

PARTIAL VIEW of the 800-acre ranch near Myrtle Creek, donated by McArthur Wixson and Miss Desda Wixson, is to be developed by the WCTU as a dependent boys' home. Shown are the Bilger Creek Road and a portion of the cultivated land. House and barn are in the foreground.

WIXSON BOYS' HOME is this 10-room ranch house on the property donated by the Wixson family of Myrtle Creek to be developed as a home for dependent boys. The sturdy structure will be renovated to meet fire and health requirements for multiple use. Initial plans are for use by from four to six boys, with later construction planned for a one-story ranch house to provide for a larger number.

Wixson Boys' Home Plans Now Approaching Reality

Supt. Don Miller and Assistant Superintendent Don Lauderbach of the WCTU Children's Farm Home, Corvallis, were in Roseburg recently conferring with Julian Helbeck of the Juvenile Court in connection with the development of the Wixson Boys' Home at Myrtle Creek.

Mr. and Mrs. Arthur Marsh, Mrs. A. L. Wren, Mrs. Clarence Currier and Mrs. Earl Agee of the local committee had arranged the conference and were present for the meeting.

According to Mrs. Marsh, plans are going forward for the renovation of the house now on the ranch to provide care for four or possibly six dependent boys. The gravity water system has been set up with the installation of a storage reservoir to provide running water for the house. A septic tank with adequate drainage field has been installed and certified by the health authorities, and the house plumbing is being installed through donation of labor and supplies by A. L. Wren of Roseburg, Mrs. Marsh said.

The state fire marshal has

inspected the premises and noted requirements from his department. The interior of the house is to be covered with sheet rock, and fire escapes and alarm system will be installed.

The house now has 10 rooms, including a large dormitory room 26-by-16 feet on the second floor along with two bedrooms, large hall space, outside balcony and a bath room. In addition, the first floor space includes a living room, dining and a utility and storage room.

The house is of sturdy frame construction and is deemed adequate to care for the boys under the supervision of house parents. Later plans include the construction of a one-story ranch type home to provide for 10 or 12 boys, ranging from age 10 to 16, according to the need.

Donations of funds and materials are being accepted. Contact may be through any member of the local committee or Mrs. A. L. Wren, 3044 NE Porter St., treasurer; or Mrs. Arthur Marsh, Rt. 4, Box 1240, who is chairman of the committee. The plans include opening of the house in the near future to care for the limited number of needy boys, with expansion to care for a larger number as funds and materials are available.

Mm. Nhu, Children Reunited In Rome

ROME (UPI) — South Viet Nam's Mme. Ngo Dinh Nhu was secluded today behind the walls of a Roman Catholic convent.

She was reunited with her three youngest children when they were brought to the convent Thursday night by Archbishop Ngo Dinh Thuc, her brother-in-law.

The archbishop, in Rome for the Ecumenical Council, is the brother of Madame Nhu's slain husband, Ngo Dinh Nhu, killed in the Nov. 1 military coup.

Madame Nhu arrived Thursday night from Los Angeles with her fourth and oldest child, Le Thuy. Both were drawn and grim, and Madame Nhu, who had been crying when the plane stopped earlier in Frankfurt, appeared on the verge of tears.

The three children who waited here in Rome were Ngo Dinh Trac, 15, Ngo Dinh Quynh, 11, and Ngo Dinh Le Quen, 4. The two eldest are boys.

Bible Talks Continue At Canyonville Hall

By MRS. R. E. PROCTOR

Bible talks by Betty Draper and Thyra Morgue are continuing in the Rebekah Hall at Canyonville Thursdays at 7:45 p.m. and Sundays at 3:30 p.m.

Mr. and Mrs. George Kelley Sr., of Canyonville received news of the birth of a granddaughter born in Germany to Sgt. and Mrs. George Kelley Jr., Nov. 3. The baby was named Karen Georgina.

At the regular monthly staff meeting of Forest Glen Hospital held Tuesday in the nurses' lounge of the Senior Residence, plans were made for the annual Christmas party. An educational film was also shown and routine business was conducted with Mrs. Eleanor Graham presiding.

Yoncalla Fete Is Big Success

The "Haunted House" event staged Halloween night by the Scotts Valley PTA was so popular that a repeat was held on a recent Saturday night, according to Mrs. Karl Hummel, correspondent.

A total of 330 persons made a tour of the "haunted" chambers on the night of the original presentation, and a large turnout was reported for the re-run, Mrs. Hummel said.

Almost 40 adults from the mayor on down participated in putting on the event, and there were many contributions of labor and material. The site was an old dwelling on the outskirts of town. Mazes were constructed from plywood and various "scary" effects were achieved through decoration and lighting.

