One of the well-known, man-made wonders of our modern world differs greatly from other famous engineering achievements in several ways. For instance, it

Kansas Trip Made By Melrose Folks

By NETTIE WOODRUFF

Mr. and Mrs. W. A. Morgan and children have returned to their home on Doerner Road in Melrose following a month's trip to Hutchinson, Kans., where they visited the former's two brothers and a sister. At Jay, Okla., they visited Mrs. Morgan's parents and with the Morgan's daughter, Mrs. Joyce Blakey, at Miami, Okla. They spent some time in South West City, Mo., with Morgan's parents and also visited Mrs. Morgan's sister, Mrs. Dora Johnson, in Oklahoma.

Mr. and Mrs. William Anderson and two daughters of Portland spent the weekend with Mrs. Anderson's parents, Mr. and Mrs. Byron Hawkins.

Mr. and Mrs. Thomas Hutton enjoyed several days recently vacationing in Long Beach and Ocean Park, Wash., where they went clam digging.

Mr. and Mrs. Jack Katzenmeyer and Mollie and Max left Saturday for their home in Milbrae, Calif., after a visit with her parents, Mr. and Mrs. Arthur Herrman. They had been to Alaska where they visited Katzenmeyer's father. On their trip north they stopped in Melrose and enjoyed a family picnic at the Herrman home and were joined by Mr. and Mrs. Dale Herrman and children, Dalan, Chris and Dredia.

Mr. and Mrs. G. E. Ward and son of Boise, Idaho, spent a week with his brother, Kenneth Ward, and wife and three daughters in Melrose.

Mrs. Darrel Cooper and family have returned home following a month's visit in Merrill with her parents, Mr. and Mrs. Dan McAuliffe, who brought her here.

Mrs. Norman Atherton was rushed to a Eugene Hospital recently after suddenly taking ill. She is reported to be improving. Accompanying her to Eugene were Mr. Atherton and Dennis and Mrs. Ed Damewood.

Recent visitors at the C. A. Coffell home were her sister, Mrs. Eva Currie, of Bridge, Mont., who spent a week here, and the latter's daughter and family, Mr. and Mrs. Darrell Crossler of Salem, who spent the weekend.

Marcia Cooper, Carol Allen and Jean Patrillo took part in the Fleet Days celebration in Reedsport recently.

Mr. and Mrs. Joe Strickling and children of Klamath Falls spent the weekend with her mother, Mrs. Scott Stidham, and her brother, Bill.

primary purpose, other than profit, is to entertain, educate and even inspire those who visit it. It is Disneyland of California.

Another important difference, of interest to owners of timberland, is that wood has been used as one of the major materials in its construction. While other famous structures, such as great dams and suspension bridges, have utilized this material in the process of construction, it has not been retained as an important part of the final structures, except possibly for foundation piling. Disneyland, however, differs in this respect, as described in a recent issue of the "Wood Preserving News."

Wood plays a major role in construction everywhere in this internationally-known park showplace, including ties for the railroad, piles for docks, piles and lumber for retaining walls and dozens of other ordinary uses.

Unusual things, such as wood substructures for miniature mountains and waterfalls, were built with such precise attention to detail that they appear as if nature created them. Also, in order to preserve the wood, located in damp places where fungi and termites thrive, it was pressure treated with the best wood preservative chemicals.

Retaining walls which are a necessity for natural embankments and fills at tunnel entrances and other locations were also built of pressure treated wood.

"Disneyland's small man-made mountains are craggy, rock-faced formations that appear as if they had been there since glacial days," says the article. Visitors seldom realize that they are hollow and often house motors and pumps that make waterfalls flow. These mountains are supported by pressure creosoted poles of varying lengths, with treated wood struts attached. This sturdy framework is covered with metal lath topped by cement-mortar stained and painted to natural hues.

Conventional Uses
More conventional uses for wood include a large log cabin housing souvenirs and wood ties for the narrow-gauge track of the Disneyland and Santa Fe Railroad that circles the showplace. Docking facilities for the Mark Twain steamboat are also constructed of treated piles and lumber.

Major suppliers for all of these poles, piling and lumber include West Coast firms, who undoubtedly obtained much of their raw materials from the Pacific Coast forests.

