TOTAL PERFORMANCE:

FORD GALAXIE 500 XL SPORTS HARDTOP

YOU'LL KNOW WHY SHE DOESN'T FEEL THE BUMPS...WHEN YOU TEST-DRIVE FORD'S NEW '10,000,000 RIDE

the 1963 Ford gives you a ride every bit as smooth as cars costing hundreds more, and for two reasons: a revolutionary new suspension system... and added road-hugging weight.

It took ten million dollars to develop the new Ford ride. We designed a revolutionary new suspension system for the '63 Ford. Where ordinary suspensions move only up and down to absorb road shock, the Ford suspension moves backward as well. In this double-action suspension system, coil springs up front and leaf springs in the rear combine to give you firmness in cornering and a special smoothness over the road.

We added weight, strength and stability. The new Ford is now actually hundreds of pounds more car than any other car in its class. This remarkable weight advantage is in the suspension, frame, and body. And, as you know, this added weight means a more stable ride.

But a solid, road-smoothing ride is only part of Ford's total performance story for 1963. Look how Ford swept the field this

year in the grueling Daytona, Riverside and Atlanta 500's and in the demanding Pure Oil Performance Trials. Only a car with total performance—the best combination of strength, balance, precision control, braking power and road-clinging suspension—could roll up so many wins.

Before you buy any new car, test-drive a Super Torque Ford. If you haven't driven one lately, you can't really know what a new Ford is like. Make this important discovery—if it's built by Ford, it's built for performance... total performance.
