## it's ELECTRIC HEAT!

Building or remodeling? Remember — ELECTRIC HEAT, utilizing pure, clean energy rather than messy burning fuels, is the only truly new and modern way of heating under the sun! And it's the most adaptable. There are electric heating devices — simple, inexpensive and worry-free — to fit homes of all sizes, shapes, and decor — and to fit every living area, every need, within the home. A few to choose from:

**RADIANT CEILING CABLE:** Provides exceptionally even heat. Completely concealed in your ceiling. Very inexpensive to install.

**ELECTRIC BASEBOARD:** Installed around outside walls, take up no valuable wall space. Created to blend with any decor. Especially adaptable to new rooms and wings.

**ELECTRIC WALL PANELS:** Especially adaptable to small rooms. Installed in or on walls, with decorative grills or flat, heat-radiating surfaces.

**HEAT PUMP:** Heats and air-conditions, according to your needs! Thermostatically-controlled heat pump means complete and automatic climate control in your home! Very economical to operate. Initial cost compares favorably with traditional (and out-moded) central heating and cooling systems.

AND THERE ARE MORE! Investigate thoroughly before you decide.
