be green during the summer.

Since arriving in Roseburg — she flew to Portland from New York and was driven here by the Byrds — she has visited Crater and Diamond lakes and the Oregon dunes. She will visit the coast again and see the World's Fair in Seattle before the summer ends.

While at Byrd's she works in the office answering phones and checking inventories.

When September arrives, she may return to New York and attend business school in Binghampton or she may stay in the West to continue work.

Blood Tests Show Engineer Was Drunk

MISSOULA, Mont. (UPI) — A physician testified Thursday a blood test indicated the engineer of Northern Pacific's North Coast Limited was under the influence of alcohol when he took over the train one hour and 36 minutes before it leaped at high speed from its tracks June 10 near here.

NP officials testified at a public Interstate Commerce Commission hearing that the train was traveling 88-89 miles an hour with "throttle wide open" when it hurtled from the tracks on Evaro Hill 14 miles north of Missoula in southwestern Montana.

One child was killed and 272 persons injured when the deluxe passenger train carrying World's Fair tourists from Seattle to Chicago derailed.

ICC examiner Abe Goff promised a ruling on the wreck before fall. The NP officials said investigation showed brakes in the train were working but had not been applied. The speed tape recorder showed 88-89 m.p.h. when the train left the rails on a hill where controlled speed should have been 30 m.p.h.

Engineer Eldon Lynn admitted only one hour of sleep before he took the controls but denied he was intoxicated. He said he closed down the throttle and applied the brakes but they failed to hold.

NOW YOU KNOW

By United Press International The last official federal census in 1950 showed a population increase for Alaska of 75.8 per cent over 1950 as compared to a national increase of 18.5 per cent for the same period.

1961 Crime Rate Gains In Oregon

WASHINGTON (UPI) — The crime rate in Oregon increased two and one-half per cent last year, the FBI said this week.

The FBI listed 17,011 crimes for Oregon—one per every 106 inhabitants of the state—ranging from murder to auto theft.

In its report for 1961, the FBI said Oregon had 48 murders or nonnegligent manslaughter cases, 138 cases of forcible rape, 626 robberies, 430 assaults, 7,276 burglaries, 5,994 cases of larceny, and 2,499 auto thefts.

The rate was down compared to the previous year, however, for rape, assault and burglary cases. The rest showed an increase.

The report listed 10,400 offenses for the Portland metropolitan area, where the crime rate was higher than the rate for the state as a whole.

There were 1,454 offenses shown for Lane County, where the rate was slightly below the state rate.

PERSISTENT COLLECTOR

CRYSTAL LAKE, Ill. (UPI) — McHenry County state's attorney Richard Cross admitted to an angry county board of supervisors he spent \$3,150 trying to collect a \$117.07 personal property tax bill from Donald Sheldon, of Madison, Wis.

SPACE PIONEERS — Four Oregon State University graduates now employed by Bell Telephone Laboratories, have played key roles in development of Telstar, the communications satellite now orbiting the earth. They are, top left, A. K. Bohren, class of '30; top right, A. A. Lundstrom, class of '28; lower left, E. W. Houghton, class of '36; lower right, Dean Gillette, class of '48. Bohren was responsible for development and design of the antenna at Andover. Lundstrom was in charge of design and development of the horn antenna direction system at Andover. Houghton supervised the group which devised the microwave power monitor; and Gillette directed the group working on the mathematics, automatic control systems and digital computing.

Estes Defendants Head Inmate On Mail Charge

EL PASO, Tex. (UPI) — Three co-defendants with Billie Sol Estes in a 29-count federal indictment Friday pleaded guilty to mail fraud. Estes pleaded innocent to the same charge.

The co-defendants are Coleman McSpadden of Lubbock, Tex., and Ruel W. Alexander and Harold E. Orr, both of Amarillo, Tex. They are officials of Superior Manufacturing Co., which turned out the fertilizer tanks allegedly involved in the 37-year-old Estes' schemes.

Estes was scheduled to appear later in bankruptcy court. He admits to being \$38 million in debt and the court was expected to throw him into involuntary bankruptcy.

Gold Star Mothers Set Tuesday Meeting

The Roseburg Chapter of Gold Star Mothers will meet Tuesday at 10 a.m. at the home of Martha Ball, 1269 SE Main.

The Tuesday meeting is in lieu of the meeting scheduled for July 11, which was postponed.
