Residence, 963 Harrison Ave., Eugene, Ore. Phone Main 664.

Ex-editor of the Emerald, Skipper Nicholas, writes that he is still holding down a place in the city engineers office in Portland and wants the Emerald, which he is not at present getting.

Ferdinand J. Neubarer, '11, who is teaching at Oakland this year, visited Eugene last week-end.

Miss Nellie Hemenway returned from Portland early this week, after a week-end visit in that city.

### REPORTS OF MONTHLY EXCEEDINGLY PROMISING

Alumni News to Form Main Feature, and Regular Departments are Continued

From all reports the Oregon Monthly will be exceptionally good this year. Editor Carin Degermark announces that the first issue will consist largely of Alumni news and stories on recent commencements. An article which will attract special interest is one written by Mrs. Ellen McCornack, who is one of the members of the first graduating class. This is exceptionally fine and will be of interest to all those who have ever attended the University.

The Engineering Department will be revived and given considerable attention during the coming year. There will be an article by Prof. Collier in this issue on "Coal fields in the Northwest." This will interest lay readers of the Monthly as well as those of the engineering school.

All those who have attended the classes at Friday Harbor this summer will look forward to seeing the article illustrated with cuts, contributed by Harold Bean on the work done there the past season.

The "Who's Who" department will also hold its usual place and will contain the life history of several of the most promising alumni.

Summer School is not to be slighted, and the secrets divulged in this issue will convince the most skeptical that "Oregon" is anything but dull in the summer time.

In the literary department there will be numerous stories and poems by some of the old writers. Another "Miggs Story" by Dean Collins will appear, while an anonymous story containing local hits promises to excite comment.

C. W. EDMUNDS, M. D.

Oculist and Aurist, 201 White Temple.

## FOOTBALL SITUATION BRIGHTENS MATERIALLY

Coach Warner Plugs Weak Spot by Shifting Fenton to an End.— Games Scheduled.

The first shake-up of the Varsity came last night when Fenton, the rangy guard, was shifted to an end. Warner intends to use Fenton's height and reach along with his basketball experience as the receiving end of long forward passes. Fenton also looks like the most probable candidate for the punting. His work shows some improvement over earlier season form and, although he can hardly be classed with the northwest immortals, Clarke, Moulten, Wolff, and Eakins, it is generally believed he will compare favorably with any other kicker in the conference this season. The Varsity lined up last night with Kellogg at center, Fariss and Hall, guards, Bailey and Grout, tackles, Fenton and Chandler, ends, and Capt. Main, Walker, Kaiser, and Heusner, in the backfield. Heusner is improving and Kaiser shows his form much to the delight of the bleacherites.

"Ty" Cobb, who has been Latourrette's understudy so far this season, returned to the game Monday to instill a little more "pip" in the scrubs. Fortunately Cobb's injuries were not as serious as first reported.

The athletic council at its meeting last night sanctioned the game with the Vancouver soldiers for Friday, October 20th. There is also a possibility of a game with the Alco Club, of Albany, next Saturday. These two practice games should put the Varsity in trim for the opening of the conference season on October 23th, when we meet W. S. C. at Pullman.

### DR. SPERRY BELIEVES ENDEAVOR NECESSARY

In Lecture at Assembly Tells How to Live and Break Heredity, Handicap.

"That anyone can overcome the handicap of environment and heredity, sufficient to make good, if he exerts his will power and conserves his health," is a summary of the address in today's assembly by Dr. Lyman B. Sperry on Heredity, Environment, and Endeavor. He said further that bad habits and unhealthy environments are sending more human beings to the junk pile of humanity than any other single cause. He has a terse mode of discourse which made his lecture one of the best which has been given at the University for some time. He declared that one of the greatest causes of domestic unhappiness was the fact that most girls "didn't know the difference between a good man and a cloth rack."

He concluded by saying, "Now abideth, Heredity, Environment and Endeavor, but the greatest of these is Endeavor."

### BILL ASKS FOR MORE CROSS COUNTRY MEN

The cross country and fall track season opened last week with a meeting at the gym, and a goodly number of candidates heeded Trainer Hayward's call. However, many of those who attended the meeting have failed to sign up and turn out. When seen this morning, Bill was not at all pleased over the turnout. The first cross country run was held Friday, and the turnout was unsatisfactory. More men are needed, and "Bill" sends out an earnest plea to all men inclined towards track athletics to show up that he may get a line on what he has to contend with this year.

An excellent lecture was given last night by Dr. Sperry in the women's gymnasium, under the auspices of the Y. M. C. A. He chose for his subject, "A Four-Square Man," and developed it in a manner most interesting to college folk.
