

Ordinance Paves Way For Annexation Meet

An ordinance calling for public hearing on proposed annexation of a large section of property in the northwest area of Roseburg was approved by the City Council Monday night.

The hearing was set for July 22 at 8 p.m.

Involved is a tract of land known generally as the Garden Homes Subdivision. Property owners in the area initiated the annexation proceedings by petition. Their action is prompted by a desire for sanitary sewers.

In connection with the proposal, the council voted to enter into an agreement with the Corvallis Engineering firm of Cornell, Howell, Hayes and Merryfield on furnishing engineering services for sewerage in the Garden Homes area.

Three other ordinances were okayed. One gives the council power to set rules and regulations on work undertaken privately on streets by property owners. Purpose of the ordinance is to give the city control over street work and particularly over the use of objectionable oils used in "dust oil-

ing" applications.

Director of Public Works Kenneth Meng recently suggested a policy for temporary street oiling under certain conditions. This policy was reviewed again by the council Monday but was referred back to the Public Works Department for revision.

Aim of the policy is to eliminate dust oiling, provide acceptable substitutes for dust oiling under certain conditions and encourage permanent-type street improvements. The new policy will prohibit changing the condition of the street surface without first securing a permit from the Public Works Department. Certain oils are to be prohibited. In some situations, "dust oiling" will be allowed on a street project basis.

After third readings, ordinances were approved granting U. S. Plywood Corp. a franchise to operate and use a railroad track starting near the intersection of NE Diamond Lake Boulevard and SE Jackson Street and running to the U. S. Ply plant, and another granting the Oregon Broadcasting Co.

Glide Board Lets School Bus Contract

The Glide School Board awarded the contract for a new 65-passenger bus to Barcus Motors at its Monday meeting, reports correspondent Mrs. Arthur Selby.

Barcus Motor's bid was \$6,607 f.o.b., Lima, Ohio. Other bidders according to Supt. Donald Fluke were Sig Fett, Mock Motors, Lockwood Motors and Hansen Motors. The new bus will have a Dodge chassis with a Superior body. The board traded in a 1951 48-passenger bus on the new vehicle.

Contracts Given

Also awarded were contracts to furnish oil and gasoline for the Glide and Deer Creek schools. Texaco Oil's bids were accepted to furnish oil at Deer Creek at the cost of 1187 cents per gallon, and to furnish gas for Deer Creek and Glide at 2610 and 1914 cents per gallon, respectively. Union Oil was awarded the contract to furnish oil at the Glide school at a cost of 4-0625 dollars per barrel.

Other bidders were Shell Oil, Tidewater Oil, Signal Oil, Mobil Oil and Standard Oil.

Mrs. Nina Walker was hired by the school board to teach in the upper elementary during the 1963-64 school year. Mrs. Walker has taught for the past two years at Baker, and previously taught in the Winston-Dillard school system.

Coach Hired

Wiley Winchell will teach English and serve as head track coach at Glide High School next year. Winchell had formerly been employed as a teacher in the Glide upper elementary school.

The board accepted the resignation of Robert Miller. Miller resigned to accept a position at Central High School of Monmouth Independence. He has been at Glide High School for the past six years, teaching biology, world problems, physical education and senior math. In addition, Miller had served as an assistant football coach, was head track coach and was dean of boys.

The next meeting of the Glide School Board will be held July 8.

NEW LION LEADER — Aubrey D. Green of York, Ala., has been elected president of the Lions International, Lions International, which is best known for many youth programs, community service projects, sight conservation activities and aid to the blind, has 672,000 members in 121 countries. It is the world's largest service club organization.

Court To Request Bids For Boat Basin Dock

The Douglas County Court will open bids July 1 for construction of a floating small boat dock in boat basin number three at Winchester Bay.

The county is planning a 400-foot dock complete with approach ramp, finger pier piling and water line. This will be the first in what may amount to an eventual four-dock development. Added construction will come with demand.

The 400-foot dock will provide stalls for 50 boats. Spaces will be rented by the county.

Estimated cost of the project is \$18,000.

George A. Smith

Funeral services for George A. Smith, 89, a resident of Roseburg who died June 21, will be held at Wilson's Chapel of the Roses, 965 W. Harvard, Wednesday at 2 p.m. The Rev. Donald Smith of the Westside Christian Church will officiate. Private committal services and interment will follow at the Roseburg Memorial Gardens.

Smith was born Oct. 25, 1873 in Camas Valley. He had lived in Camas Valley all of his life before moving to Roseburg a few years ago. His wife Mary preceded him in death in 1953.