Should anyone doubt the importance of wood to our national economy, here is evidence of wood's wide adaptability to many uses. Therefore, continue to manage your timber as a crop and protect it from fire and other enemies. It is our only renewable natural resource and deserves your full attention.

Fire At Klamath Falls Brought Under Control

By United Press International
A pesky 550-acre timber and brush fire southwest of Klamath Falls was contained again Sunday night.

About 80 men working with tractors drew lines around the man-caused blaze, which began Friday on Hammaker Mountain. The fire on state-protected land was contained Saturday but high winds carried the flames beyond the lines into more timber.

Now You Know
By United Press International
Poisonous moonshine whiskey has claimed more than 200 lives in the United States during the past 10 years, according to a trade publication of the nation's distilled spirits industry.

Fifteen fires broke out on state-protected land Sunday including a 200-acre brush blaze near Pendleton. The other 14 burned over a total of 76 acres.

Twelve were set by lightning and three were man-caused. Fourteen small lightning-set fires broke out in the Walliwa-Whitman National Forest.

A PREGNANT SITUATION
DODGE CITY, Kan. (UPI)—The forgery charges facing the suspect were important; but another event was more immediate. The sheriff asked when it could be expected.

"Today," said the suspect, a pregnant woman. She was hastily released and the hearing postponed.

Treaty May Signal New East-West Agreements

LONDON (UPI)—U.S. and British officials will use Monday's signing of a partial nuclear-test ban in Moscow as a springboard to explore what cold war issues can best be done, diplomatic observers said today.

British diplomats hope the test ban treaty, banning nuclear explosions in the atmosphere, on the ground and under water, may open up prospects for other East-West agreements in "step-by-step moves" later this year.

The British hopes stem from the expectation that Premier Nikita Khrushchev, having virtual-

ly broken with Red China, now has a freer hand to negotiate with the West.

Britain believes the Soviet leader may have reached the crucial stage where he feels he must prove to his own people and to Communists elsewhere that his policy of "peaceful co-existence" is paying off.

British and U.S. negotiators hope to sound out Khrushchev's intentions, to determine just how sincere the Soviet leader is in his professed peace drive and how far he intends to go, diplomatic sources said.

The Allies have agreed in ad-

dition to any specific accord but merely to set up negotiating machinery, once they have explored Moscow's designs.

The immediate issues to be discussed are, according to present indications: East-West non-aggression arrangements in Europe, means of preventing the spread of nuclear weapons, measures against surprise attack and against war by miscalculation.

Officials here say Khrushchev gave strong indications during the test-ban talks in Moscow he does not want to force the issue of East German recognition at present.

Officials here say Khrushchev gave strong indications during the test-ban talks in Moscow he does not want to force the issue of East German recognition at present.

my's ace of clubs and continue with the queen. Unfortunately for your purposes East plays low.

You discard and West wins the trick with the king. Now if he leads a spade you go down two, but you have worked out a neat bit of camouflage. Your discard on the queen of clubs was the nine of diamonds. West is pretty sure that his partner holds an ace. It now appears that it is the ace of diamonds so he leads a diamond whereupon you take the rest of the tricks because you can discard two spades on clubs and one spade on the king of diamonds.

Improve your bridge game! order your copy of "Win at Bridge With Oswald Jacoby." Just send your name, address, and 50 cents to: Jacoby Bridge, News-Review, P. O. Box 1248, Roseburg, Oregon and a copy will be mailed to you. Or if you prefer, copies may be purchased at the News-Review office.

Q—The bidding has been:
East South West North
1 ♠ 1 ♥ Pass 1 ♠
Pass 3 ♣ Pass 3 ♠
Pass ?

You, South, hold:
♠ A Q J 7 6 5 ♣ A K 8 7
What do you do now?
A—Bid four clubs. You have two very good suits.

TODAY'S QUESTION
Your partner continues to four spades. What do you do now?
Answer Tomorrow

hand was constructed by Jose Le Dentu, a French writer as a problem in play.

Of course if West opens a spade there is no problem in play, but West opens the six of trumps. At this point South can make the hand against any defense and I will devote tomorrow's article to this double dummy play, but the first problem is to find out the best line of play if you are actually at the table playing the hand normally.

If East holds the king of clubs you can make 12 tricks easily, so the normal play is to lead dum-
