

Thalidomide Tragedy May Bring Stronger Laws On Drug Control

WASHINGTON (UPI) — Sen. Philip A. Hart, D-Mich., said today that the Thalidomide tragedy had improved prospects that the Senate would enact stronger drug control laws.

Hart was among several lawmakers who spoke out over the weekend in favor of stiff drug laws following the furor over Thalidomide which has caused the birth of deformed babies.

Assistant Senate Democratic Leader Hubert H. Humphrey, Minn., proposed a five-point program designed to end what he described as "government confusion" and faulty co-ordination in the handling of drug research data.

Sen. Jacob K. Javits, R-N.Y., declared that federal regulations on drugs "very materially need tightening up." He stressed the need for better co-ordination between the National Institutes of Health and the Food and Drug Administration.

Hart was one of the signers of a minority report when the Senate Judiciary Committee approved a drug measure earlier this year. He criticized the committee's bill as too limited in scope.

"But this bitter, tragic chapter (Thalidomide) will insure that more attention will be paid to the minority views," he said in an interview.

Amendments Prepared

Hart said that he and other senators would be armed with "strengthening amendments" when the committee bill is called up in the Senate.

He said they will include proposals that the FDA be authorized

to determine whether a drug manufacturer's product meets advertising claims, as well as safety standards, and require the agency to demand proof that the drug was used experimentally on animals before it is licensed for sale.

Humphrey, in proposing his new program, said that "up to now there has been a shocking lack of co-ordination between U.S. agencies on drug information."

"Many agencies, including the Department of Health, Education and Welfare, have been improving their obsolete systems with the speed and drive of a tranquilized turtle," he said.

Five-point Program

Humphrey proposed:

—Legislation assuring the FDA thorough control over investigation testing on humans, and requiring tests on laboratory animals prior to human tests.

—Inter-agency cooperation in drug research including reporting of drug reactions in hospitals operated by the Veterans Administration, Defense Department and Public Health Service.

—An educational campaign by the Public Health Service and medical groups to caution physicians and patients against "casual, needless use of drugs."

—Establishment of an information center in the Public Health Service as a clearing house for data from public and private sources.

—Up-to-the minute exchanges of information on drugs between the United States and other nations in the World Health Organization.

Appeal Dismissed

A memorandum opinion by Judge Don H. Sanders in the matter of realignment of Plat K, Road No. 75 in Douglas County on motion by district attorney seeking an order to dismiss an appeal in this case on grounds that a timely petition for damages was not filed by appellants as required by law.
