

GAS LIGHTING, mellow as moonlight, provides cheery welcome and adds touch of elegance to this modern home.

CITY REPIPED

Explosion Paves Way For New Gas System

The preparations in Roseburg were soon quelled by the official report that release valves were started early — but it wasn't keeping pressure down, and no danger was involved. They resulted from Roseburg's greatest disaster, the Aug. 7, 1959, explosives truck blast which ripped the heart out of the downtown business section of the city. The explosion ruined the California Pacific Utilities office and raised havoc with downtown gas lines. At one time during the height of the confusion, people were running pell-mell from the blast scene because of the fear the storage tanks at Spruce and Oak would blow up. However, this terror

A LAUNDRY ROOM adjacent to the kitchen is the dream of nearly every modern homemaker. This one abling mother to catch up on her mending and laund-contains a desk, sewing machine and gas dryer, entering while assisting the children with their homework.

Hours Lopped By Gas Dryer

Women who use automatic and energy gas dryers save time, energy and money when compared with those who dry clothes on how you may now "waltz" clotheslines, according to the American Gas Association.

Statistics indicate that gas dryers save homemakers hundreds of hours of work each year. The energy saved each week is equivalent to the amount it would take to climb a ladder six and a half miles high.

Women who carry heavy wash baskets out to the clothesline lift and haul literally tons of weight each year. Modern gas dryers eliminate this arduous chore and save precious hours in the doing.

Dryer owners save dollars, too, A.G.A. reports, since they buy half as many clothes as those who do their laundry manually. Families with dryers definitely save time, money

PUSH BUTTON of dryer above automatically selects perfect drying for all types of fabrics.

low-cost heat

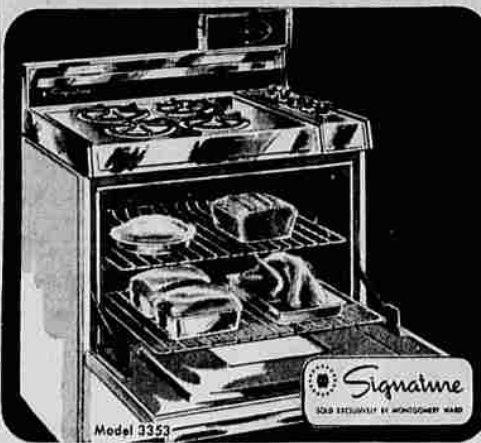

for commercial or industrial buildings

Carrier Gas-Fired Unit Heaters are easy to install, give quick even heat. Special 18-gauge ALUMINIZED STEEL heat interchanger resists corrosion, lasts longer. Modern, compact cabinet blends in with any surroundings. Eight sizes: 50,000 to 230,000 Btu/hr. A.G.A. approved for use with all types of gas. Call:
