

NEW DENTAL BUILDING — Pictured above is an architect's sketch of the new dental clinic in Sutherlin of Dr. Clifford J. Hein. The building has just been completed and occupied by the Sutherlin dentist. It contains 1,200 square feet of floor space.

VERNON NYE will be in Roseburg Aug. 19-23 to instruct in water color painting. Nye, chairman of the art department at Pacific Union College, Angwin, Calif., was here also a year ago.

U.S. National Lists Increase In Businesses

The Roseburg branch of The United States National Bank of Portland had total deposits of \$18,173,983.59, according to figures released to the comptroller of the currency on June 28, reports Manager H. E. Schmeer.

Loans and discounts for the local branch were listed at \$7,585,043.94. The bank for its statewide system reported loans and discounts continued to rise during the past 12 months.

Total loans were at \$549,322,230, which was \$106 million above the figure for a comparable period in 1962, and \$21 million over the previous three months. The June 30, 1962, figure was \$442,923,666. On March 18, 1963, loans and discounts stood at \$517,861,003.

Deposits increased \$72 million over last year's amount of \$881,010,767, and are now at \$952,937,987. There is also close to \$11 million more than was recorded in March of this year.

U.S. National during the last 12 months opened new branches at Stayton, in Portland at Burlingame, Sunnyslope in Salem, Primeville, and Lakeview. Branches are due to be opened this year at Interstate and Going and at 4th and Montgomery in Portland, and at W. 7th and Chamber in Eugene. An Oregon Campus branch will open in the fall near the University of Oregon campus.

New buildings were constructed during the last 12 months at Bend, Madras, The Dalles, and West Salem branches. Other new buildings are now under construction at Stayton and the Milwaukie-Powell branch in Portland.

Roseburg Area Economy Good Despite Strike

The overall economy in the Roseburg area for June continued at a level comparable to that for May, considering that approximately 350 workers are involved in a labor dispute directly affecting the lumber and wood products industry.

This was the summation of F. C. Riley, manager of the Roseburg office of the Oregon State Employment Office, in his monthly report. Construction activities continued at a high level. An increase was noted compared to May as well as June 1962. Wholesale and retail trade activities are below what is usually expected for this time of year, and this is largely attributable to the untimely cool and somewhat adverse weather.

During June 86 young people under 22 years were placed in various types of employment by the local office. The active file of job applicants numbered 639 individuals, both young people and adults. The majority of these are in the semi-skilled, clerical and sales and service occupations. Persons who can use one of these workers is asked by Riley to call his office, 673-5586 or visit the office at 846 SE Pine St.

New job applicants numbered 296, compared with 267 in May and 442 in June a year ago. There were 190 job placements compared with the same in May and 183 in June of 1962. Initial unemployment claims stood at 377, compared with 624 and 321, respectively, and the average weekly number who claimed a week of joblessness was 423, 816 and 470.

Roseburg had the lowest per cent of insured unemployment among listed Oregon cities, compared with the average covered employment. This percentage figure was 3.4, as against 3.8 four weeks ago, 3.5 a year ago, 4.3 two years ago and 3.1 three years ago. The Roseburg total was below that of the state at 3.9, Grants Pass at 4.7; North Bend 8.1 and Eugene 7.2.

Sonny Commons Will Manage Arctic Circle

E. G. (Sonny) Commons arrived in Roseburg earlier this week from Idaho to make arrangements for the opening within another week or so of what will be known as Sonny's Arctic Circle.

The building to house the business is now being constructed on W. Harvard Blvd. on the north side of the street in the vicinity of Roseburg High School.

The business is owned by the Arctic Circle, Inc., with headquarters in Salt Lake City, and will be operated by Commons. It will feature primarily ice cream products, along with chicken, hamburgers and soft drinks. Commons said the place will employ up to 12 persons in peak periods on two shifts.

The block building was erected at a building permit figure of \$15,900, but another \$18,000 worth of equipment is being installed. This is in addition to the property cost. The parking area has been blacktopped. The building has an enclosed area for people awaiting orders.

Mr. and Mrs. Commons have a married daughter, Mrs. Merlyn Gubser in Eugene, and a son, Gary, third-year student at Oregon State College. Commons and his wife, Maxine, are living at 2438 W. Crestview Dr. They formerly lived at American Falls, Idaho, where they operated a wheat farm. They have sold the farm.