Proceeds are to be used for PTA activities and to finance the eighth grade educational trip to be held in the spring.

It was one of the most successful activities ever undertaken by the PTA, Mrs. Hummel reports.

Back To School Night Set At Joseph Lane

Joseph Lane Junior High PTA will have its annual "Back to School Night" on Monday, Nov. 18, at 7:30 p.m. Parents will have the opportunity to visit each class by following their boy or girl's schedule.

To begin the activities of the evening there will be a short business meeting at which time the nominating committee for next year will be elected. The evening will conclude with refreshments served in the auditorium, according to Mrs. Lee Lacey, publicity chairman.

U.S., Aviation Industry Study Menace To Giant Jets

WASHINGTON (UPI) — The government and aviation industry are moving to counter a mysterious menace to giant jets — unpredictable turbulence that has wrecked one airliner and sent at least two others almost out of control.

It is not the usual turbulence associated with storms, but freakish vertical downdrafts and updrafts which seem to occur without warning at the high altitudes used by jets.

An Eastern DC8 apparently was caught in such a turbulent tug of war over Texas Saturday night. It finally landed safely, but only after six passengers were injured and one engine was ripped off as the pilot pulled out of the dive.

The Federal Aviation Agency (FAA), Civil Aeronautics Board (CAB), airlines operating jets and aircraft manufacturers are aware of the rare but potential

ly dangerous problem. They also are agreed it is in the process of being licked.

Two-Fold Cure

The cure is two-fold—airline pilots are being told not to slow down too much when they encounter turbulence; and they have been advised to use a different technique to overcome the effects of vertical turbulence.

Pilots entering a turbulent area normally will slow down to a certain speed. In the case of these unexpected downdrafts and updrafts, however, the permitted penetration speed may

be too low. The jets are first caught in a violent updraft reducing airspeed even further and putting the planes in danger of stalling.

A jet, with its swept-back wings, has a tendency to stall at higher speeds than conventional planes. If a stall is feared during the updraft, the natural tendency of a pilot is to push the nose down and gain airspeed. At this moment, the updraft changes to a downdraft and the airspeed becomes so great as to create control problems.

Stalling Less Likely

Higher turbulence penetration speeds will lessen the chances of stalling in the updraft. Pilots are being told to try to keep the nose level at such times.

Vertical turbulence first became a source of suspicion and concern last February when a Northwest Airlines Boeing 720 disintegrated while climbing through a severe thunderstorm over the Florida Everglades. The CAB has not yet issued a report on the accident in which 45 persons died, but investigators are known to believe that the plane encountered first a powerful updraft and then a sudden downdraft.

The theory is that the pilot, trying to avoid a stall during the updraft, put the nose down just as the downdraft struck. In the high-speed dive that followed, he may have tried to pull out too soon and tore off the plane's elevators, sending it completely out of control.

Group Of Oaklanders Make Hunting Trip

David Lee, Jackie Fugate, Micky Manley and Charles Beahm, all of Oakland, spent the weekend hunting at Sumner Lake, correspondent Edith Dunn reports.

Mrs. Pearl Harvey has returned from a visit with her son-in-law and daughter, Mr. and Mrs. Francis Crist at La Puente, Calif. Mr. Crist accompanied her home and will spend a few days here visiting friends.

Kent Copeland, Southern Oregon College student, spent the weekend with his parents, Mr. and Mrs. Kenneth Copeland.

Book Display Offered

The Roseburg First Methodist Church has on display this week a collection of books in the so-called "good" literature category including both religious and secular selections. The display may be viewed from 9 a.m. to 4:30 p.m. through Saturday.

According to Myra Crooch, education minister, the church as a public service will take orders for books from those desiring to make purchase and orders taken will be filled in time for Christmas giving.

COBRA powered by FORD

Come try the V-8 that puts fangs in the Cobra!

... try our new '64 Fairlane by Ford

Nobody steps on the Cobra. It's been running away with the honors in sports-car competition from coast to coast. Right here in our own backyard Cobras just took the Riverside Grand Prix, lapping the field, and finished 1-2-3-4 in the Riverside Grand Turismo. A week later, a Cobra took the Monterey Pacific Grand Prix at Laguna Seca. And the engine that churns out the Cobra's power? It's the same basic Ford V-8 you'll find in our '64 Fairlane. Try it. Find out all about Fairlane—the only middle-size car with real sports-car feel... real family room... really low price... and over a half-million enthusiastic owners!

'64 Fairlane comes in 8 new models. 5 great engines—2 Sixes, 3 sizzling V-8's up to 271 hp. 3-speed, 4-speed and automatic transmissions.