Smith is survived by one sister, Mrs. Ella Nelson of Reedsport, and one brother Dan Smith of Camas Valley.

George Dillard Wilson

Survivors not previously listed of George Dillard Wilson, formerly of Sutherland who died at 63 in Salem Sunday, include two sisters, Mrs. Minnie (King) Jolly of Port Orford and Mrs. Elvin (Lenora) Hess of Sitka, Alaska; brothers, Lloyd Wilson of Sutherland, John Wilson of Gold Beach and Harry Wilson of Anchorage, Alaska; and several grandchildren.

Memorial services are scheduled for Wednesday at 10:45 a.m. at the Episcopal Church in Coquille.

Producers' Request Too High, Say Milk Distributors

SALEM (UPI)—Farmers generally agreed Monday on a price of about \$5.87 per hundredweight for class 1 milk at the first of a series of meetings on Oregon's new milk price stabilization law.

Distributors claimed the price was too high.

Hugh Gallagher of Carnation Company, Portland, said \$5.50 "could be a 'reasonable price.'"

His firm dropped the price it paid to \$5.50 from \$5.86 on June 1. Farmers charged Carnation was trying to force prices down under the new stabilization law.

Percentage Rise Asked

D. P. Shoup, manager of the

Oregon Milk Producers, called for a base price of \$5.50 per hundredweight for 3.5 per cent butterfat milk, to be increased 7 1/2 cents for each additional tenth of per cent of butterfat content.

Under this formula, farmers would receive \$5.87 1/2 for 4 per cent class 1 milk. The price under the temporary stabilization law which expired in January was \$5.86.

Glen Richards of the Independent Milk Producers Assn., Portland, supported Shoup's formula, as did Dick Westenberg, manager of United Milk Producers.

Ben Magill, producer from In-

dependence, charged the price was too low, and said 122 Oregon milk producers were driven out of business last year.

He said "I'm tired of hearing talk about a \$5.86 price, farmers don't get that much."

He claimed farmers were getting only \$3.90 to \$4.04 for milk.

Agree On Fee

Most of the witnesses agreed a 1 1/2 cent per hundredweight fee should be charged producers for administering the new stabilization law.

There also was general agreement on an agriculture department plan to establish a three-

zone market area. One zone would include Curry County, another would include the Eastern Oregon area of Wallowa, Union, Baker, Grant, Harney and Malheur counties. The remaining 29 counties would make up the third market area.

Under the new law, all handlers must get permits by July 4. Marketing areas and prices must be established by Aug. 3, and market pools must be in operation by Oct. 2.

A hearing was held in Eugene today with another scheduled at Gold Beach Wednesday and a fourth at Baker on Friday.

Arrangements to Suit Everyone

Now's your chance to save on a wardrobe full of cool cotton sport sets. Penney's trim jamaicas in your favorite solids topped with smart tailored blouses in a color-cued array of prints 'n plaids.

TOTAL PERFORMANCE:

IF YOU KNEW WHAT THIS "CAR KILLER" KNOWS...YOU'D BE DRIVING A SOLID, SILENT SUPER TORQUE FORD

This steel-edged pothole is probably the world's toughest test of a car's suspension. We drive into this car killer at 30 mph, locking our brakes as we go so the wheels can't roll through the hole as they normally would. The car slams against the far edge of the hole with such impact that it literally bounds out.

If you added up the cumulative effect of all the jars and jolts your car's suspension system experiences in years of normal driving, it wouldn't match the impact of one trip through the hole. Yet—a Ford must run this test three times to prove its strength.

How can a Ford take it? Because Ford's front suspension has extra beef in spindles, springs, suspension arms—in fact, it's about 20 pounds heavier than the front suspension of our principal competitor's car.

We don't expect you to abuse your car the way we do our test cars. But, however you drive, you'll welcome the extra strength of a total performance Ford. Ford strength is tested in a thousand ways in Ford's laboratories and proving grounds—and in open competition in the world's toughest rallies and stock car events.

Look at Ford's astounding record in open competition this year in the grueling Daytona, Riverside, and Atlanta 500's, the World 600 at Charlotte, N.C., and in the demanding Pure Oil Performance Trials. Only a car with total performance—the best combination of strength, balance, precision control and road-clinging suspension—could roll up so many wins.

Before you buy any new car, test-drive the solid, silent Super Torque Ford. If you haven't driven one lately, you can't really know what a new Ford is like. Make this important discovery: if it's built by Ford, it's built for performance...total performance.