Arnold Named Pacific Wool Growers Head

Bruce Arnold, a man well known in Douglas County where he has judged many wool shows, has been named new manager of the Pacific Wool Growers, which has its head office in Portland.

He succeeds R. A. Ward. Arnold, with 23 years of experience in the wool marketing field with Pacific Wool Growers, will continue to supervise all warehouse operations, including the grading and handling of wool. He will also continue supervision of all field work which has resulted in his personal acquaintance with nearly all sheep men in the Northwest.

As former assistant manager, Arnold played a leading role in the development of the Pacific International Livestock Exposition Wool Show into the largest of its kind in the U.S.

Pacific Wool Growers is the only cooperative wool marketing organization in the Northwest and serves 4,000 wool producers in Oregon, Washington, Western Idaho, Northern California and Alaska.

Natural Gas Due Roseburg Sept. 15

Construction Now Started On Main Line

Roseburg will be served with natural gas by fall of this year. Other Douglas County cities along the gas line to be built from Eugene can expect the service in 1964.

This was the information from Al Parr, Roseburg manager for California-Pacific Utilities, and J. S. Richards, gas engineer, working out of the Medford office. Richards was in Roseburg this week checking over plans for local construction, and will be spending considerable time here during the next three months.

El Paso Gas Co. has started construction on a multi-million dollar line to connect with a previously constructed gas line at Eugene and extend south through Cottage Grove, into Douglas County. The line will in general follow the Bonneville and Pacific Power & Light Co. rights of way south.

To be constructed are three miles of 16-inch and 125 miles of 10-inch lines, which will run about two miles west of Sutherlin, and west of Winchester to cross the North Umpqua River near the Roseburg Country Club. It will then cross the South Umpqua River at the Melrose road about 3.5 miles west of the Roseburg city center or one-half mile west of the city limits. The line then will go south to Myrtle Creek, east of Canyonville and on south to Grants Pass.

The line at the latter city will connect with another now under construction to Ashland, a distance of 56 miles.

El Paso plans to spend 7 1/2 million dollars on its main line and Cal-Pac another 5 1/2 million over a five-year period to hook up the respective communities along the way and expand service. The Grants Pass - Ashland line is costing another 1 1/2 million dollars.

Parr made it clear that only Roseburg in Douglas County will get natural gas this year, sometime around Sept. 15, when the construction work is expected to be completed this far. The line then will be activated with that of existing city lines, which were converted during a major reconstruction program here in 1962.

The work, to start at Eugene the first of next week, is expected to be completed through to Grants Pass by October. Provisions for pressure reducing gate stations will be located on the line adjacent to Sutherlin to serve the Sutherlin-Oakland area; at Winchester, Roseburg, Dillard, Myrtle Creek, for the Myrtle Creek-Riddle area; Canyonville and Glendale. Service to these cities, except Roseburg, will be set in time in 1964, as those towns have no facilities within the city to be activated.

The Roseburg gate station for metering and pressure reducing will be located on a 30-by-40-foot tract on the Melrose road, where a 16-by-20-foot building will be erected inside a fenced and landscaped area. Here pressure will be reduced from about 125 to 25 pounds for local consumption.

Pipe Line To City Center
An 8-inch line will be laid in the ground from the station along the Melrose Road and east on W. Harvard Blvd. in the vicinity of the Stewart Park - Veterans Hospital road. A six-inch line will continue into the Cal-Pac plant at Oak and Spruce Streets.

After natural gas is made ready, the plant facilities at that site will be dismantled. The large propane tanks at the plant site will be used only for rural tank gas operation.

Construction on the Roseburg line and other facilities will start about Aug. 1, said Richards. About \$130,000 will be spent for the city service, broken down as follows: 8-inch line 2.5 miles, \$80,000; 6-inch line, 1.3 miles, \$32,000, total \$112,000. The Roseburg gate station on the Melrose Road will cost another \$18,000, and the Roseburg plant modification, \$10,000.

Nazarene Church Being Remodeled

Extensive remodeling has begun on the old church building of the First Church of the Nazarene, 1134 SE Douglas Ave.

Currently, according to the pastor Edward J. Gallup, the tower in front is being removed, and the roof is being cut back to give it a hip-type front end.

The remodeling is following lines similar to the architecture of the new adjoining educational unit, which was completed about a year ago.

