Gromyko German Visit Worries West

BERLIN (UPI) — Western officials are now concerned that Soviet Foreign Minister Andrei Gromyko's visit to East Berlin might result in new pressure against allied rights in the city.

Gromyko flew here Friday night on his way back to Moscow from the United Nations and immediately conferred with East German Communist chief Walter Ulbricht. The East German news agency said their talks included "regulation of the West Berlin question," which means Communist demands for a demilitarized "free city" of West Berlin and the withdrawal of Western troops.

These demands are not new, but Western officials were worried because it is the first time

they have been revived since the East-West thaw that began with last summer's nuclear test ban agreement. There was also concern over the Soviet harassment of allied troop convoys between Berlin and West Germany in the past two weeks.

Observers here believe Gromyko's remarks indicate that the convoy incidents were not incidental or low-level mixups, as many had hoped.

Gromyko stressed the same theme Friday night in a stop-over in Prestwick, Scotland, before flying to East Berlin. "The status of West Berlin should be abolished, and a free state established," he said. "We will continue to stress the importance of this despite the fact some Western statesmen underestimate the importance of this (nuclear) treaty."

Gromyko also told newsmen at Prestwick that the progress in East-West talks "could not be worse."

"To be frank, the state of affairs in our discussions is bad," he said. "We are making no progress whatsoever."

Gromyko, who conferred in New York with Secretary of State Dean Rusk and Lord Home, British foreign secretary who will become prime minister, said the Soviets "have been carrying the whole burden of disarmament on our shoulders."

"But whether we shall be able to convince our partners state established," he said. "We have proposed certain steps towards the lessening of tension, steps similar to the Moscow (nuclear) treaty."

Suspension Is Favored For Jones Act Control

WASHINGTON (UPI) — The Senate Commerce Committee Friday reported out favorably a proposal to suspend for an additional two years Jones Act restrictions to permit continuation of west coast lumber shipments to Puerto Rico.

Sen. Maurine Neuberger, D-Ore., said the measure was placed on the Senate calendar. An amendment introduced last session by Mrs. Neuberger expires Oct. 24. It permits the use of foreign flag vessels to ship lumber to Puerto Rico.

The Jones Act requires the use of American flag vessels for American shippers in cargo movements in inter coastal waters.
