# Society Brand Clothes are Different--Yet Dignified

**Different**—because their general lines are new and have a style never before brought out in ready-to-wear clothes.

**Dignified**—because of their refinement; their gentlemanly modesty but youthful style and young-mannish characteristics.

## NINETEEN MEN ENTER TENNIS TOURNAMENT

Local Handicap Contest Will Also Be Held With Silver Cup for Trophy

With the completion of the Varsity concrete courts the tennis season has begun in earnest. The tryouts for the Varsity team are under way now and candidates for the handicap meet are rapidly signing up.

The drawings for the Varsity tryouts last Thursday night resulted in the following men being paired: Williams and Stewart, Bond and Collins, C. Moore and Shattuck, Baer and Robison, Connell and Bates, Jamison and Gray, Wills and Rithschild, Rigler and Powell, Cash and Farris, and Ralph Moores as "by." The three men chosen in these tryout tournaments will hold a "round robin" with Stine and Eastham, last year's Varsity team, to choose the two best men to represent the University this year.

In spite of the announcement last week to the contrary, there will be a handicap tournament this spring. Laraway, the jeweler, has offered a silver

cup to the tennis club, to be awarded to the winner of the tournament each year, and which will become the personal property of anyone who wins it three times. The tournament will begin immediately and will be open to both students and faculty. A twenty-five cent entry fee for the tournament is charged to defray the expenses of the meet. Balls will be furnished for the finals and semi-finals and rackets will probably be put up for those who make a place in the final round. All entries must be made before Tuesday night, May 2, when the drawings will be made, and after which no names will be considered. Entries can be made either on the bulletin board at the court or to Ralph Newland, Bert Prescott or Gerald Eastham.

### Miners Visit Mines

Six upper classmen in the department of mining engineering spent part of the spring vacation doing some practical work in the field.

Gilles, Tillotson, Homer, Bristow and several others, accompanied by Professor Barker and later by Professor Grider, went to Gates, a small town in the Coast Mountains, near which are located the Silver King and the Black Eagle mines. At the Silver King, the miners surveyed a prospective tunnel, making a thorough study and devising plans for developing it.

The boys report a pleasant trip as well as a valuable one.