This is the first step in plans for complete remodeling of the building. The walls will be left standing, but later in the year, or when the work can be undertaken, the interior will be redone along modern lines.

L. W. Metzger is contractor on the present work.

FOR RENT
ROSE ST. BUILDING
80 x 110. Now occupied by Lockwood Motors. Available about August or September. Will remodel to suit tenants.

Market Outlook Is Mixed For Logs, Lumber, Cones

The open market for logs in Western Oregon is beset by a number of uncertainties, but appears generally favorable for the next six months with demand expected to remain fairly high, says C. F. Sutherland, Oregon State University extension forest economics specialist, in the new Oregon Farm and Market Outlook. Copies of the outlook circular are now available from county extension offices.

Housing economists predict construction during the remainder of 1963 will match the pace set in 1962 when builders erected almost a million single family dwellings, he said.

Canadian competition continues to be a primary factor affecting Oregon lumber and log prices, he noted. In the first four months of 1963, Canadian softwood producers shipped 1.3 billion board feet of lumber into the United States to mark a gain of 1.6 percent over the year-ago level.

Sales Tax May Hurt
A new Canadian manufacturers' sales tax of 11 per cent on all construction materials used in Canada may shift more of that country's lumber into the export trade, Sutherland warned.

The October slowdown continues to hang over the industry as owners push to beat insects to the affected areas. Paradoxically, Sutherland said, the labor dispute may actually improve the market for the small owners' timber. The strike has pushed prices

for lumber and plywood higher and shifted production to smaller mills which are always more active in the open market for logs.

Hardwoods will probably continue to move well in most Western Oregon counties, Sutherland said. Furniture sales have been excellent and are expected to approach 1962, a record year in the industry. Hardwood lumber producers have been pressed to find an adequate supply of high quality logs to meet the demand for alder and maple furniture stock, he noted.

Seed Prices Good
Prices for Douglas fir seed should be fairly high this year since supplies will be scarce, he continued. Commercial seed buyers and OSU geneticists forecast a very poor crop of Douglas fir seed in Northwest Oregon this fall.

Low production of female cones plus poor pollination because of a wet, cold spring reduced production and insects have attacked much that remains, he reported.

A strong market is expected next fall for high quality Christmas trees, particularly for cultured Douglas fir. A ready market should also be available for grand fir and Oregon shore pine. The major markets for Oregon producers will continue to be in California, although the Portland area will provide an important outlet for many producers, Sutherland said.

Arthur Crossley Takes Loan Company Position

Arthur G. Crossley of The Dalles has arrived in Roseburg to take over as management trustee for Umpqua Savings and Loan Association. He replaces Harley Duns, who has taken other employment. Crossley is married and has three sons.

Instruction In Water Color To Be Given By Vernon Nye

Vernon Nye, chairman of the art department at Pacific Union College, Angwin, Calif., will be in Roseburg Aug. 19 through 23 to give instruction in water color painting.

There will be a field trip to a different location daily. Each artist will be responsible for his or her transportation and each is requested to bring a sack lunch.

Any person 16 years or over is eligible. Nye's class last summer reportedly was very successful. One of the paintings he made on the Umpqua received an award at the DeYoung Museum in San Francisco.

Nye, born in Batavia, N.Y., received his art training at the

Rochester, N.Y., and the Corcoran Art School in Washington, D.C. He was engaged for several years in commercial illustration prior to coming to California.

Dr. Clifford Hein's New Dental Clinic Open In Sutherlin

The new dental clinic building for Dr. Clifford Hein, Sutherlin, has been completed and is now being occupied. It is located at First and Umpqua Streets.

The building consists of 1,200 square feet. The waiting room features glass wall facing the street, with birch paneling and exposed center scored block interior walls.

A built-in desk is provided for the use of small children. The business office has a built-in desk, counters, and cabinets, with birch wall paneling.

The three operating rooms and private office open to the interior landscaped courtyards with sliding glass doors. A built-in vanity is provided near the corridor exit for the use of patients.

All exterior walls are concrete block masonry. A plastic screen provides privacy for the operating rooms. Also included are a complete laboratory, darkroom, storage room, heating room and toilet facilities. Off-street parking will provide for eight cars.

The building was designed by the architectural firm of Burman and Rasmussen, Robert J. Burman, architect A.I.A. of Glendale, Calif. Marsh Construction Co. of Grants Pass was the general contractor.
